QUARTERLY RETURN

OF THE

MARRIAGES, BIRTHS, AND DEATHS

REGISTERED IN THE

PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT
REGISTRARS' DISTRICTS, AND REGISTRARS' DISTRICTS
IN IRELAND,

WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's
District; Persons Vaccinated, &c., &c., &c.*

DUBLIN: PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE,
BY ALEX. THOM & CO. (LIMITED).

And to be purchased, either directly or through any Bookseller, from
E. PONSONBY, 116, GRAFTON STREET, DUBLIN; or
WYMAN AND SONS, LTD., FETTER LANE E.C.; or
OLIVER AND BOYD, TWEEDDALE COURT, EDINBURGH.

Price One Shilling.

Marriages:—OCT., NOV., DEC., 1908. **Births & Deaths:**—JAN., FEB., MAR., 1909.

During the quarter ended 31st March last, there were registered in the 826 Registrars' Districts in Ireland 25,803 births—a number equal to an annual birth-rate of 23·6 in every 1,000 of the estimated population*—and 22,052 deaths, representing an annual rate of 20·2 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 3,556 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 25·6 in every 1,000 of the estimated population, and the death-rate 18·0 per 1,000.

The birth-rate in Ireland for the quarter is equal to the average rate for the corresponding quarter of the ten years 1899–1908, and 0·5 below the rate for the first quarter of 1908. The deaths are 1,301 under those registered in the corresponding quarter of 1908; the death-rate is 1·2 under the rate for that quarter, and 1·0 under the average for the first quarter of the ten years 1899–1908.

Compared with those for the corresponding quarter of 1908, the returns of pauperism, furnished by the Local Government Board, show a decrease

* See page 84.

Registration of Marriages, Births, and Deaths, Ireland.

of 1,287 (a) in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 1,132 in the average number of persons on out-door relief.

Compared with the averages for the first quarter of the ten years 1899–1908, the number of Workhouse inmates shows a decrease of 252 and the number of persons on out-door relief shows a decrease of 1,829 (a), the total under both heads being 2·0 per cent. under the average for the first quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 1·0 per cent.

The annual marriage-rate (4·8 per 1,000 of the population) represented by the marriages registered during the fourth quarter of 1908 is 0·1 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each **Province** and **County** in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of **Marriages** registered during the Quarter ended 31st December, 1908, and by the **Births** and **Deaths** registered in the Quarter ended 31st March, 1909.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry county and county borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (a) page 23.

MARRIAGES.

The marriages (5,211) registered in Ireland during the fourth quarter of 1908 are equivalent to an annual rate of 4·8 per 1,000 of the estimated population, being equal to the rate for the corresponding quarter of 1907, but 0·1 above the average rate for the fourth quarter of the ten years 1898-1907. Of the total number of marriages 3,415 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,796 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·2 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·4 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·1 above, but that under the latter is 0·1 below the average rate for the corresponding quarter of the previous ten years.

Of the 22,831 marriages registered last year, 7,229 were registered in the first quarter, 4,887 in the second, 5,504 in the third, and 5,211 in the fourth.

TABLE II.—Showing by **Quarterly Periods** the **Marriages** registered in Ireland in each of the eleven years 1898-1908, and the average number for the ten years 1898-1907.

BIRTHS.

The number of births registered during the quarter ended 31st March last was 25,803—13,190 boys and 12,613 girls—being equal to an annual ratio of 1 in every 42·4, or 23·6 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1899-1908 was 26,107, equivalent to an annual rate of 23·6 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 23·3 per 1,000 of the population according to the Census of 1901; Munster, 22·3; Ulster, 24·2; and Connaught, 21·7.

The highest county or county borough birth-rate* is 32·2 for Dublin county borough, and the lowest 16·7 for Queen's county. Of the intermediate rates the highest five are—Belfast county borough, 29·7; Kerry, 25·4; Mayo, 25·4; Limerick county and county borough, 24·3; and Antrim county, 23·8. The lowest five are—Tipperary, N.R., 17·1; Clare, 17·5; Leitrim, 17·9; Cavan, 18·0; and Longford, 18·5.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st March last was 22,052—10,730 males and 11,322 females—affording an annual ratio of 1 in every 49·6, or 20·2 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1899–1908 was 21·2 per 1,000.

The death-rate in Leinster was 22·6 per 1,000 of the population according to the Census of 1901; in Munster, 18·0; in Ulster, 20·0; and in Connaught, 17·2.

The county or county borough death-rates* range from 14·9 in Kerry county to 29·2 in Dublin county borough. Between these rates the lowest five are—Clare, 15·0; Longford, 16·4; Mayo, 16·4; Donegal, 16·7; and Galway, 16·8; and the highest five are—Monaghan, 23·6; Armagh, 22·2; Kilkenny, 21·6; Waterford county and county borough, 21·2; and Queen's county, 20·9.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1899–1908, and the average number for that period; also the number registered during the first quarter of the year 1909:—

* See note (a) on page 2.

Ages.—Of the 22,052 deaths registered last quarter, 2,677, or 12·1 per cent., were of infants under 1 year of age; and 10,320, or 46·8 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 103·7 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 13·9 per cent. of the total deaths registered therein; in Munster, 11·5 per cent.; in Ulster, 12·0 per cent.; and in Connaught, 9·5 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 41·8 per cent.; in Munster, to 47·7 per cent.; in Ulster, to 46·8 per cent.; and in Connaught, to 57·0 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 853, or 70 below the number registered in the corresponding quarter of 1908, and is equivalent to an annual rate of 0·78 per 1,000 living, being 0·07 below the rate for the first quarter of 1908, and 0·04 below the average rate for the first quarter of the ten years 1899–1908.

The following tabular statement shows the mortality from each of the principal epidemic diseases, as registered during the March quarter of 1909, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years 1904–1908.

Name of Disease.	Number of Deaths in March quarter, 1909.	Average number of Deaths in March quarter of the 5 years, 1904–1908.
Small-pox,	—	1
Measles,	160	166
Scarlet Fever,	32	41
Typhus,	15	17
Whooping-cough,	272	277
Diphtheria,	115	83
<i>Pyrexia</i> (origin uncertain),	11	12
Enteric Fever,	81	100
Diarrhoeal Diseases,	167	151

Small-pox.—There was no mortality from small-pox reported during the period under notice; neither was there any occurrence of the disease mentioned by the Registrars in their quarterly returns.

Measles.—In Table IV. it may be seen that the deaths from measles in Ireland in each of the 3 later quarterly periods of the year 1908 were 237, 149, and 140; in the March quarter of that year such deaths were 278 in number, and in the March quarter of 1909, the period under notice, 160 deaths were registered, representing an annual death rate of 0·15 per 1,000 of the population of Ireland estimated to the middle of the year. The average number of deaths from measles in the March quarter of the 5 years, 1904–1908, is 6 above the number for the corresponding quarter of the year 1909. Of the total (160) deaths, 70 were returned for the county borough of Dublin, only 8 deaths from measles having been returned for Belfast county borough.

* See note (†) on page 11.

Scarlet Fever.—The deaths from scarlet fever, in number 32, show an increase of 5 over the preceding quarter, but are 9 under the average (41) for the corresponding quarter of the preceding 5 years. Deaths from this disease registered in the March, June, and September quarters of 1908 were 8, 15, and 19 respectively. Of the deaths, 11 were registered in the union of Cork, in which area the county borough of Cork is situated.

Typhus.—During the quarter, 15 deaths from typhus were registered. Compared with the average of the preceding 5 years, namely, 17 deaths, it was under, and with the deaths occurring in the four quarters of the year 1908, namely, 21, 21, 10, and 6 respectively, it was under the figures in the first two quarters, but above those in the second two quarters. Of the deaths, one was registered in the province of Leinster, in Shillelagh union; 9 in Munster, namely, in Ennis union one death, in Cork 2, in Dingle one, in Tipperary 2, and in Waterford union 3 deaths; and 5 in Connaught, namely 3 deaths in Belmullet union, one in Castlebar union, and one death in Tobercurry union. There was not any record of a death from typhus in the province of Ulster during the period under notice.

Whooping-cough.—The rate represented by the mortality from whooping-cough, namely, 272 deaths, was 0.25 per 1,000 of the estimated population. The mortality, although in the March quarter generally high, is in the period under notice slightly below the average, 277, and also below the number of deaths from whooping-cough registered in the March quarter of 1908, during which period 295 deaths were registered; in June quarter the figure declined to 263, in September to 162, and in December quarter a further slight decline to 156 is shown in Table IV. Of the total deaths, 36 were registered in Dublin county borough, 24 in Belfast county borough, and 24 in Cork union, which contains the county borough of Cork.

Diphtheria.—The total number of deaths from diphtheria registered in the whole of Ireland was 115, which number is equal to an annual death rate of 0.11 per 1,000 of the population, estimated to the 30th June, 1909. This number is above the average (83), and also above the number (94) registered in the March quarter of 1908. Of the deaths in Leinster, 42 in number, there were 19 in the county borough of Dublin; of 19 deaths in Munster, 9 were in Cork union, containing Cork county borough; of 41 deaths in Ulster, there were but 5 in the county borough of Belfast. In the union of Millford there were 7 deaths, in the union of Lisburn 5, and 5 in the union of Cookstown, all of which latter were in the district of Cookstown, in which the Workhouse Hospital is situated; and of 15 deaths in the province of Connaught, 6 deaths were in the union of Galway.

Enteric Fever.—The average number of deaths from enteric fever for the March quarter of the years 1904-1908 was 100, and in the period under notice there has been recorded a decrease to 81 deaths. In the March quarter of 1908, the number of deaths was 66, in June quarter 62, in September quarter 92, and in December quarter 103. The annual rate represented by the 81 deaths from enteric fever is 0.07 per 1,000 of the estimated population of Ireland. Of the 81 deaths, 22 were returned for Dublin county borough, 10 for Cork county and Cork county borough, but not one death from

enteric fever was registered in the county borough of Belfast during the period under notice.

The deaths of 11 persons were ascribed to pyrexia (origin uncertain.)

Diarrhoeal Diseases.—Under the general heading Diarrhoeal Diseases, deaths from epidemic enteritis, epidemic diarrhoea, diarrhoea, cholera nostras, and dysentery are grouped. In the aggregate, such deaths numbered 167 for the whole of Ireland, and represent an annual rate of 0·15 per 1,000 of the estimated population; the total is slightly over the average, 151, and also above the number registered in the corresponding quarter of the year 1908. Of the total, 17 deaths were returned for Dublin county borough, 24 for Belfast county borough, and 11 for Cork county and county borough.

Tuberculous Disease.—The *unrevised* total of deaths from all forms of tuberculous disease, as returned by the Registrars, was 2,861, as against 2,987 returned in the March quarter of 1908, the former figure representing an annual death rate from the disease for the period under notice, of 2·62 per 1,000 of the estimated population, and the latter an annual rate of 2·74 for the March quarter of 1908. In the intervening quarters, the figures as returned represented in the June quarter a rate of 2·78 per 1,000, in the September quarter a rate of 2·29, and in the December quarter a rate of 2·27 per 1,000 of the estimated population.

Among the notes which have been supplied to me by the courtesy of the Registrars, bearing upon the subject of tuberculosis, the following have been extracted from the appendix to this report in which the Registrars' notes are published, as having some special bearing on this most important subject:—

Edenderry, Rhode.—“Pulmonary tuberculosis is greatly on the increase, but owing to the active measures taken by the Medical Officer of the district by means of inoculation of serum, the great majority of those patients are improving in a most marvellous manner.”

Killarney, Coom.—“Tuberculous disease appears to be on the increase in this district—in fact, far more than is known.”

Nenagh, Silvermines.—“Three deaths from pulmonary tuberculosis registered; two contracted the disease in Dublin.”

Callan, Mullinahone.—“Of the two deaths from pulmonary tuberculosis, one returned from America with the disease.”

Waterford, Waterford Urban No. 1.—“The presence of tuberculosis is indicated by the fact that it is the cause of death in about 20 per cent. of all deaths.”

Antrim, Crumlin.—“Phthisis pulmonalis is still the prevailing cause of death in this district. Otherwise nothing of note occurred this quarter.”

Cavan, Killashandra.—“A branch of the Women's Health Association has been established here, and the members of its committee are doing useful and good work in visiting the neighbouring cottages and explaining to them the value of fresh, pure air.”

Londonderry, Burt.—“Pleurisy more common than usual this winter, several eventually becoming tubercular.”

Downpatrick, Killyleagh.—“I have registered more deaths than usual from tuberculous disease this quarter.”

Cookstown, Stewartstown.—“I am very sorry to say that in this district a number of phthisical persons of the labouring and factory class inter-marry, have two or three children, then die, and leave a puny, delicate offspring, which it is impossible to rear without a good, wholesome supply of fresh new milk, which it is impossible, under present circumstances, for the poor to get.”

Strabane, Newtownstewart.—“Tubercular disease, especially of the lungs, is very prevalent here, probably due in the majority of instances to tubercular milk.”

Tuam, Tuam No. 2.—“Four deaths from tuberculous disease (16 per cent. of the total number of deaths registered).”

Swineford, Kiltamagh.—“Pulmonary tuberculosis very common. People are beginning to recognise the dangers of infection, and appreciate the benefits of fresh air. Curtained beds still too common, however. Knowing my antipathy to those ‘death traps,’ patients’ people will sometimes remove the curtains when the ‘doctor’ is expected, only to replace them on my departure. Fortunately, more sensible ideas are beginning to prevail.”

Dromore West, Skreen.—“Phthisis is prevalent in the district, and in a few instances directly communicated.”

Malignant Disease.—According to the returns of the Registrars, it appears that the number of deaths attributed to carcinoma, sarcoma, or cancer, malignant disease (not defined) was 851; this number is equivalent to an annual death rate of 0·78 per 1,000 of the estimated population of the country. In the four preceding quarters the rates representing the figures as returned, showing the mortality caused by malignant disease, were, 0·75, 0·66, 0·67, and 0·72 per 1,000 respectively.

Cerebro-spinal Fever.—The following information was forwarded with reference to cerebro-spinal fever:—

Belfast, Belfast Urban, No. 3.—“One death was registered as from cerebro-spinal meningitis, and 3 deaths as from cerebro-spinal fever.”

Belfast, Belfast Urban, No. 9.—“Two deaths occurred during the quarter from cerebro-spinal fever.”

Belfast, Belfast Urban, No. 11.—“During the first week of the quarter there was one case of epidemic cerebro-spinal meningitis registered in the district.”

Lisburn, Ballylesson.—“There were three deaths from cerebro-spinal fever in Purdysburn Fever Hospital during past quarter.”

Rabies, Hydrophobia.—There was no reference to the existence of rabies in Ireland made by any of the Registrars, nor was the occurrence of dog-bites alluded to.

Violence.—Under the head of violence 307 deaths were returned; these include accidental deaths, suicides, and homicides.

The Registrars, in their Notes, report the presence of the following diseases:—Measles in 57 districts, German measles in 3, scarlet fever in 12, whooping-cough in 52, diphtheria in 24, fever in 23—typhus in 3, and enteric in 20—mumps in 4, influenza in 61, and cerebro-spinal fever or cerebro-spinal meningitis in 4 districts. [See Appendix to this Report commencing on page 85.]

Inquests.—There were 447 inquests reported to the Registrars during the quarter; this number being equal to 1 in every 49 of the total deaths registered.

In Leinster there was 1 inquest to every 50 deaths registered, in Munster 1 to 66, in Ulster 1 to 36, and in Connaught 1 to 116.

Deaths in Public Institutions.—Of the 22,052 deaths registered, 4,442, or 20·1 per cent., occurred in public institutions. In Leinster the percentage was 26·8, in Munster 24·0, in Ulster 14·9, and in Connaught 12·9.

Uncertified Deaths.—According to the returns, 5,811 of the total 22,052 deaths which were registered during the quarter were uncertified, being more than 26 per cent. of the total.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st March, 1909, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.											Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 22·8, and the birth-rate 29·2 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the death-rate was 18·5 and the birth-rate 20·5 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 1·2 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·6 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FIRST QUARTER of the year 1909, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES,‡ from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (•) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 3rd April, 1909.

VACCINATION.

According to the Returns of Primary Vaccinations received for the first quarter of the year 1909, there were 15,481 persons successfully vaccinated.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st March last was 3,556 (2,200 males and 1,356 females), being 100 more than in the corresponding quarter of the year 1908, but 979 below the average number for the first quarter of the ten years 1899-1908.

TABLE VI.—EMIGRATION from IRELAND during the months of January, February, and March in 1908 and 1909 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1908.	1909.	In-crease.	De-crease.	1908.	1909.	In-crease.	De-crease.	1908.	1909.	In-crease.	De-crease.
January.	373	430	52	—	263	297	34	—	641	727	86	—
February.	508	553	45	—	426	331	—	95	934	884	—	50
March.	1,003	1,217	214	—	878	728	—	150	1,881	1,945	64	—
Total.	1,889	2,200	311	—	1,567	1,356	—	211	3,456	3,556*	100	—

* Including 2,113 emigrants to the United States of America, viz.:—329 in the month of January, 457 in February, and 1,327 in March. Of 1,910 steerage passengers, 469 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6d., which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the first quarter of the year 1908 the average price was 6½d., and in the corresponding quarter of 1899 it was 5½d.

The average price of oatmeal (1st quality) in Dublin for the quarter was 13s. 6d. per cwt. For the corresponding quarter of the year 1908 the average price was 15s., and for the first quarter of 1899 the average price was 13s. 9d. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2s. 8d. to 3s. In the first quarter of 1908 the average prices were 4s. 2d. to 4s. 8d., and the prices for the corresponding quarter of 1899 were 2s. 3d. to 2s. 10d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 54s. 6d. to 58s. 6d. per cwt. In the corresponding quarter of 1908 the average prices were from 50s. to 56s., and in the first quarter of 1899 they were from 48s. to 56s. 6d.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was 22s. per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was £85¼, and the lowest £83¼.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter, which had been 3½ per cent., was raised on the 14th January to 4 per cent., at which it remained to the end of the quarter.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the first quarter of 1909 was 46,283, or 1,287 (a) below the average for the corresponding period in 1908.

The average weekly number of persons receiving out-door relief during the quarter was 57,001* being 1,132 below the average for the first quarter of 1908.

Of the persons receiving in-door relief during the first quarter of 1909, an average number of 1,569 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1908 the average weekly number was 1,472.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FIRST QUARTER of the year 1909, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,† Phœnix Park, Dublin, during the first quarter of the years 1904–1909, respectively,

* See note (a) on page 2.

† Latitude 53° 21' 48.25" north; longitude 6° 20' 59.15" west. Height above the sea 155.3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 18).

The mean height of the barometer during the first quarter of 1909 was 29·759 inches, being 0·163 below the average for the corresponding quarter of the five years 1904–1908; the highest reading (30·513 inches) was on the 4th January, at 9 A.M., air calm, and the lowest (28·738 inches) on the 14th January, at 9 P.M., wind W.S.W.

The mean temperature of the air during the quarter was 40·5°, being 1·0 below the average for the first quarter of the 5 years 1904–1908.

The maximum temperature of the air during the quarter was 55·2° and the minimum 21·9°. The maximum heat in sun was 101·0°.

Rain or snow fell on 47 days during the quarter. The rain-fall measured 4·297 inches, being 1·817 inches below the average for the first quarter of the five years 1904–1908. The greatest monthly rain-fall was in March, when 2·125 inches were registered.

The wind blew on 16 days from S.W., on 16 days from W., on 12 days from S.E., on 10 days from N.W., on 6 days from N., on 5 days from N.E., on 5 days from E., on 4 days from S., and the air was calm on 16 days at 9 A.M.

January.—The mean height of the barometer during this month was 29·940 inches; the highest reading (30·513 inches) was on the 4th at 9 A.M., air calm; and the lowest (28·738 inches) on the 14th, at 9 P.M., wind W.S.W. The mean temperature of the air was 41·3°, the maximum registered was 53·1°, and the minimum 27·9°. The 3rd was the warmest day, and the 23rd the coldest night. The mean of the dry bulb was 40·3°, and of the wet bulb 38·8°. The maximum heat in sun was 87·5°. The total amount of sunshine recorded was 61·6 hours, the greatest daily amount being 7·4 hours on the 19th. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·5. Rain or snow fell on 15 days. The rain-fall measured 1·494 inches; the greatest amount in 24 hours was 0·350 inch on the 18th.

February.—The mean height of the barometer during this month was 29·976 inches; the highest reading (30·487 inches) was on the 13th at 9 P.M., wind E.N.E., and the lowest (29·320 inches) on the 9th, at 9 P.M., wind W. The mean temperature of the air was 40·8°, the maximum registered was 54·3°, and the minimum 23·0°. The 4th was the warmest day, and the 14th the coldest night. The mean of the dry bulb was 40·5°, and of the wet bulb 38·7°. The maximum heat in sun was 96·1°. The total amount of sunshine recorded was 80·1 hours, the greatest daily amount being 7·7 hours on the 19th. The maximum ozone was 0·8, the minimum 0·0, and the mean 0·5. Rain or snow fell on 11 days. The rain-fall measured 0·678 inch; the greatest amount in 24 hours was 0·232 inch on the 28th.

March.—The mean height of the barometer during this month was 29·361 inches; the highest reading (30·029 inches) was on the 12th at 9 A.M., wind N., and the lowest (28·787 inches) on the 18th, at 9 P.M., wind S.E. The mean temperature of the air was 39·4°; the maximum registered was 55·2°, and the minimum 21·9°. The 24th was the warmest day, and the 4th the coldest night. The mean of the dry bulb was 38·9°, and of the wet bulb 37·7°. The maximum heat in sun was 101·0°, and the minimum on the grass 15·5°. The minimum on the grass was below 32° on 19 nights. The total amount of sunshine recorded was 103·8 hours, the greatest daily amount being 10·3 hours on the 21st. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·5. Rain or snow fell on 21 days. The rain-fall measured 2·125 inches; the greatest amount in 24 hours was 0·620 inch on the 27th.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of
W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.*

In compiling the following Table (pp. 20 and 21), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

The stations selected, with the names of the Observers, are as follows:—

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	Meteorological Office.
Blacksod Point,	Do.
Markree Castle,	J. R. Armstrong, for Bryan Cooper, Esq.
Donaghadee,	Meteorological Office.
Armagh, The Observatory, . .	J. L. E. Dreyer, Ph.D.
Belfast, Queen's College, . .	John Wylie, B.A.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Waterford,	J. N. White, Esq.
Birr Castle,	O. Boeddicker, Ph.D., for the Earl of Rosse.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.

NOTES ON THE STATISTICAL TABLES.

Hours of Observation.—The hours of observation are indicated by the type in which the names of the stations are printed. CAPITALS, normal climatological stations, 9 a.m. and 9 p.m.; *ITALIC CAPITALS*, telegraphic reporting normal climatological stations, 7 a.m., 1 p.m., 9 p.m.; Roman, telegraphic reporting stations, 7 a.m., 1 p.m., 6 p.m.; *Italics*, auxiliary climatological stations, 9 a.m. only. At Valencia an additional observation is taken at 3 p.m. The afternoon observations are used in preparing the wind summaries and in computing the number of days of "overcast" or "clear sky." At telegraphic reporting stations (black capitals or Roman type) the results given under "hygrometer" and "cloud" are based on the morning observations only.

Barometer.—The correction for latitude has not been applied. The values are for station level. They are the means of readings at 9 a.m. and 9 p.m., or 7 a.m., 1 p.m., 9 p.m., or 7 a.m., and 6 p.m., as the case may be.

Rainfall.—The amounts are for the 24 hours commencing at the time of morning observation.

Weather Phenomena.—The number of days of Rain, Snow, Hail, Thunderstorm, Fog and Gale, are counted irrespective of the hours at which the phenomena occur. Except in the case of rainfall (see above) the day is the civil day. A day is reckoned as a day of "clear sky," if the average of the estimates of the "amount of cloud" at the hours of observation is less than 2, and as an "overcast" day if the average is greater than 8.

Wind Summaries.—The results given under wind direction, and the number of observations of calms and of fresh or strong wind, are based on the observations at fixed hours. At Valencia and Armagh the wind observations are based on the records of a standard Robinson anemometer (factor 2.2). Velocities of between 13 and 38 miles in the hour have been entered as "fresh or strong winds," velocities of 33 miles in the hour, or above, as gales.

Averages.—The averages used for stations are—Temperature and Rainfall for the 35 years 1871-1905; Bright Sunshine for the 25 years 1881-1905.

District Values.—The district values of temperature, rainfall, and sunshine are computed from the data for the stations included in the Weekly Weather Report of the Meteorological Office. Only a selection of these stations is included in this Report. The average values with which the current district values are compared are for the 25 years, 1881-1905. The district values for "amount of cloud" and for the extremes of temperature and the largest rainfall in a day, are taken from the Monthly Weather Report of the Meteorological Office.

* Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1888.

+ Formerly described as "Simple Continued Fever."

§ Including accidental deaths, homicides, and suicides.

§ The Returns for Cebbridge District, in Cebbridge Union, and Killybegh District, in Tullamore Union, not having been received in time for press, the numbers of Births and Deaths registered in the corresponding Quarter of 1908 have been adopted.

ABSTRACT II.—SUPERINTENDENT REGISTRARS' DISTRICTS OF POOR LAW UNIONS, ARRANGED BY PROVINCES AND COUNTIES.*

COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS.	Area, in Statute Acres.	Popu- lation in 1901.	Mar- riages.		Births.		Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include																												
			Registered in the Quar- ter ending 31st Dec- 1902.		Registered in the Quar- ter ending 31st Mar, 1903.		Average in the Quarters ending 31st Mar., in the years, 1900-1902.		Total in the Quar- ter ending 31st Mar., 1903.		Deaths from																										
			Children under 1 year of age.	Persons aged 60 years and up- wards.	Small-pox.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Typhoid (origin uncertain).	Measles Fever.	Diarrhoeal Diseases.	All forms of Ty- phoid Dis- ease.	Cancer, Malig- nant Disease.	Violence.	Inquest Cases.	Deaths in Public Insti- tutions.	Number of Uncertified Deaths.	Number of successful Vaccinations in the Quarter ending 31st March, 1903.

NOTE.—This table has been constructed for the years 1835 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1909—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—District healthy.

CARLOW; *Bagenalstown*.—The district is healthy.

CARLOW; *Borris*.—Sanitary arrangements good.

CARLOW; *Clonegall*.—On account of the severe winter there were no vaccinations.

CARLOW; *Fennagh and Myshall*.—The deaths of eight persons aged over seventy years were registered during the quarter. Seventeen deaths of the total twenty were registered as over sixty.

CARLOW; *Leighlinbridge*.—Health of district good. No epidemic.

CARLOW; *Tullow*.—This district is in a very healthy condition at present; of the twenty-nine deaths registered, nineteen were over 60 years of age.

NEW ROSS; *St. Mullins*.—Sanitary arrangements good.

Dublin County.

CELBRIDGE; *Rathcoole*.—The death of a blacksmith, was registered at 104 years. Born at Castledermot about the year 1804 or 1805; lived at Eadestown, Naas, in year 1841; remembered blowing the forge bellows for his father at the time of the battle of Waterloo. Health of district good.

DUBLIN NORTH; *Clontarf and Howth*, No. 2.—Vaccination postponed owing to prevalence of measles and whooping-cough.

DUBLIN SOUTH; *Tallaght*.—Owing to measles, no vaccinations were performed. Deaths of old people at 84, 80, and 78 years.

RATHDOWN; *Blackrock and Stillorgan*, No. 2.—District healthy.

Kildare County.

BALTINGLASS; *Baltinglass*, No. 2.—All vaccinations postponed in consequence of prevalence of whooping-cough.

CELBRIDGE; *Kilcock*.—Influenza followed by broncho-pneumonia was prevalent in this district during the last quarter, and accounts for the increased mortality. No uncertified deaths in this district last quarter.

CELBRIDGE; *Maynooth*.—District very healthy, but an epidemic of pertussis is just commencing.

EDENDERRY; *Carbury*.—Influenza with lung complications raging all through quarter, causing the highest death-rate in my recollection.

EDENDERRY; *Rathangan*, No. 1.—One death registered, a young man, 25, chronic disease of lungs, duration fifteen years. Several years ago he had undergone operations in Dublin hospitals. His death was quite sudden.

NAAS; *Ballymore Eustace*.—Health of district fair.

NAAS; *Kildare*.—Whooping-cough very prevalent. Three children died, two under a year, and one 2 years 8 months. The three died inside the one week.

NAAS; *Naas and Carragh, W.*—Influenza has been prevalent. Otherwise the district has been healthy.

Kilkenny County.

CALLAN; *Callan, W.*—Three deaths registered, as caused by tuberculous disease. Influenza and whooping-cough are very prevalent. A case of tetanus resulting in recovery occurred during quarter.

CALLAN; *Kilmaganny.* — District healthy.

CASTLECOMER; *Ballyragget.*—All the diseases named in the abstracts absent. Sanitary arrangements very fair.

CASTLECOMER; *Castlecomer, W.*—Deaths above the average owing to the severity of the weather during the quarter.

KILKENNY; *Tiscoffin.*—The health of the district is very good. There were a few cases of measles of a mild type.

KILKENNY; *Tullaroan.*—Health of district good.

NEW ROSS; *Dysartmoon.*—District healthy.

THOMASTOWN; *Inistioge.*—District is very healthy. No deaths from tuberculous nor malignant diseases registered by me during quarter.

THOMASTOWN; *Knocktopher.*—During this quarter out of a total of twenty-two deaths, eight were over 80 years, four over 70 years, and two over 60 years. Sanitary arrangements satisfactory.

URLINGFORD; *Urlingford, W.*—Health of the district fairly good. Vaccinations in a backward state for quarter.

King's County.

BIRR; *Ferbane.*—Epidemic of broncho-pneumonia in children during quarter. One case of laryngeal diphtheria. Very few vaccinations. Five cases of enteric fever in one family; all removed to fever hospital.

BIRR; *Kinnitty.*—Whooping-cough prevalent during first two months of quarter, one case of diphtheria. One death from diphtheria and one from whooping-cough.

EDENDERRY; *Rathangan, No. 2.*—A death registered of a man aged 80 years from malignant disease of liver. His brother died of same disease six months previously, aged 70 years. A death from acute pneumonia, of a man aged 54 years.

EDENDERRY; *Rhode.*—Pulmonary tuberculosis is greatly on the increase, but owing to the active measures taken by the medical officer of the district by means of inoculation of serum, the great majority of those patients are improving in a most marvellous manner.

MOUNTMELICK; *Clonygowan, No. 2.*—District healthy. Vaccination something less owing to bronchial affections amongst infants.

ROSCREA; *Roscrea, No. 2.*—District very healthy. Five of the six persons whose deaths were registered were over 70 years of age.

ROSCREA; *Shirrone.*—Vaccination postponed in nearly all cases on account of severity of weather.

TULLAMORE; *Philipstown.*—District healthy.

Longford County.

BALLYMAHON; *Abbeysrule.*—Sanitary arrangements good. Birth-rate low. In consequence of the mild winter, there were a good many children vaccinated during the month of January.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinaloe.*—The district is in good sanitary condition, and free from contagious disease.

GRANARD; *Granard, W.*—There were no cases of dangerous infectious disease in my district during the quarter, nor do I know of any cases of tuberculosis. The district is free from contagion.

GRANARD; *Scrubby, No. 2.*—Health of the district generally good, three deaths of persons 90 years and upwards are recorded, and four deaths of persons 80 years and upwards. One family was affected with diphtheria, origin of disease unknown. No recurrence of disease.

LONGFORD; *Drumlish.*—Vaccination backward, owing to an epidemic of measles. The sanitary condition of the district is fairly good. No outbreak of infectious disease during the quarter; only one case of enteric fever in March, which was removed to hospital and recovered. One death of a person aged 102 years was registered. The man was possessed of all his faculties up to his death.

LONGFORD; *Longford, W.*—Owing to recent fire in workhouse, statistics of births and deaths there will be included in next quarter.

Louth County.

ARDEE; *Castlebellingham.*—Vaccinations postponed owing to epidemic of measles.

ARDEE; *Collon, No. 1.*—District healthy.

ARDEE; *Dunleer.*—District healthy.

DROGHEDA; *Termonfeckin.*—A few cases of scarlatina occurred at the beginning of the quarter, but by isolation,

disinfection, and having the schools closed, the spread of the epidemic was fortunately checked. Just now, the last month of the quarter, influenza of a catarrhal type is assuming epidemic proportions. The deaths of fourteen persons have been registered, who attained the age of 60 years or upwards; of these, eleven reached the age limit entitling them to old age pensions, and nine were actually in receipt of such pensions. The Old Age Pensions Act is much welcomed by the deserving poorer classes, as a much-needed staff upon which infirm old age can lean with comparative security in its declining years.

DUNDALK; Barronstown.—There was an extensive epidemic of measles complicated in most cases with bronchitis and pneumonia. Almost all the schools of district had to be closed. No other zymotic disease. There were very few vaccinations performed owing to the prevalence of measles, &c., and the inclemency of the weather.

DUNDALK; Dundalk, W.—District in a fairly good sanitary condition. Had an outbreak of enteric (four cases) in one house in town—no others. Old rubble sewer in street being replaced by a new piped one. Building of new houses still going on, and the worst of the smaller and insanitary houses being closed and demolished in many parts for want of tenants.

Meath County.

ARDEE; Collon, No. 2.—District very healthy.

ARDEE; Drumcondra.—Measles and pertussis very prevalent for the past fortnight, also a few cases of scarlatina of a mild form.

DROGHEDA; St. Mary's.—The sanitary state of the district is good.

DROGHEDA; Stamullen.—The district healthy during quarter.

DUNSHAUGHLIN; Killeen.—Vaccination postponed owing to severity of weather and epidemic of measles. Four cases of scarlet fever all in one family, supposed to be contracted away from district. Measles very prevalent. Sanitary condition of district fair.

DUNSHAUGHLIN; Ratoath, W.—The sanitary condition of the district is good.

EDENDERRY; Ballyboggan.—There was a rather severe epidemic of pertussis, with two fatal cases. One case of enteric; the origin of which could not be traced; patient was over 50—fatal.

KELLS; Moynalty.—No deaths from tuberculosis.

KELLS; Nobber.—The epidemic of measles which permeated the entire district is now almost extinct. No death actually occurred from the disease itself, but from subsequent ailments of which it was the primary cause. A most remarkable feature of the epidemic was that persons of middle age and above it were prostrated by it.

NAVAN; Castletown.—Vaccination postponed owing to the prevalence of measles and severity of season; registered only six deaths—five being in receipt of the old age pension. There was one death from laryngeal tuberculosis, twelve months' duration. District healthy, and in good sanitary condition.

OLDCASTLE; Oldcastle, W.—The district continues in a satisfactory condition.

TRIM; Innfield.—Whooping-cough and measles were prevalent in the district during the quarter. Two deaths from diphtheria were registered, but one of them had died in the previous quarter.

Queen's County.

ABBEYLEIX; Ballinakill.—The general health of the district is good.

ABBEYLEIX; Ballyroan.—I registered the death of one man during the past quarter over 104 years old.

ABBEYLEIX; Rathdowney.—The sanitary arrangements of district are good. There have been thirty cases of catarrhal jaundice during the quarter.

ATHY; Ballylunan.—One death from whooping-cough; the district got very free from it.

MOUNTMELICK; Clonygowan, No. 1.—District healthy. Vaccinations somewhat less owing to bronchial affections amongst children.

MOUNTMELICK; Mountmellick, W.—Sanitary arrangements satisfactory.

MOUNTMELICK; Mountrath.—District healthy.

ROSCREA; Borris-in-Ossory.—The health of this district has been fair during the past quarter. Eight of the deaths I registered were aged from 70 to 99 years.

Westmeath County.

ATHLONE; Glassan.—District very healthy.

BALLYMAHON; Ballymore.—One death from tuberculosis of lungs, and one death from epithelioma. In the case of tuberculosis the patient, a young man aged 19 years, was in business outside the district. Pneumonia and bronchitis prevalent in the district.

MULLINGAR; Castletown Geoghegan.—Two of the children whose deaths were registered died at birth. Owing to the severity of the weather vaccination was postponed. One death of a child was classified under diarrhoeal disease. District in good sanitary condition.

MULLINGAR; Killucan.—The sanitary condition of the district is fairly satisfactory. There is no typhus, enteric fever, scarlatina, diphtheria, measles, or small-pox. Whooping-cough is prevalent in the district, and is of a severe nature.

MULLINGAR; Milltown.—A severe epidemic of "Russian gripe" with chest complications—bronchitis and pneumonia—occurred during the quarter, and attacked old and young alike. Consequent on this epidemic, vaccination is very backward. Looked at from the point of view of the numerous sanitary reports, one would think the district is in an unsanitary condition. This is not the case. These reports and the increased vigilance of the sanitary officers, are intended to emancipate householders, farmers, and labourers from that old-fashioned indifference to fresh air and cleanliness, two items the neglect of which are the strongest, perhaps, amongst us in the production of fever and tuberculosis. No deaths from cancer.

MULLINGAR; Mullingar, W.—Health of district fairly good.

MULLINGAR; Mulhyfarnham.—The reason so many deaths have been uncertified is that all persons, except two, were 85 years and over.

Wexford County.

ENNISCORTHY; Newtownbarry.—On account of the severe winter there were no vaccinations.

GOREY; Camolin.—The district is in a good sanitary condition. Vaccinations postponed owing to inclement weather.

NEW ROSS; Fethard, No. 1.—The sanitary condition of the district is in a fairly satisfactory condition. No epidemic disease during the quarter. Vaccination backward.

NEW ROSS; Fethard, No. 2.—District very healthy.

WEXFORD; Bannow.—No vaccinations during quarter. Postponed owing to inclemency of weather, prevalence of measles, &c. There was an epidemic of pneumonia in the Ballymitty division of district—ten cases within radius of two miles. All recovered, except one man, at 78 years. Measles and bronchitis have been prevalent.

WEXFORD; Bridgetown.—Vaccination postponed in consequence of the prevalence of measles in the district.

WEXFORD; Broadway.—Measles very prevalent during quarter; six deaths registered under one year.

WEXFORD; Taghmon and Glynn.—None of the children were brought for vaccination during the quarter.

Wicklow County.

BALTINGLASS; Baltinglass, No. 1, W.—All vaccinations postponed in consequence of the prevalence of whooping-cough. The death of one woman, aged 114, took place in Baltinglass Workhouse.

BALTINGLASS; Dunlavin.—No infectious cases during quarter.

BALTINGLASS; Killegan.—One case of death was that of a person 22 years old who had undergone hospital treatment in Dublin for malformation of covering of brain. All the others were very old people, 70 years or over, five of them in receipt of old age pensions. The case of accidental death was that of a man 95 years old, who died from effects of fracturing his femur when getting out of bed.

NAAS; Blessington.—Health of the district very good. No cases of infectious disease.

RATHDOWN; Bray, No. 1.—Births and deaths about the average.

RATHDOWN; Delgany.—The health of the district has been good.

RATHDRUM; Annamoe.—District healthy during the quarter.

RATHDRUM; Arklow.—There were many cases of measles in district during the quarter, but it was not a severe form of the disease. However, it prevented many children from being brought for vaccination.

RATHDRUM; Aughrim.—Health of district satisfactory.

RATHDRUM; Newcastle.—General health of district good, but during past three months bronchial catarrh and a mild form of influenza were very prevalent. Probably this is accounted for by the exceptionally bad weather that prevailed recently. These conditions have also affected the attendance of children for vaccination. Some of the drains in Newtown are choked up, and have been reported on. Suitable dwellings for the poor and labouring classes are most urgently required.

II.—PROVINCE OF MUNSTER.

Clare County.

CORROFIN; Corrofin, W.—Influenza prevalent during quarter.

ENNIS; Crusheen.—Health of the district good.

ENNIS; Newmarket.—The general health of the district during the quarter has been satisfactory. A mild form of measles prevailed throughout the district. The various National schools were temporarily closed.

ENNISTIMON; Ennistimon, W.—Vaccination very slow. The sanitary arrangements are satisfactory.

ENNISTIMON; Roadford.—District free from any contagious disease. Sanitary arrangements satisfactory.

KILLADYSERT; Ballynacally, W.—A mild form of measles prevails in part of the district.

KILRUSH; Carrigaholt.—Health of district very good. Death-rate unusually low for quarter, and the average age high. One death registered, that of a woman 101 years old, and two, also women, were 98 years.

KILRUSH; Craggaknock.—One of the deaths registered during quarter was that of an old woman aged 104 years. Influenza was prevalent during quarter. Sanitary state of district good.

KILRUSH; Kilkee.—Sanitary state of district fairly good.

KILRUSH; Kilrush, W.—District has been healthy.

LIMERICK; Bridgetown.—The sanitary condition of the district is satisfactory. No infectious disease in district during the quarter.

LIMERICK; Coolacasey.—There was no case of cancer registered. The district was very healthy, with the exception of an outbreak of measles, which occurred during the quarter.

SCARRIFF; Annacarriga.—Measles prevailed in the district during the quarter. District now healthy.

SCARRIFF; Feakle.—Health of district good.

SCARRIFF; Mountshannon, W.—Three cases of typhus fever at Mountshannon, all recovered. The water in the village pump is bad and condemned; otherwise district is healthy.

TULLA; Quin.—The sanitary arrangements in the district are fairly good. None of the diseases mentioned in the abstracts are prevalent.

Cork County and County Borough.

BANDON; Inishannon.—Influenza was very prevalent during quarter; the district otherwise was free from infectious disease. In one house the influenzal cough attacking the children simulated whooping-cough. The ages of the uncertified deaths were 98, 92, 77, and 73 years. The weather was too bad to allow of children being brought in for vaccination.

BANDON; Kilbrittain.—District very healthy, and in a very good sanitary state. Measles of a very mild form prevalent during the quarter.

BANTRY; Bantry, W.—Health of district very good; no epidemic disease prevailing.

BANTRY; Durrus and Kilcrohane.—Influenza prevalent in a good many cases complicated with pneumonia; had to postpone vaccination of all children owing to heavy colds amongst them and severity of weather. Of the six deaths registered, five were at the following ages:—89, 83, 78, 74, and 65 years. No cases from tuberculous disease registered.

BANTRY; Glengarriff.—Of the six deaths registered during quarter ended, two were aged 85 and one 100 years. District healthy.

BANTRY; Kealkill.—The sanitary condition of district is fairly good. One case of primary cancer of liver.

CASTLETOWN; Castletown, W.—The vaccination has been very small for the last quarter, due to the prevalence of bronchitis, and the very wet and cold weather.

CASTLETOWN; Kilcatherine.—Pertussis prevalent during the quarter, which has much retarded primary vaccination.

CORK; Carrigaline, No. 1.—Some influenza; one case of measles in an infant, contracted from his mother. Vaccination below the average.

CORK; Douglas.—District healthy.

CORK; Dripsey.—Sanitary condition good. Very little vaccination owing to measles and severe weather.

CORK; Riverstown.—Owing to the severity of the weather, vaccinations were postponed in eight cases.

DUNMANWAY; Ballineen.—I did not vaccinate during winter, the weather being too bad, and children having long distances to come. I will have all children over three months vaccinated during the coming quarter.

DUNMANWAY; Coolmountain.—The general health of the district has been most satisfactory for the past quarter. Vaccination, as you will observe, is backward, owing, I am sure, to the severe weather for some months past. The chief failing with regard to sanitation is the collection of manure outside the doors of the dwellinghouses.

DUNMANWAY; Dunmanway, W.—The sanitary condition of the district continues fairly satisfactory. Owing to the inclemency of the weather, vaccination was rather backward during the quarter, and was not insisted on, but notices will be served on defaulters immediately.

FERMOY; Ballynoe.—Measles and whooping-cough prevailed pretty extensively during the quarter, and are the cause of the backward state of vaccination. There were some cases of broncho-pneumonia in young children.

FERMOY; Rathcormack.—Vaccinations very backward, owing to prevalence of pulmonary complaints amongst children, during the quarter.

KANTURK; Milford.—The health of the district is good.

KILMALLOCK; Charleville.—The district is healthy. We had an epidemic of measles during the last quarter.

KINSALE; Ballyfeard.—Health of district fairly good; measles complicated with bronchitis occurred during quarter.

MALLOW; Ballyclogh.—District healthy. Influenzal colds were pretty prevalent during the quarter.

MALLOW; Buttevant.—Influenza prevailed to a large extent during the quarter.

MALLOW; Rahan.—District has been healthy during the past quarter; there were some cases of influenza.

MIDDLETON; Cloyne.—Vaccination postponed in several cases owing to an epidemic of acute bronchitis amongst the children during the quarter.

MIDDLETON; Middleton, No. 2.—The public health has been very good during the quarter. Owing to inclemency of weather, very few children are vaccinated during the quarter.

MILLSTREET; Cullen.—In consequence of the severity of the weather I have postponed vaccination up to date. The death of a woman, aged 101 years, has been registered. I have made inquiry and am satisfied the age is correct. Vaccination has been postponed during quarter.

SKIBBEREEN; Dromdaleague.—Influenza very prevalent.

SKIBBEREEN; Unionhall.—Whooping-cough has been prevalent, and vaccination has been suspended.

SKULL; Goleen.—The district is in a good sanitary condition. A water supply is urgently needed for Goleen village.

Kerry County.

CAHERSIVEEN; Caher, W.—Sanitary condition of district is very unsatisfactory. Owing to inclement state of weather, there were no vaccinations in the quarter.

CAHERSIVEEN; Derrynane.—Health of district good.

CAHERSIVEEN; Emlagh.—Owing to measles being very prevalent in this district, no vaccination has taken place for the past two months.

CAHERSIVEEN; Glanbehy.—There are no deaths from cancer in my district for the quarter now ended. Sanitary arrangements good.

CAHERSIVEEN; Valencia.—The births registered during quarter are over the average. Five of the deaths registered average 73 years each. District very healthy.

DINGLE; Anascaul.—District healthy. Unqualified nurses attend females in labour, and septicæmia, &c., is often the result of this. It should be prohibited by law.

DINGLE; Castlegregory.—There has been no case from cancer.

DINGLE; Dingle, W.—There were a good many cases of bronchial affections for the last three months; otherwise the district has been healthy. There was one death from typhus fever, and six from phthisis.

DINGLE; Ventry.—Sanitary arrangements very defective.

KENMARE; Kilgarvan.—Vaccination had to be postponed in this district owing to whooping-cough.

KILLARNEY; Coom.—Tuberculous disease appears to be on the increase in this district—in fact far more than is known.

KILLARNEY; Killarney, No. 1, W.—No vaccinations during quarter owing to severity of the weather and prevalence of colds amongst children.

KILLARNEY; Killorglin.—Vaccination postponed owing to severe weather. Tuberculous diseases prevalent. Manure kept too close to the houses, and therefore rendering the air in the rooms foul.

LISTOWEL; Ballyhorgan.—Of the twenty-one deaths, thirteen died of old age, which accounts for the large number of uncertified deaths. Of the thirteen, one died at the age of 105, one at 102, one at 95, and one at 93; all four well authenticated. Sanitary state of district good.

LISTOWEL; Ballylongford.—District healthy for quarter. Three cases (deaths) from consumption. Postponed all primary vaccination until summer quarter. Village sewers are needed—frequently reported on.

LISTOWEL; Tarbert.—The water supply at Tarbert has been condemned as being dangerous to the public health.

TRALEE; Brosna, No. 1.—District healthy.

TRALEE; Castlemaine.—District healthy, and free from any infectious disease.

TRALEE; *Kilgobban*.—District healthy. Unqualified nurses should be prohibited from attending females in labour, and notices, same as those in connection with phthisis, should be placed in dispensaries, and all particulars given in relation to cause of septicæmia, &c., &c.

TRALEE; *Tralee*, No. 1, W.—The number of vaccination defaulters is on the increase, as no steps are taken to compel defaulters to comply with the law.

TRALEE; *Tralee*, No. 2.—Vaccinations few, and no steps taken to enforce Act. Sanitary condition of district satisfactory. Four cases of scarlatina, two of diphtheria, and one of typhoid fever have been notified during quarter.

Limerick County and County Borough.

CROOM; *Castletown*.—A most unhealthy quarter. The weather has been extremely variable. Influenza and bronchitis have been prevalent. These circumstances are reflected in the returns, where the number of deaths only wants one of doubling that of births, and where the number of primary vaccinations is small.

KILMALLOCK; *Bruff*.—District healthy; no zymotic disease. Whooping-cough that was prevalent in last quarter, almost disappeared.

KILMALLOCK; *Bruree*.—A severe epidemic of measles of the German type during the quarter; also several cases of whooping-cough; both from measles and whooping-cough, lung complications were numerous. One death from measles, but chiefly from intercurrent pneumonia.

KILMALLOCK; *Hospital*.—District healthy.

KILMALLOCK; *Kilfinnane*.—District healthy, except some cases of whooping-cough, on account of which some cases of vaccination were postponed.

KILMALLOCK; *Kilmallock*, W.—Whooping-cough and epidemic bronchitis very prevalent during quarter, and consequently vaccination could not be performed, except in six cases.

LIMERICK; *Annacotty*.—Sanitary arrangements very fair; district healthy.

LIMERICK; *Caherconlish*.—Some vaccinations were postponed owing to the inclement weather and sickness. Health of district good. Of the deaths registered over 60, one was 80, one 82, and one 85.

LIMERICK; *Limerick*, No. 3.—Scarlatina was prevalent during quarter, but only one death registered from it. Influenza and pneumonia and bronchopneumonia prevalent during past six weeks.

LIMERICK; *Moroe*.—Sanitary condition of district fairly good. Four deaths from tuberculosis; none from cancer registered. Birth-rate exceptionally small during the quarter.

LISTOWEL; *Glin*.—Save and except two cases of pulmonary tuberculosis, the Glin dispensary district was singularly free from infectious disease during the quarter just closed. I may add that influenza, which for years has been a constant but unwelcome visitor at this season of the year, was conspicuous by its absence.

MITCHELSTOWN; *Galbally*.—Owing to the prevalence of bronchial catarrh amongst children, vaccination had to be postponed; otherwise the district is exceptionally healthy.

NEWCASTLE; *Ardagh*.—The sanitary state of the district is pretty fair.

NEWCASTLE; *Broadford*.—The district is in a good sanitary condition, and free from infectious disease.

NEWCASTLE; *Feenagh*.—There is no prevalence of any special disease in the district.

RATHKEALE; *Pallaskenry*.—Scarlatina morbilli, influenza, occurred during winter months; one death from scarlatina.

RATHKEALE; *Rathkeale*, No. 1, W.—The district has been particularly healthy, and free from any infectious disease, with the exception of one case of typhoid for the quarter. The case of fever still alive was evidently due to accumulations of filth and manure heaps—frequently reported on and recurring—in back yards in the town of Rathkeale. Of the thirteen deaths, ten were over 60, eight occurred in the workhouse hospital, and five only in the dispensary district, with a population of about 4,000.

RATHKEALE; *Rathkeale*, No. 2.—My district was free from all contagious diseases during the quarter ended March 31st, 1909.

TIPPERARY; *Grean*.—Ten cases of scarlatina of a mild type occurred during the quarter.

Tipperary County, North Riding.

BORRISOKANE; *Borrisokane*, W.—Owing to the prevalence of whooping-cough and measles, vaccinations have been postponed in the district.

BORRISOKANE; *CloghJordan*.—There was an epidemic of measles and whooping-cough; otherwise district healthy.

BORRISOKANE; *Terryglass*.—District healthy; no epidemic disease.

NENAGH; *Nenagh, W.*—District healthy; two cases of imported scarlatina during quarter.

NENAGH; *Newport.*—Sanitary arrangements fair. District free from disease.

NENAGH; *Portroe.*—District healthy at present. There was an outbreak of measles during the quarter.

NENAGH; *Silvermines.*—Three deaths from pulmonary tuberculosis registered; two contracted the disease in Dublin. Vaccination backward, owing to inclemency of weather.

THURLES; *Moyné.*—District healthy.

THURLES; *Templemore.*—No prevailing disease.

Tipperary County, South Riding.

CALLAN; *Ballingarry.*—Two deaths from tuberculous disease; no deaths from cancer.

CALLAN; *Mullinahone.*—Sanitary condition of district fairly good; no contagious disease prevalent. Of the two deaths from pulmonary tuberculosis, one returned from America with the disease. No case of cancer that I know of in district.

CARRICK-ON-SUIR; *Garrangibbon.*—Owing to the inclemency of the weather, the children were not presented for vaccination.

CASHEL; *Killenaule.*—No contagious disease prevailing in the district, which is in a healthy condition.

CASHEL; *Kilpatrick.*—District healthy.

CLOGHEEN; *Caher.*—No cases of an epidemic character occurred during the past quarter. The district is in a very healthy state.

CLOGHEEN; *Clogheen, W.*—District free from epidemic diseases. Heavy mortality amongst the aged.

CLONMEL; *Kilsheelan, No. 1.*—No zymotic disease. Influenza prevalent.

TIPPERARY; *Emly.*—District healthy.

URLINGFORD; *Kilcooly.*—The sanitary arrangements are good. Influenza was very prevalent amongst young and old, during the quarter.

Waterford County and County Borough

CARRICK-ON-SUIR; *Rathgormuck.*—One case of diphtheria has come under my notice during the quarter; otherwise the health of the district is satisfactory.

CLONMEL; *Ballymacarby.*—Sanitary arrangements fair.

CLONMEL; *Kilsheelan, No. 2.*—No zymotic disease. Influenza prevalent.

DUNGARVAN; *Dungarvan, W.*—Vaccination had to be postponed in some cases owing to the prevalence of whooping-cough in the district.

DUNGARVAN; *Whitechurch.*—Four cases of enteric fever during the quarter.

KILMACHTHOMAS; *Bunmahon.*—A slight outbreak of diphtheria at close of quarter, two patients sent to the infirmary. District otherwise healthy.

LISMORE; *Ballyduff.*—General health of the district very satisfactory.

LISMORE; *Tallow.*—Measles and whooping-cough, both of a mild form, prevailed in this district during the quarter. Vaccination has been entirely suspended during the epidemic.

WATERFORD; *Kilmeadan.*—District healthy.

WATERFORD; *Waterford, Rural, No. 1.*—The health of the district is good. There is no infectious disease. Vaccination is well carried out.

WATERFORD; *Waterford, Urban, No. 1, W.*—The domestic sanitary arrangements in parts of the district are bad. There are many houses having objectionable privies. Domestic scavenging is badly carried out in many parts of the district, domestic refuse being frequently permitted to accumulate in ash-pits and in the precincts of dwellings. The practice of throwing house refuse in the streets at nightfall still continues. The presence of tuberculosis is indicated by the fact that it is the cause of death in about 20 per cent. of all deaths. Vaccination fairly well carried out, considering season.

WATERFORD; *Woodstown.*—The sanitary condition of the district is excellent.

YOUGHAL; *Ardmore.*—Sanitation improving.

III.—PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Crumlin.*—Phthisis pulmonalis is still the prevailing cause of death in this district. Otherwise nothing of note occurred this quarter.

ANTRIM; *Doagh.*—Influenza of a rather severe type is very prevalent in the district at present.

ANTRIM; *Randalstown.*—One case of enteric fever reported. One death registered caused by puerperal fever. Influenza with lung complications prevalent.

ANTRIM; *Templepatrick.*—The sanitary arrangements of the district (with few exceptions) are good.

BALLYMENA; *Ballymena, W.*—Epidemic of measles—four deaths—under unfavourable conditions. Influenza and chest affections numerous.

BALLYMENA; Broughshane.—The district is healthy, and free from zymotic disease.

BALLYMENA; Clogh.—District fairly healthy during the quarter. During last month there has been an outbreak of measles—owing to which I postponed the vaccination of several children—but no deaths for so far. Sanitary arrangements fair.

BALLYMENA; Glenwhirry.—Public health good. Some cases of measles. No other infectious disease.

BALLYMENA; Portglenone.—Health of the district is good. There are no cases of epidemic disease.

BALLYMENA; Toome.—During this quarter there has been an epidemic of (a) measles of a mild type, (b) mumps, (c) pertussis.

BALLYMONEY; Portrush.—District unusually healthy. No epidemic of any kind. Influenza entirely absent.

BELFAST; Belfast, Rural, No. 4.—No epidemics of any kind.

LARNE; Ballycarry.—Sanitation of district fairly good. Mumps and whooping-cough prevalent; low death-rate.

LARNE; Waterfoot.—Sanitary arrangements of the district are excellent.

LISBURN; Dunmurry.—The sanitary condition of the district very good. No epidemic of any kind.

LISBURN; Glenavy.—District still under the influence of sporadic cases of scarlet fever, but isolation, disinfection, and removal to hospital have prevented it becoming epidemic; source unknown. No other zymotic.

LISBURN; Knocknadona.—The sanitary condition of this district fairly good. One death from cancer of the stomach; no family record. One death from phthisis.

LISBURN; Lisburn, W.—One death was caused by cancer, but was admitted into hospital, and the informant was unable to give me any information with regard to the family history.

Armagh County.

ARMAGH; Armagh, W.—Health of district satisfactory.

ARMAGH; Markethill.—The district has been free from epidemic disease, except for one mild case of scarlet fever, which did not spread, and one case of diphtheria, which was removed to hospital.

ARMAGH; Rich Hill.—Owing to the bad weather and also to the prevalence of feverish colds among young children,

vaccination was postponed in a number of cases this quarter. District otherwise healthy.

CASTLEBLAYNEY; Newtownhamilton, No. 1.—No infectious disease.

LURGAN; Lurgan, No. 1, W.—Influenza has been very prevalent during the quarter, attacking young children especially, and giving rise to many cases of bronchitis and broncho-pneumonia.

NEWRY; Mullaghglass.—District healthy.

NEWRY; Poyntz Pass.—No epidemic disease prevalent.

Belfast County Borough.

BELFAST; Belfast, Urban, No. 3.—One death was registered as from "Cerebro-spinal Meningitis," and three deaths as from "Cerebro-spinal Fever."

BELFAST; Belfast, Urban, No. 5.—No outbreak of any infectious diseases occurred in district during past quarter.

BELFAST; Belfast, Urban, No. 9.—Two deaths occurred during the quarter from cerebro-spinal fever.

BELFAST; Belfast, Urban, No. 11.—During the first week of the quarter there was one case of epidemic cerebro-spinal meningitis registered in the district. Pneumonia and chest affections are at present prevalent in the district.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—Measles and whooping-cough have been prevalent amongst the children during the past quarter.

BAILIEBOROUGH; Termon.—District, as far as I am aware, healthy.

CAVAN; Cavan, W.—Three deaths from enteric fever were registered during the quarter.

CAVAN; Killashandra.—Diseases of the respiratory organs prevalent during the quarter. District fairly healthy. Sanitary state improved. A branch of the Women's Health Association has been established here, and the members of its Committee are doing useful and good work in visiting the neighbouring cottages, and explaining to them the value of fresh pure air.

COOTEHILL; Drum, No. 2.—Chest affections were prevalent, and proved severe at the two extremes of age. The sanitary condition of the district is fairly good.

COOTEHILL; Tullyvin.—District healthy.

GRANARD; *Scrabby, No. 1.*—Health of the district fairly good. All deaths which occurred in this district during the quarter, with the exception of one child, were persons 71 years and upwards.

OLDCASTLE; *Ballyjamesduff.*—District healthy. Vaccination backward owing to weather.

Donegal County.

BALLYSHANNON; *Ballintra.*—Sanitary arrangements of district fairly good.

DONEGAL; *Donegal, W.*—District healthy.

DONEGAL; *Dunkineely.*—Several cases of influenza with rheumatic and head symptoms; district generally healthy.

DONEGAL; *Laghy.*—Sanitary condition of the district good. Water supply in two villages insufficient.

DONEGAL; *Mountcharles.*—District fairly healthy. No epidemic. The month of March was very cold and stormy, east and north-east winds prevailing the most of the month, preventing children being brought out to be vaccinated.

DONEGAL; *Pettigoe.*—Sewerage system of one town primitive. Water supply defective.

DUNFANAGHY; *Crossroads.*—The district is free from infectious disease.

DUNFANAGHY; *Gweedore.*—District healthy.

DUNFANAGHY; *Tory Island.*—There was no birth, death, or marriage registered during last quarter. One birth in later end of March which is not registered yet.

GLENTIES; *Ardara.*—District exceptionally healthy.

GLENTIES; *Carriick.*—The district is healthy, with the exception of a few isolated cases of influenza. The severity of the winter prevented vaccination to a great extent.

GLENTIES; *Doocharry.*—District healthy.

GLENTIES; *Dunglow, No. 1.*—Leaving out a child who only lived a few minutes, the average age in the deaths is over 80 years. Two people were over 100 years.

INISHOWEN; *Buncrana.*—Vaccination postponed in a number of cases owing to inclemency of weather.

INISHOWEN; *Carndonagh, W.*—Whooping-cough is very prevalent.

INISHOWEN; *Clonmany.*—Vaccinations postponed owing to an epidemic of whooping-cough, from which cause five deaths were registered.

INISHOWEN; *Malin.*—District free from any zymotic disease. Influenza of a severe type, which is usually accompanied by pneumonia or pleurisy, is prevalent. Whooping-cough, which was present during quarter, is dying out now.

LETTERKENNY; *Church Hill.*—A few cases of enteric fever occurred in one house during quarter—it was confined to one house, and all have recovered.

LONDONDERRY; *Burt.*—Pleurisy more common than usual this winter, several eventually becoming tubercular.

MILLFORD; *Fanad.*—Four cases of diphtheria occurred, all in one house; one child died before I was sent for, another died shortly after my arrival, the others were removed to hospital. There has been no further spread of the disease. There is a good deal of whooping-cough going in the district, but mostly of a mild type.

MILLFORD; *Rathmullan.*—There were three cases of diphtheria during the quarter, with one death. The tuberculosis van visited the district, and was much appreciated, and has aroused the people to the danger of the disease.

STRABANE; *Raphoe.*—Sanitation satisfactory. No zymotic diseases in this district at present.

STRANORLAR; *Cloghan.*—Sanitary arrangements satisfactory. The majority of deaths registered are of an advanced age. A severe type of whooping-cough existed in the district in the early part of quarter; no deaths from same.

STRANORLAR; *Killygordon.*—A ruin used as a school is the most likely place in the whole district for the spread of consumption.

Down County.

BANBRIDGE; *Ballyward.*—Sanitary state of district fairly good. Bronchitis caused twelve deaths. This disease was very fatal to the aged, and was caused, I think, by the very inclement weather.

BANBRIDGE; *Crossgar.*—No case of any notifiable infectious disease during the quarter in the district.

BANBRIDGE; *Loughbrickland.*—The sanitary arrangements in the district are fairly good. Influenza was prevalent during the quarter. There was one case of diphtheria, which recovered.

DOWNPATRICK; *Ballynahinch.*—There have been numerous cases of a mild type of influenza in the district during the quarter.

DOWNPATRICK; *Clough.*—There was no other case of diphtheria in the district, except the one registered.

DOWNPATRICK; *Downpatrick, W.*—Five deaths from influenza.

DOWNPATRICK; *Killyleagh.*—I have registered more deaths than usual from tuberculous disease this quarter. There has been an epidemic of influenza, chiefly among young children.

DOWNPATRICK; *Portaferry.*—Sanitary condition of district good. Influenza very prevalent during quarter.

KILKEEL; *Kilkeel, No. 2, W.*—Health of district good.

KILKEEL; *Rosstrevor.*—The ages of persons who died aged 60 or upwards were 89, 80, 80, 80, and 70. Sanitary condition fairly good.

LISBURN; *Ballylesson.*—There were three deaths from cerebro-spinal fever in Purdysburn Fever Hospital during past quarter.

LISBURN; *Drumbeg.*—Births below average, deaths above the average. About two-thirds of the total number of deaths registered were of persons over 60 years.

LISBURN; *Saintfield.*—The health of district pretty good for this time of year, although a good number of deaths occurred amongst persons of advanced ages.

LURGAN; *Moir.*—The health of the district continued good up to Christmas, but the proverb must come true—"A green Christmas, &c.," *Verb. sap.* Pulmonary diseases have since been rife, accounting for at least seven deaths, and I should not be surprised if the uncertified "senile decay" cases were attributable to the same cause. Seven old age pensioners are included, and two deaths at 95 and 96.

LURGAN; *Waringstown.*—Four cases of diphtheria have occurred in one family—one died, the remainder were sent to hospital. There was another case in a neighbouring townland, but there was no connecting link between the families, and a difference of two months in time. In another household there were six cases of enteric fever, but no death—one (a governess) was removed to hospital. In other respects the district is healthy.

NEWRY; *Donaghmore.*—Sanitary arrangements fair. Many cases of pneumonia complicating influenza—all recovered. Influenzal laryngitis also common—one case fatal.

NEWRY; *Newry, No. 1.*—There are a great number of sanitary improvements required in the urban portion of my district, before it could be called up to date.

NEWRY; *Rathfriland.*—Sanitary condition of the district good.

NEWTOWNARDS; *Bangor.*—Sanitary arrangements excellent. No epidemic. General health good. Vaccination well attended to.

NEWTOWNARDS; *Comber.*—Three deaths over 80 were registered, and seven between 70 and 80, and of the five deaths under one year of age, three were those of children of premature birth, who only lived a few days. Health of district very good. No epidemics, except influenza, which is very prevalent, generally of a mild type. Sanitary arrangements well carried out. Water good; sewers in good order.

NEWTOWNARDS; *Greyabbey.*—Births above, deaths about, average. A considerable amount of sickness in district, measles being present in epidemic form during the quarter in two Divisions, also whooping-cough following after as measles dies out. Influenza present throughout the whole district. Two cases of diphtheria were present in district during quarter now ending, and two cases of scarlatina. Two deaths from measles and one from whooping-cough reported.

NEWTOWNARDS; *Newtownards, W.*—The health of the district has been good. The chief sanitary defect, as I have often said, is the want of a system of sewers through the town. The want of these meets me everywhere as Medical Officer of Health.

Fermanagh County.

BALLYSHANNON; *Church Hill.*—District healthy.

ENNISKILLEN; *Enniskillen, W.*—Sanitation satisfactory.

ENNISKILLEN; *Florencecourt.*—Sanitary condition of district is as usual fairly satisfactory. Vaccination postponed in a great many cases owing to bronchial affections amongst children. One death occurred from cancer.

IRVINESTOWN; *Ederney.*—Vaccinations considerably below the average this quarter. Acute bronchitis very prevalent among children during past two months.

IRVINESTOWN; *Irvinestown, W.*—Of deaths of children under one year, three were uncertified. Disease of respiratory organs prevalent amongst children during quarter.

LISNASKEA; *Derrylin*.—Sanitary condition much as before. Influenza and pneumonia prevalent during the quarter, also a widespread epidemic of measles.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fair. Vaccination postponed owing to chest affections being prevalent among children.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—District healthy.

COLERAINE; *Garvagh*.—Health of district has been good up to the last three weeks, but numerous cases of influenza have appeared during that time.

COLERAINE; *Kilrea*.—District healthy.

COLERAINE; *Portstewart*.—I have nothing unusual to speak about. The health of the community is satisfactory.

LIMAVADY; *Bellarena*.—District fairly healthy. Two cases of faucial diphtheria occurred in the district during quarter ended 31st March.

LIMAVADY; *Dungiven*.—Sanitary condition satisfactory. Birth statistics slightly below average. Deaths above, and principally among the old and very young. Two deaths from phthisis; one had a history of infection, the other not. One death from cancer of tongue and floor of mouth; no heredity could be traced. Two deaths in children due to convulsions, in the one case due to premature dentition, the other not medically attended. A considerable number of cases of influenza, but, however, of a sporadic character.

LIMAVADY; *Limavady, W.*—District very healthy, except for diphtheria, which continued to spread during the whole quarter, principally owing to the facts that the people have lost the fear of the disease, and take no care to avoid contact with patients or their friends.

LONDONDERRY; *Eglinton*.—Influenza very prevalent. One case of measles in R.I.C. barracks—a constable, who came on transfer from Depot in Dublin.

MAGHERAFELT; *Moneymore*.—High death-rate, which occurred mostly among old people, chiefly from bronchitis and congestion of lungs. One case of typhoid fever occurred in January, removed to hospital; no further spread. In February a child suffered from scarlatina, which appeared to have been caused by drinking impure water, isolated; no other case.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—Measles very prevalent during quarter. District in fair sanitary condition.

CARRICKMACROSS; *Donaghmoyne*.—Measles prevalent, and accounts for the death of one child under one year of age.

CARRICKMACROSS; *Raferagh*.—Owing to an outbreak of measles in the district, I refused to vaccinate several children in the latter part of January and the whole of February. The severe weather during March prevented us from pressing them to come in. Due steps will now be taken with all defaulters.

CASTLEBLAYNEY; *Ballybay*.—Postponement of vaccination was general, consequent on the prevalence of influenza and chest affections. Registration was not neglected, and is well up to the average.

CASTLEBLAYNEY; *Newtownhamilton, No. 2*.—No infectious disease.

COOTEHILL; *Dawsonsgrove*.—The sanitary condition of the district is fairly good. Acute pneumonia was very prevalent during the quarter.

COOTEHILL; *Drum, No. 1*.—There were a good many cases of pertussis, pneumonia, broncho-pneumonia, and bronchitis. The prevalence of chest affections lowered my vaccination ratio. The sanitary condition of the district is fairly good.

MONAGHAN; *Castleshane*.—District sanitary. There were two cases of diphtheria, which were reported and proper precautions taken to stop the spread of the disease. There is an epidemic of influenza at present, with severe pulmonary complications.

MONAGHAN; *Emyvale*.—A great number of vaccinations that were in arrears were vaccinated this quarter. People very slow to register deaths and births. No epidemics of any kind. Sanitary arrangements fair.

MONAGHAN; *Kilmore*.—One case of diphtheria, removed to hospital, and recovered. A large number of cases of influenza of bronchial type. A large number of old people have died during the last six weeks. Vaccinations almost all postponed owing to weather and influenza.

MONAGHAN; *Monaghan, W.*—The sanitary condition of this district remains satisfactory. There has been no epidemic of any kind during the quarter ending 31st March, nor are there any special circumstances affecting the public health or vaccination requiring notice.

MONAGHAN; *Scotstown*.—The sanitary arrangements of the district are fairly good; no epidemic of any kind during the quarter. Vaccination good.

Tyrone County.

CASTLEBERG; *Castlederg, W.*—Sanitary state of district satisfactory. No epidemic of any kind.

CASTLEBERG; Drumquin.—The sanitary condition of the district is satisfactory, with no infectious disease of any sort, with the exception of a number of cases of measles, all of a mild type, and no deaths.

CASTLEBERG; Killeter.—State of district healthy. One old man registered at 100 years.

CLOGHER; Aghnacloy.—With the exception of a few mild cases of measles, whooping-cough, and influenza, the district has been free from infectious disease.

CLOGHER; Ballygawley.—One death registered at 103 years, certified and well known to be this age. Vaccination postponed in many cases owing to influenza and inclement weather in March.

CLOGHER; Fivemiletown.—The health of the district was pretty good during the quarter, and the death-rate low for the first quarter of the year. There were a good many cases of mild influenza, but very few with any serious complications.

COOKSTOWN; Cookstown, W.—Diminished vaccination owing to bad weather and an epidemic of diphtheria.

COOKSTOWN; Pomeroy.—Whooping-cough has been prevalent, but is now almost passed away. A few cases of scarlatina. District otherwise healthy.

COOKSTOWN; Stewartstown.—District at present and also during the quarter has been very healthy. Some cases of pneumonia and also of influenza. I am very sorry to say that in this district a number of phthisical persons of the labouring and factory class intermarry, have two or three children, then die, and leave a puny delicate offspring, which it is impossible to rear without a good, wholesome supply of fresh new milk, which it is impossible under present circumstances for the poor to get.

DUNGANNON; Caledon and Ballymagran.—Public health good.

DUNGANNON; Clonavaddy.—Sanitary arrangements fairly good. Influenza and whooping-cough prevalent.

DUNGANNON; Coal Island.—Three cases of diphtheria, all removed to hospital, and recovered, also two cases of erysipelas. Influenza very prevalent during quarter. A mild outbreak of Rôtheln appeared in March.

IRVINESTOWN; Trillick.—There were six, uncertified deaths. Ten deaths registered from old age; one reached the age of 86 years, one 83, one 75, one 74, one 72, one 71, three 70, and one 69. Three deaths from tubercular disease and one from cancer.

OMAGH; Drumquin.—The sanitary arrangements in the district are satisfactory. None of the diseases mentioned in the abstracts or other diseases are at present prevalent. One death registered at 100 years.

OMAGH; Fintona.—The health of the district has in general been good during the past quarter, and, with the exception of one case of croupal diphtheria, free from epidemic disease. We had many cases of catarrhal influenza. The sanitary arrangements are satisfactory.

OMAGH; Omagh, No. 1, W.—Health of district satisfactory. Whooping-cough prevalent, accounting for four deaths in urban district. The urban authority continues to take an interest in the improvement of sanitation. In the rural district many labourers' cottages have never been linewashed. Dairy and Cowsheds Order not enforced. Of uncertified deaths, six were aged from 64 to 90 years, four from 19 days to 3 years.

OMAGH; Omagh, No. 2.—This district has been fairly healthy for the past quarter. There was a slight epidemic of whooping-cough, two deaths registered as having occurred from same.

OMAGH; Sixmiletown.—The district is at present in very good sanitary condition. Whooping-cough was very prevalent during the past quarter, which accounted for seven deaths.

STRABANE; Dunnamanagh.—On account of the severity of the weather during the quarter, there were very few vaccinations.

STRABANE; Newtownstewart.—Tubercular disease, especially of the lungs, is very prevalent here amongst human beings—probably due in the majority of instances to tubercular milk.

STRABANE; Plumb Bridge.—One death registered at 102 years, age being vouched for by his son, who is a clergyman.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; Kiltormer.—No vaccinations owing to bad weather and influenza.

CLIFDEN; Clifden, W.—The sanitary arrangements of the district fairly good. Vaccinations postponed owing to very boisterous weather.

CLIFDEN; Inishbojone.—Sanitary arrangements fairly good. Three cases of accidental drowning.

CLIFDEN; Roundstone, No. 1.—District healthy.

CLIFDEN; Roundstone, No. 2.—Health of the district satisfactory.

GALWAY; *Galway, No. 3 (Arran).*—The health of district is fairly good.

GALWAY; *Moycullen.*—Sanitary state of district is good.

GALWAY; *Oranmore.*—District healthy.

GALWAY; *Spiddle.*—Health of district good.

GALWAY; *Turloughmore.*—There have been several cases of influenza and pneumonia.

GLENNAMADDY; *Glennamaddy, W.*—The deaths of two males aged respectively 75 and 70 from cancer were registered.

GORT; *Gort, W.*—The health of district is good.

LOUGHREA; *Athenry.*—The sanitary condition of the town of Athenry is far from being satisfactory. Some cases of typhoid fever have occurred there, attributable to bad milk and a defective water supply. The water of the existing supply has been condemned by the analyst. Steps are, however, now being taken by the sanitary authority to provide a new water supply, to improve the sewerage system, and to enforce the Dairies, Cowsheds, and Milkshops (Ireland) Order of 1908.

LOUGHREA; *Bullaun.*—Two of the deaths registered were of persons aged 90 and 91 years respectively.

LOUGHREA; *Woodford.*—The "tuberculous" death was a case of pulmonary phthisis.

LOUGHTERARD; *Cloonbur, No. 1.*—Pertussis very prevalent in district. Three persons died, aged 102 years, 95 years, and 94 years. I believe the ages to be perfectly correct. I am in district thirty-six years, and knew those people well.

PORUMNA; *Portumna, No. 1, W.*—I beg to state that the district seems to be in a healthy state, and free from contagious disease.

TUAM; *Headford.*—An epidemic of whooping-cough was prevalent during the quarter.

TUAM; *Tuam, No. 1, W.*—Measles and whooping-cough were prevalent during the quarter.

TUAM; *Tuam, No. 2.*—The vaccination returns are low for the quarter. There has been an epidemic of measles and pertussis during the entire quarter, and it still continues. No deaths so far, except one child (illegitimate). Four deaths from tuberculous disease (16 per cent. of the total number of deaths registered). One death registered aged 100 years.

Leitrim County.

BALLYSHANNON; *Kinlough.*—Out of twenty-three deaths registered, fifteen are over 60 years, five are children under one year. There were two deaths registered from tuberculous disease.

BAWNBOY; *Ballinamore.*—Sanitary state of district good.

CARRICK-ON-SHANNON; *Drumshanbo.*—District in good sanitary condition. At present there is an epidemic of measles, not of a severe type.

CARRICK-ON-SHANNON; *Jamestown, W.*—Vaccinations postponed owing to an epidemic of German measles.

MANORHAMILTON; *Drumahaire.*—There have been twenty-one cases of enteric fever during the quarter.

MANORHAMILTON; *Lurganboy.*—The quarter just ended has been remarkable for the number of deaths of old people, most of whom were in receipt of the pensions. The district has been practically immune from epidemic forms of disease, and is in good sanitary condition.

MOHILL; *Carrigallen.*—The sanitary state of the district is pretty good. A severe epidemic of influenza in its various forms, especially pulmonary, prevailed during most of the quarter, and is still current. Some cases of measles occurred within past ten days. Eight deaths of persons over 60 years occurred. One of these was in his 102nd year, the age being well authenticated.

MOHILL; *Rinn.*—There is an outbreak of measles in the district, and several children died.

Mayo County.

BALLINA; *Ballina, W.*—With the exception of a few mild cases of whooping-cough and some threatened diphtheria, there has been no serious epidemic to report in the districts for the past quarter. The sanitary condition of the urban district might be better. Vaccinations backward during winter months.

BALLINA; *Crossmolina.*—Pneumonia prevalent during quarter. Sanitary condition generally fair. In outlying districts cattle are kept in many dwelling-houses during winter and spring months.

BALLINROBE; *Ballinrobe, W.*—The sanitary condition of the district is fairly good; there were but few cases of infectious diseases during the quarter. The district is now free from them, with the exception of a few children suffering from measles. Parents are slow in getting their children vaccinated.

BALLINROBE; Cappaghduff.—Sanitary arrangements bad. White-washing and removal of manure required.

BALLINROBE; Cong.—Whooping-cough was prevalent, and a few cases of typhoid fever occurred during the quarter.

BALLINROBE; Hollymount.—Births under, and deaths quite up to, the average. Very few primary vaccinations owing to catarrhal affections in young children being prevalent, and unfavourable weather. Some cases of influenza have occurred during the quarter, and some cases of pneumonia; otherwise the general health of the people of this district was good.

BELMULLET; Binghamstown, W.—District in a satisfactory state. No vaccination performed during the quarter.

BELMULLET; Knocknallow.—In the district during the past quarter there have been epidemics of typhoid, typhus, and whooping-cough. They are well under control at present, and it is hoped that further contagion and infection will be prevented.

CASTLEBAR; Balla.—District healthy. Vaccination backward owing to the inclemency of the weather.

CASTLEBAR; Castlebar, No. 1, W.—In January and February, health of district was particularly good. Influenza of a very depressing type prevailed during March. The Vaccination Act was not satisfactorily complied with, due to inclement weather and spring working preparations.

CASTLEBAR; Castlebar, No. 2.—The district is in a healthy condition, and free from all infectious diseases. Sanitary arrangements fairly satisfactory.

CLAREMORRIS; Ballyhaunis.—Health of the district during the quarter has been good. No zymotics. Of the deaths registered, five ranged between 82 and 92 years. Sanitation progressive.

KILLALA; Killala, W.—The sanitary arrangements in the district are not satisfactory. Most of the small farmers still keep pigs and cattle in their dwellings in the same apartment with the family.

SWINEFORD; Foxford.—Owing to the prevalence of measles and whooping-cough, with complications of bronchitis and broncho-pneumonia, no vaccination was performed. Six cases of enteric fever have occurred during the last week in March. They were duly notified.

SWINEFORD; Kiltamagh.—Had thirty-six cases of enteric fever here. No deaths. Pulmonary tuberculosis very common. People are beginning to

recognize the dangers of infection, and appreciate benefits of fresh air. Curtained beds still too common, however. Knowing my antipathy to those "death traps," patients' people will sometimes remove the curtains when the "doctor" is expected, only to replace them on my departure. Fortunately, more sensible ideas are beginning to prevail.

WESTPORT; Achill.—Sanitary state fair; much improved past month. General health of district good, and no epidemic present. A great many outstanding cases of vaccination, as it is with great difficulty that they can be got to be presented.

WESTPORT; Ballycroy.—Mortality high amongst old people. Influenza very prevalent, but of a rather mild variety. A few cases of pertussis. No vaccinations owing to cold weather.

WESTPORT; Islandeady.—The vaccination returns were not up to the standard last quarter owing to the inclemency of the weather. Otherwise the condition of the district is good. No infectious diseases during last quarter.

WESTPORT; Newport.—Sanitary condition fair. Vaccination backward. There was a severe epidemic of influenza during the winter, followed in nine cases by pneumonia.

Roscommon County.

ATHLONE; Brideswell.—Owing to the inclemency of the weather, vaccination so far was impossible, except in a few cases.

ATHLONE; Kiltoom.—Sanitary condition of district considerably improved. Some cases of measles occurred latterly.

ROSCOMMON; Boyle, No. 1, W.—Influenza and measles have been prevalent during the past quarter.

BOYLE; Keadew.—Outbreak of diphtheria during this quarter.

CARRICK-ON-SHANNON; Aughrim.—The health of the district during the quarter was fairly good.

CASTLEREAGH; Castlereagh, W.—No vaccinations during quarter, due to measles and the inclemency of the weather.

CASTLEREAGH; Frenchpark.—Vaccination postponed owing to severe weather and measles. Sanitary arrangements and sewerage not satisfactory.

ROSCOMMON; *Roscommon, W.*—Whooping-cough prevalent in a portion of district. Amongst the "uncertified deaths" are two cases of tuberculosis, attended by a doctor, but not for a year previous to death.

STROKESTOWN; *Strokestown, W.*—There are several children in the district suffering from whooping-cough.

Sligo County.

BOYLE; *Gurteen.*—Epidemic of mumps during past quarter. District now healthy. Sanitation improving.

DROMORE WEST; *Castleconor.*—The sanitary state of affairs is better than any of the surrounding districts.

DROMORE WEST; *Easky, W.*—Health of district good. Only one case of enteric during quarter, and in that case the child was sent home sick from a convent in another county. A death at 104 years was registered during quarter.

DROMORE WEST; *Skreen.*—Owing to bad weather we have had no vaccinations. Phthisis is prevalent in the district, and in a few instances directly communicated.

SLIGO; *Ballymote.*—Mumps and whooping-cough have been very prevalent in the district during the last quarter. There were, however, no deaths from either.

SLIGO; *Carney, No. 1.*—Measles and influenza were very prevalent in the district during the last three months, but there are very few cases at present, and the health of the district on the whole is good.

SLIGO; *Carney, No. 2.*—Sanitary condition of district fairly good.

SLIGO; *Riverstown.*—Two cases of diphtheria during quarter. District healthy.

TOBERCURREY; *Aclare.*—The district continues healthy.

TOBERCURREY; *Coolaney.*—Sanitary arrangements good. No vaccinations for past quarter.

Marriages:—JAN., FEB., MAR., 1909. **Births & Deaths:**—APR., MAY., JUNE., 1909.

During the quarter ended 30th June last, there were registered in the 826 Registrars' Districts in Ireland 26,994 births—a number equal to an annual birth-rate of 24·7 in every 1,000 of the estimated population*—and 19,727 deaths, representing an annual rate of 18·0 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 13,251 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 26·5 in every 1,000 of the estimated population, and the death-rate 14·0 per 1,000.

The birth-rate in Ireland for the quarter is 0·4 above the average rate for the corresponding quarter of the ten years 1899–1908, and 0·4 above the rate for the second quarter of 1908. The deaths are 256 under those registered in the corresponding quarter of 1908; the death-rate is 0·3 under the rate for that quarter, and 0·6 under the average for the second quarter of the ten years 1899–1908.

Compared with those for the corresponding quarter of 1908, the returns of pauperism, furnished by the Local Government Board, show a decrease

* See page 184.

of 2,427 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 1,392 (a) in the average number of persons on out-door relief.

Compared with the averages for the second quarter of the ten years 1899-1908, the number of Workhouse inmates shows a decrease of 780 and the number of persons on out-door relief shows a decrease of 1,514 (a), the total under both heads being 2·3 per cent. under the average for the second quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 1·1 per cent.

The annual marriage-rate (6·2 per 1,000 of the population) represented by the marriages registered during the first quarter of 1909 is equal to the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of **Marriages** registered during the Quarter ended 31st March, 1909, and by the **Births** and **Deaths** registered in the Quarter ended 30th June, 1909.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry county and county borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (") page 123.

MARRIAGES.

The marriages (6,794) registered in Ireland during the first quarter of 1909 are equivalent to an annual rate of 6·2 per 1,000 of the estimated population, being 0·4 below the rate for the corresponding quarter of 1908, but equal to the average rate for the first quarter of the ten years 1899–1908. Of the total number of marriages 5,465 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,329 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 6·7 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 4·7 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·1 above, but that under the latter is 0·2 below the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by **Quarterly Periods** the **Marriages** registered in Ireland in each of the ten years 1899–1908, and the average number for that period; also the number registered in the first quarter of 1909.

BIRTHS.

The number of births registered during the quarter ended 30th June last was 26,994—13,870 boys and 13,124 girls—being equal to an annual ratio of 1 in every 40·5, or 24·7 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1899–1908 was 26,808, equivalent to an annual rate of 24·3 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 25·4 per 1,000 of the population according to the Census of 1901; Munster, 23·5; Ulster, 25·3; and Connaught, 20·6.

The highest county or county borough birth-rate* is 33·6 for Dublin county borough, and the lowest 17·5 for King's county. Of the intermediate rates the highest five are—Belfast county borough, 29·8; Kildare, 27·9; Limerick county and county borough, 26·1; Antrim county, 25·7; and Kerry county, 25·0. The lowest five are—Roscommon, 18·4; Carlow, 19·0; Tipperary, N.R., 19·3; Longford, 19·4; and Leitrim, 20·1.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th June last was 19,727—9,830 males and 9,897 females—affording an annual ratio of 1 in every 55·4, or 18·0 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1899–1908 was 18·6 per 1,000.

The death-rate in Leinster was 19·2 per 1,000 of the population according to the Census of 1901; in Munster, 16·3; in Ulster, 18·8; and in Connaught, 14·7.

The county or county borough death-rates* range from 13·4 in King's county to 23·3 in Dublin county borough. Between these rates the lowest five are—Leitrim, 13·5; Kerry, 13·6; Sligo, 14·2; Clare, 14·3; and Roscommon, 14·5; and the highest five are—Armagh, 21·1; Belfast county borough, 19·8; Longford, 19·7; Kilkenny, 19·1; and Londonderry county and county borough, 19·0.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1899–1908, and the average number for that period; also the number registered during the first and second quarters of the year 1909:—

* See note (a) on page 102.

Ages.—Of the 19,727 deaths registered last quarter, 2,255, or 11·4 per cent., were of infants under 1 year of age; and 8,991, or 45·6 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 83·5 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 12·8 per cent. of the total deaths registered therein; in Munster, 10·8 per cent.; in Ulster, 11·5 per cent.; and in Connaught, 9·1 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 41·5 per cent.; in Munster, to 46·0 per cent.; in Ulster, to 45·2 per cent.; and in Connaught, to 55·5 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 805, or 33 below the number registered in the corresponding quarter of 1908, and is equivalent to an annual rate of 0·74 per 1,000 living, being 0·03 below the rate for the second quarter of 1908, and 0·03 below the average rate for the second quarter of the ten years 1899–1908. The following tabular statement shows the mortality from each of the principal epidemic diseases, as registered during the June quarter of 1909, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years 1904–1908.

Name of Disease.	Number of Deaths in June quarter, 1909.	Average number of Deaths in June quarter of the 5 years, 1904–1908.
Small-pox,	—	1
Measles,	109	167
Scarlet Fever,	40	27
Typhus,	13	19
Whooping-cough,	351	273
Diphtheria,	71	64
<i>Pyrexia</i> (origin uncertain),	7	12
Enteric Fever,	76	88
Diarrhœal Diseases,	138	163

Small-pox.—There was not one death from small-pox recorded during the period under notice; nor was there a case of the disease reported by any of the Registrars in their quarterly returns.

Measles.—The deaths from measles, in the whole of Ireland, which were registered during the quarter, numbered 109; this figure represents an annual rate of 0·10 per 1,000 of the population of Ireland estimated to the middle of the year 1909. The deaths were below the average (167) for the corresponding quarter of the preceding five years. In each of the three preceding quarters, deaths from measles were 149, 140, and 160. Of the total deaths, 25 belonged to Dublin county borough, and in Ballymena urban district 8 deaths from measles were reported.

Scarlet Fever.—In the three quarterly periods preceding that under notice—during which 40 deaths were registered—deaths from scarlet fever were, respectively, 19, 27, and 32, the average being 27 for the corresponding quarter of the past five years. The deaths correspond to a rate of 0·04 per 1,000 of the estimated

* See note (†) on page 111.

population. A reference to Abstract III. will give the various districts in which the deaths from scarlet fever were registered. Among other districts there were 5 deaths in Cork rural, No. 1; 2 in Donnybrook; 2 in Rathmines and Rathgar; and 4 in the district of Lurgan No. 1.

Typhus.—Compared with the average 19, the number of deaths from typhus (13) shows a decrease of 6. In the three quarters preceding, such deaths were 10, 6, and 15. The deaths in the period under notice were registered in the following unions or Superintendent Registrars' districts:—One death in each of Ballina, Belmullet, Carrickmacross, Cavan, South Dublin, Galway, Longford, New Ross, Oughterard, and Tralee, and three deaths in Cork union.

Whooping-cough.—The deaths from this disease amounted to 351, and represent an annual rate of 0·32 per 1,000 of the estimated population; the deaths exceed the quarterly average (273) by 78. Deaths from whooping-cough in each of the three preceding quarters were 162, 156, and 272. Of the total deaths, over one-third were registered in the county boroughs of Dublin and Belfast, 66 in the former and 55 in the latter city; and in the city of Cork 33 deaths were registered. Deaths from whooping-cough occurred in the following Registrars' districts amongst others:—in Armagh, 8 deaths, in Ballina 6, in Knocknalower 5, in Tanderagee 9, in Callan 10, in Ballymacarby 4, in Donnybrook 4, in Maynooth 7, in Maghera 6, in Bellaghy 4, in Milltown 4, in Sixmilecross 4, and in Cloonbur No. 1, 5 deaths.

Diphtheria.—The deaths from diphtheria numbering 71, are 7 above the average for the corresponding quarter of the ten years preceding, the number in each of the three preceding quarters being 62, 113, and 115 respectively. The 71 deaths registered for the whole of Ireland represent an annual rate of 0·06 per 1,000 of the estimated population. Of the total deaths, 35 appertained to the rural districts and 36 to the urban districts (see table V.). There were 5 deaths from diphtheria in each of Dublin, Belfast, and Cork, and 2 in Limerick county borough included in the 36 urban deaths.

Enteric Fever.—In the third or September quarter of 1908, deaths from enteric fever numbered 92, they rose to 103 in December quarter, declining to 81 in March quarter of the present year, and further to 76 in the period under notice; this latter figure is 12 below the average for the corresponding quarterly period of the five years preceding. The rate represented by deaths from enteric fever was 0·07 per 1,000 of the estimated population. As will be seen in Table V., of the total deaths, 15 appertained to the Dublin Registration Area; of these 12 belonged to the city of Dublin. There were 3 deaths belonging to Cork county borough, one to each of the county boroughs of Belfast and Londonderry, but there was not one death from enteric fever in Waterford county borough.

The deaths of 7 persons were attributed to pyrexia (origin uncertain).

Diarrhoeal Diseases.—In the aggregate, deaths from diarrhoeal diseases were 138 in number; this number represents an annual rate of 0·13 per 1,000 of the estimated population; in the three preceding quarterly periods such deaths numbered 648, 284, and 167 respectively. Of the deaths, 29 appertained to Belfast county

borough, 20 to Dublin city, and 5 to the urban district of Wexford.

Tuberculous Disease.—The number of deaths from tuberculous disease in all its forms, returned by the Registrars of deaths for the June quarter, was 2,949 (unrevised figures), representing an annual death rate for the whole of Ireland of 2·69 per 1,000 of the population estimated to the 30th June of the present year. In the June quarter of 1908, the rate representing the deaths occurring therein was 2·78 per 1,000. I have extracted from the notes which have been so courteously forwarded to me by the Registrars those which appear to have a special bearing on the questions relating to the existence of tuberculous disease and improvements in sanitation of the country. These are as follow:—

Thomastown, Inistioge.—“One death from pulmonary tuberculosis occurred, but happily this disease is rather rare in this district—although I believe it was pretty rife at one time.”

Edenderry, Rathangan, No. 2.—“A death registered, a child 6 years, from tuberculous meningitis. She had been rather delicate; her father brought her from New York, where she was born. She was but a short time here when she fell a victim to the disease.”

Mullingar, Ballynacarrigy.—“Tuberculosis accounts for 4 deaths, 2 of which were young adults, and one over 70, and one 4½ years; all males. This rate is 33½ per cent., or ⅓ of deaths attributable to all causes together.”

Mullingar, Milltown. “The young woman in the twenties who died in a decline contracted the disease in a situation in Dublin; the other members of her family are perfectly healthy.”

Ennistimon, Roadford.—“Sanitary arrangements good. Houses kept much cleaner and limewashed. District very healthy.”

Cork, Blarney.—“The patient who died of phthisis only returned from America (U.S.) a short time before. He was then in an advanced stage of the disease.”

Skull, Skull.—“No death from tuberculous disease, which appears to be very much on the decline in the district.”

Cahersiveen, Darrynane.—“During the quarter just ended I have registered the deaths of five persons from pulmonary tuberculosis—a terrible mortality within a small area from a truly preventable disease. I only hope that our local sanitary authority may be induced to adopt the provisions of the Tuberculosis Prevention Act, and thus materially assist to cope with its ravages.”

Killarney, Coom.—“I consider tuberculosis to be making considerable headway. Many conceal it as best they can in order that the family may not suffer from matrimonial connexions.”

Tralee, Tralee, No. 1.—“A very large number of deaths were certified as due to pulmonary tuberculosis.”

Urlingford, Kilcooly.—“Sanitary arrangements are good. I notice a great improvement in the health of the poor people (both young and old) who have got new cottages.”

Waterford, Waterford Urban, No. 1, W.—“The district has been free from infectious disease, with the exception of tuberculosis, which has had a very high mortality rate—38 deaths from tuberculosis out of 109 deaths registered.”

Youghal, Ardmore.—“Tuberculosis prevalent in badly-ventilated houses in the district.”

Ballymoney, Dirraw.—“Inhabitants improving ventilation in dwellings. Some of the poorer people still require improvements in matters of cleansing houses and proper cooking of food, more especially for growing children.”

Cavan, Killashandra.—“The local branch of the Women’s National Health Association has applied by deputation to the Rural District Council for a shelter for tuberculosis patients, which it will consider the advisability of granting or not.”

Glenties, Carrick.—“Pulmonary tuberculosis is still fairly prevalent, and the people do not as yet seem to recognise the importance of ventilation.”

Downpatrick, Killyleagh.—“Labourers’ cottages are being quickly built all over the district, which, it is hoped, will cause the present wretched hovels that do duty for cottages to be demolished. The water supply is not of the best quality, but it is the best that can be procured.”

Omagh, Sixmilecross.—“The houses in the district are much better ventilated and kept cleaner during the past quarter, due to sanitary lectures which have been given in the district; still there is great room for improvement as regards cleanliness, fresh air, &c.”

Ballina, Ballina, W.—“Sixteen deaths are registered from all forms of tuberculosis. A branch of the Women’s National Health Association has been formed in town, which will, no doubt, have good results.”

Malignant Disease—The deaths include those from carcinoma, sarcoma, and cancer, malignant disease (undefined); according to the returns such deaths were 755 in number for the period under review, and equal to an annual rate of 0·69 per 1,000 of the estimated population of the country. The corresponding rates in each of the three preceding quarters were 0·67, 0·72, and 0·78, and in the June quarter of 1908 the rate was 0·66 per 1,000.

Cerebro-spinal Fever.—The following information was furnished regarding cerebro-spinal fever:—

Belfast, Belfast Urban, No. 3.—“One death was registered as cerebro-spinal fever.”

Belfast, Belfast Urban, No. 9.—“No cases of cerebro-spinal fever occurred during this quarter.”

Belfast, Belfast Urban, No. 11.—“There has been one death from epidemic cerebro-spinal meningitis registered in the district during the quarter.”

Lisburn, Ballylesson.—“There was one death from cerebro-spinal fever in Purdysburn Fever Hospital during past quarter.”

Gort, Gort.—“A case certified as epidemic cerebro-spinal meningitis occurred during the quarter, and proved fatal. There was no spread of the disease.”

Rabies, Hydrophobia.—There were references to dog bites by each of the Registrars of Drogheda No. 2 and Kiltegan (as follow), but no case of rabies was reported.

Drogheda, Drogheda, No. 2.—“I have had many cases of persons suffering from dog bites, but the dogs were not supposed to have been affected by rabies.”

Baltinglass, Kiltegan.—“A man in this village was bitten by a dog—which was not suffering from rabies—without any serious effects.”

Violence.—The deaths of 303 persons were attributed to violence; this figure includes deaths by accident, by suicide, and by homicide.

The Registrars, in their Notes, report the presence of the following diseases:—Measles in 33 districts, German measles in 4, scarlet fever in 15, whooping-cough in 27, diphtheria in 16, fever in 21—typhus in 3, enteric in 17, and pyrexia (origin uncertain) in one—influenza in 21, and cerebro-spinal fever or cerebro-spinal meningitis in 4 districts. [See Appendix to this Report commencing on page 185.]

Inquests.—There were 446 inquests reported to the Registrars during the quarter; this number being equal to 1 in every 44 of the total deaths registered.

In Leinster there was 1 inquest to every 43 deaths registered, in Munster 1 to 61, in Ulster 1 to 35, and in Connaught 1 to 70.

Deaths in Public Institutions.—Of the 19,727 deaths registered, 4,090, or 20·7 per cent., occurred in public institutions. In Leinster the percentage was 28·9, in Munster 24·6, in Ulster 15·5, and in Connaught 10·9.

Uncertified Deaths.—According to the returns, 4,667 of the total 19,727 deaths which were registered during the quarter were uncertified, being nearly 24 per cent. of the total.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th June, 1909. and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										Percentage of Total Deaths.	Number in every 100,000 of the Population.

* Formerly described as “Simple Continued Fever.”

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 20·4, and the birth-rate 29·9 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the death-rate was 16·5 and the birth-rate 21·7 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 1·1 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the SECOND QUARTER of the year 1909, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES;‡ from all forms of TUBERCULOSIS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 3rd July, 1909.

† Small-pox, measles, scarlet fever, typhus, whooping-cough, diphtheria, *pyrexia* (origin uncertain), enteric fever, and diarrhoeal diseases.

‡ The rates for the districts in the Dublin Registration Area and for Belfast and Londonderry have been calculated on the population estimated to the middle of 1909.

§ Formerly described as "Simple Continued Fever."

(r) Including 6 deaths from cerebro-spinal fever.

[illegible]

† See note (†), page 111.

(c) Including the death of one person from diphtheria, one from cerebro-spinal fever, and one from tuberculous meningitis admitted to the City of Belfast to the hospital for infectious diseases at Purdy'sburn, in the Registrar's District of Ballyvallon, and Union of Lisburn. The total number of deaths from cerebro-spinal fever or *cerebro-spinal meningitis* appertaining to the City of Belfast was 5. (b) Including the death of a person admitted to Armagh Union Infirmary from the Ur-ran District of Armagh on the 15th December, 1908. This death took place on the 24th April, 1909, and was returned in the Weekly Report as being caused by diphtheria.

VACCINATION.

According to the Returns of Primary Vaccinations received for the second quarter of the year 1909, there were 27,800 persons successfully vaccinated.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th June last was 13,251 (6,921 males and 6,330 females), being 3,196 more than in the corresponding quarter of the year 1908, but 3,448 below the average number for the second quarter of the ten years 1899-1908.

TABLE VI.—EMIGRATION from IRELAND during the months of April, May, and June in 1908 and 1909 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1908.	1909.	Increase.	Decrease.	1908.	1909.	Increase.	Decrease.	1908.	1909.	Increase.	Decrease.

May,	1,804	2,416	612	-	2,424	2,156	-	268	4,228	4,572	344	-
June,	801	1,159	358	-	863	962	99	-	1,664	2,121	457	-
Total,	4,410	6,921	2,511	-	5,645	6,330	685	-	10,055	13,251	3,196	-

* Including 10,802 emigrants to the United States of America, viz.:—5,602 in the month of April, 3,650 in May, and 1,550 in June. Of 10,185 steerage passengers, 3,908 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6*d.*, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the second quarter of the year 1908 the average price was 6*d.*, and in the corresponding quarter of 1899 it was 5*d.*

The average price of oatmeal (1st quality) in Dublin for the quarter was 14*s.* 11*d.* per cwt. For the corresponding quarter of the year 1908 the average price was 15*s.*, and for the second quarter of 1899 the average price was 13*s.* 9*d.* per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 3*s.* 2*d.* to 4*s.* In the second quarter of 1908 the average prices were 4*s.* 2*d.* to 4*s.* 10*d.*, and the prices for the corresponding quarter of 1899 were 2*s.* 10*d.* to 4*s.* 8*d.*

The average prices of beef at the Dublin Cattle Market during the quarter were from 56*s.* 6*d.* to 61*s.* per cwt. In the corresponding quarter of 1908 the average prices were from 52*s.* 6*d.* to 58*s.* 6*d.*, and in the second quarter of 1899 they were from 51*s.* 6*d.* to 60*s.*

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 22*s.* to 20*s.* per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was £85⁷/₁₆, and the lowest £83³/₄.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter, which had been raised on the 14th January to 4 per cent., was lowered on the 1st April to 3¹/₂ per cent., at which it remained to the end of the quarter.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the second quarter of 1909 was 42,342, or 2,427 below the average for the corresponding period in 1908.

The average weekly number of persons receiving out-door relief during the quarter was 56,246* being 1,392 below the average for the second quarter of 1908.

Of the persons receiving in-door relief during the second quarter of 1909, an average number of 1,598 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1908 the average weekly number was 1,512.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the SECOND QUARTER of the year 1909, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

PERIOD.		Average PRICES OF PROVISIONS.								PAUPERISM.				
		BREAD (4lb. Loaf.)		OATMEAL (Corn Exchange), per Cwt. 1st quality.	POTATOES (at Potato Market) per Cwt.		BEEF (at the Dublin Cattle Market), per Cwt.		NO. OF PERSONS RELIEVED.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,† Phoenix Park, Dublin, during the second quarter of the years 1904–1909, respectively,

* See note (a) on page 102.

† Latitude 53° 21' 48" 25" north; longitude 6° 20' 59" 15" west. Height above the sea 155·3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 118).

The mean height of the barometer during the second quarter of 1909 was 29·823 inches, being 0·085 below the average for the corresponding quarter of the five years 1904–1908; the highest reading (30·292 inches) was on the 17th June, at 9 P.M., air calm, and the lowest (29·058 inches) on the 26th May, at 9 A.M., wind S.W.

The mean temperature of the air during the quarter was 49·8°, being 0·3 below the average for the second quarter of the 5 years 1904–1908.

The maximum temperature of the air during the quarter was 72·1° and the minimum 25·9°. The maximum heat in sun was 127·6°.

Rain or snow fell on 45 days during the quarter. The rain-fall measured 6·701 inches, being 0·812 inches above the average for the second quarter of the five years 1904–1908. The greatest monthly rain-fall was in April, when 3·671 inches were registered.

The wind blew on 18 days from S.W., on 15 days from W., on 11 days from E., on 9 days from N.E., on 9 days from N.W., on 8 days from S.E., on 6 days from N., on 6 days from S., and the air was calm on 9 days at 9 A.M.

April.—The mean height of the barometer during this month was 29·728 inches; the highest reading (30·281 inches) was on the 7th at 9 A.M., air calm; and the lowest (29·134 inches) on the 22nd, at 9 P.M., wind S.S.W. The mean temperature of the air was 46·6°, the maximum registered was 68·6°, and the minimum 25·9°. The 10th was the warmest day, and the 8th the coldest night. The mean of the dry bulb was 46·4°, and of the wet bulb 43·8°. The maximum heat in sun was 118·6°, and the minimum on the grass 21·0°. The minimum on the grass was below 32° on 12 nights. The total amount of sunshine recorded was 173·8 hours, the greatest daily amount being 11·7 hours on the 9th. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·5. Rain or snow fell on 21 days. The rain-fall measured 3·671 inches; the greatest amount in 24 hours was 1·300 inches on the 3rd.

May.—The mean height of the barometer during this month was 29·889 inches; the highest reading (30·185 inches) was on the 2nd at 9 A.M., air calm, and the lowest (29·058 inches) on the 26th, at 9 A.M., wind S.W. The mean temperature of the air was 50·2°, the maximum registered was 72·1°, and the minimum 26·7°. The 21st was the warmest day, and the 2nd the coldest night. The mean of the dry bulb was 50·7°, and of the wet bulb 47·5°. The maximum heat in sun was 126·5°, and the minimum on the grass 22·0°. The minimum on the grass was below 32° on 11 nights. The total amount of sunshine recorded was 249·9 hours, the greatest daily amount being 13·8 hours on the 7th, 8th, and 9th. The maximum ozone was 0·8, the minimum 0·3, and the mean 0·5. Rain fell on 12 days. The rain-fall measured 1·123 inches; the greatest amount in 24 hours was 0·355 inch on the 24th.

June.—The mean height of the barometer during this month was 29·853 inches; the highest reading (30·292 inches) was on the 17th at 9 P.M., air calm, and the lowest (29·102 inches) on the 22nd, at 9 P.M., air calm. The mean temperature of the air was 52·7°; the maximum registered was 67·9°, and the minimum 33·3°. The 15th was the warmest day, and the 7th the coldest night. The mean of the dry bulb was 53·4°, and of the wet bulb 50·9°. The maximum heat in sun was 127·6°, and the minimum on the grass 30·8°. The minimum on the grass was below 32° on one night. The total amount of sunshine recorded was 167·7 hours, the greatest daily amount being 13·5 hours on the 14th and 15th. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·5. Rain fell on 12 days. The rain-fall measured 1·907 inches; the greatest amount in 24 hours was 0·590 inch on the 21st.

* See note (†) on page 116.

† Owing to repairs to Wind Gauge, no record of Wind was taken for the period 9th to 18th, and 28th and 30th of April.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of
W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.*

In compiling the following Table (pp. 120 and 121), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

The stations selected, with the names of the Observers, are as follows:—

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	Meteorological Office.
Blacksod Point,	Do.
Markree Castle,	J. R. Armstrong, for Bryan Cooper, Esq.
Donaghadee,	Meteorological Office.
Armagh, The Observatory, . .	J. L. E. Dreyer, Ph.D.
Belfast, Queen's College, . .	John Wylie, B.A.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Waterford,	J. N. White, Esq.
Birr Castle,	O. Boeddicker, Ph.D., for the Earl of Rosse.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.

NOTES ON THE STATISTICAL TABLES.

Hours of Observation.—The hours of observation are indicated by the type in which the names of the stations are printed. CAPITALS, normal climatological stations, 9 a.m. and 9 p.m.; *ITALIC CAPITALS*, telegraphic reporting normal climatological stations, 7 a.m., 1 p.m., 5 p.m.; Roman, telegraphic reporting stations, 7 a.m., 1 p.m., 5 p.m.; *Italics*, auxiliary climatological stations, 9 a.m. only. At Valencia an additional observation is taken at 3 p.m. The afternoon observations are used in preparing the wind summaries and in computing the number of days of "overcast" or "clear sky." At telegraphic reporting stations (black capitals or Roman type) the results given under "hygrometer" and "cloud" are based on the morning observations only.

Barometer.—The correction for latitude has not been applied. The values are for station level. They are the means of readings at 9 a.m. and 9 p.m., or 7 a.m., 1 p.m., 5 p.m., or 7 a.m., and 6 p.m., as the case may be.

Rainfall.—The amounts are for the 24 hours commencing at the time of morning observation.

Weather Phenomena.—The number of days of Rain, Snow, Hail, Thunderstorm, Fog and Gale, are counted irrespective of the hours at which the phenomena occur. Except in the case of rainfall (see above) the day is the civil day. A day is reckoned as a day of "clear sky," if the average of the estimates of the "amount of cloud" at the hours of observation is less than 2, and as an "overcast" day if the average is greater than 8.

Wind Summaries.—The results given under wind direction, and the number of observations of calms and of fresh or strong wind, are based on the observations at fixed hours. At Valencia and Armagh the wind observations are based on the records of a standard Robinson anemometer (factor 2.2). Velocities of between 13 and 38 miles in the hour have been entered as "fresh or strong winds," velocities of 39 miles in the hour, or above, as gales.

Averages.—The averages used for stations are—Temperature and Rainfall for the 35 years 1871-1905; Bright Sunshine for the 25 years 1881-1905.

District Values.—The district values of temperature, rainfall, and sunshine are computed from the data for the stations included in the Weekly Weather Report of the Meteorological Office. Only a selection of these stations is included in this Report. The average values with which the current district values are compared are for the 25 years, 1881-1905. The district values for "amount of cloud" and for the extremes of temperature and the largest rainfall in a day, are taken from the Monthly Weather Report of the Meteorological Office.

TABLE IX.—*Meteorological Table.*

* Throughout this Return the Unions and Districts have been grouped according to the Administrative Counties as formed under the Local Government (Ireland) Act, 1898.

+ Formerly described as "Simple Continued Fever."

+ Including accidental deaths, homicides, and suicides.

§ The Return for Caledon and Ballymagran District, in Dungannon Union, not having been received in time for press, the number of Births and Deaths registered in the corresponding Quarter of 1908 has been adopted. The number of Births and Deaths returned by the Registrar of this District as having been registered during the Quarter ended 30th June, 1906, is 20 and 23 respectively.

ABSTRACT II.—SUPERINTENDENT REGISTRARS' DISTRICTS OR POOR LAW UNIONS, ARRANGED BY PROVINCES AND COUNTIES.*

COUNTIES AND SUPERINTENDENT REGISTRARS' DISTRICTS.	Area, in Statute Acres.	Popu- lation in 1901.	Deaths.		Births.		Mar- riages. NOTE.—This table has been constructed for the years 1835 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846.—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851.—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871.—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1909.—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—District healthy.

CARLOW; *Bagenalstown*.—During the quarter ended, two deaths were registered from pulmonary tuberculosis and one from carcinoma of stomach; otherwise the district is healthy.

CARLOW; *Clonegall*.—Vaccination is below the average for a summer quarter owing to agitation by Anti-Vaccine League.

CARLOW; *Fennagh and Myshall*.—Fourteen out of the fifteen deaths were registered as over 60 years of age, and eleven of these as over 70.

CARLOW; *Leighlinbridge*.—Health of district good. No zymotic disease prevalent.

Dublin County.

DUBLIN SOUTH; *Crumlin*.—This district is now very healthy and free from any acute infectious disease.

DUBLIN SOUTH; *Tallaght*.—The district is in a healthy condition.

RATHDOWN; *Blackrock and Stillorgan, No. 2*.—District in a healthy condition during quarter.

Kildare County.

BALTINGLASS; *Baltinglass, No. 2*.—Whooping-cough prevalent.

CELBRIDGE; *Celbridge W.*.—Health of the district good.

CELBRIDGE; *Kilcock*.—The three uncertified deaths were the deaths of very old people who had been in very feeble health for a long time previous to their death and who had no recent medical attendance.

CELBRIDGE; *Maynooth*.—Did not vaccinate owing to severe epidemic of whooping-cough.

EDENDERRY; *Carbury*.—District very healthy.

NAAS; *Ballymore Eustace*.—The district is healthy and free from epidemic diseases.

NAAS; *Kildare*.—District healthy.

NAAS; *Naas and Carragh, W.*.—Two cases of enteric fever occurred in the urban district (one fatal); the probable cause bad, old sewers.

NAAS; *Newbridge*.—A severe epidemic of measles is prevalent.

Kilkenny County.

CALLAN; *Callan, W.*.—No cancer. Three deaths from tuberculous disease were registered during the quarter and ten from pertussis and complications.

CALLAN; *Kilmaganny*.—District healthy.

CARRICK-ON-SUIR; *Piltown*.—Sanitary condition of district exceedingly good. District remarkably free from disease, epidemic or otherwise.

CASTLECOMER; *Ballyragget*.—Sanitary arrangements very good. All the principal epidemic diseases absent. General circumstances affecting public health and vaccination very satisfactory.

CASTLECOMER; Castlecomer, W.—A great many fatal cases of pneumonia, owing to the severity of the weather during the last quarter.

KILKENNY; Tiscoffin.—Health of the district very good. Several cases of pneumonia during the months of May and June.

KILKENNY; Tullaroan.—District healthy.

NEW ROSS; Dysartmoon.—The district is in a very healthy state.

THOMASTOWN; Graigue.—The case of tuberculosis was a general glandular infection. Influenza caused three deaths; two directly and one indirectly.

THOMASTOWN; Inistioge.—Health of the district very satisfactory. There are only four vaccination defaulters, and three of those cases have been postponed owing to illness of children. There has been no case of zymotic disease during quarter. One death from pulmonary tuberculosis occurred, but happily this disease is rather rare in this district—although I believe it was pretty rife at one time.

THOMASTOWN; Knocktopher.—District in a very healthy condition.

URLINGFORD; Urlingford, W.—Health of district fairly good. No epidemics.

King's County.

BIRR; Banagher.—The district most healthy; free from all infectious diseases.

BIRR; Frankford.—The general sanitary arrangements in the district satisfactory. No prevalence of disease.

BIRR; Kinnitty.—Three deaths during quarter, aged 74, 75, and 83 years. Two from cancer; other case uncertified.

EDENDERRY; Rathangan, No. 2.—A death registered, a child 6 years, from tuberculous meningitis. She had been rather delicate; her father brought her from New York, where she was born. She was but a short time here when she fell a victim to the disease.

MOUNTMELICK; Clonygowan, No. 2.—District healthy.

ROSCREA; Roscrea No. 2.—District healthy.

ROSCREA; Shinrone.—The sanitary condition of district good.

TULLAMORE; Philipstown.—District healthy.

Longford County.

BALLYMAHON; Abbeyshrule.—Sanitary arrangements fair. Six deaths registered from 70 to 80 years.

BALLYMAHON; Ballymahon, W.—The sanitary condition of the district is satisfactory.

GRANARD; Ballinalee.—The number of vaccinations is small owing to an outbreak of measles; otherwise the district is healthy and free from contagious disease.

GRANARD; Granard, W.—The district is in a good sanitary condition and free from contagious disease. There was one case of diphtheria admitted to workhouse hospital from the rural district. The patient died.

GRANARD; Scrabby No. 2.—Health of the district fairly good, except in one townland where some cases of diphtheria occurred at beginning of the quarter. These cases were promptly dealt with; no recurrence of the disease.

LONGFORD; Drumlish.—Owing to an epidemic of measles during the past three months in the district there were only fourteen vaccinations.

Louth County.

ARDEE; Castlebellingham.—Whooping-cough and measles very prevalent.

ARDEE; Collon, No. 1.—District healthy.

ARDEE; Dunleer.—District healthy

DROGHEDA; Drogheda No. 2.—There was but one uncertified death registered in my district, there being no medical attendant. One death from pulmonary tuberculosis was registered, and three deaths from carcinoma. I have had many cases of persons suffering from dog bites, but the dogs were not supposed to have been affected by rabies.

DROGHEDA; Termonfeckin.—District free from infectious diseases. Sanitary state of district good. Water supply good.

DUNDALK; Barronstown.—The district is now in a satisfactory state; the epidemic of measles is practically at an end. There have been two cases of diphtheria during the quarter; no zymotic disease at present.

DUNDALK; *Dundalk, W.*—There has been a number of cases, within the past two months, of a low form of ill-defined continued fever, running a course somewhat resembling typhoid, but without abdominal symptoms, and giving negative reaction with Widal's test. There were two cases of typhoid; no deaths. General sanitation satisfactory.

Meath County.

ARDEE; *Collon No. 2.*—District very healthy.

ARDEE; *Drumcondra.*—Scarlatina of a mild type present in district.

DROGHEDA; *St. Mary's.*—The sanitary state of the district is good.

DROGHEDA; *Stamullen.*—District healthy.

DUNSHAUGHLIN; *Killeen.*—The sanitary condition is satisfactory.

DUNSHAUGHLIN; *Ratoath, W.*—The sanitary condition of the district is good.

KELLS; *Kilskeer.*—Influenza prevalent during quarter.

KELLS; *Nobber.*—Influenza with prominent gastric symptoms was rampant in the district during the month just ended. It is now on the wane and almost cleared out, so the district is rapidly resuming its normal state of health. The number of deaths, notwithstanding the epidemic of a severe type of measles and subsequent acute influenza (no death from either), is less than that of the corresponding quarters of 1906 and 1907, but one over that of 1908. The numbers are as follow:—1906, 18 deaths; 1907, 16; 1908, 12. Of deaths here recorded 7 ranged from 69 to 85 years. Vaccination very strictly observed.

NAVAN; *Painestown.*—An epidemic of influenza was widespread in the beginning of the quarter. In one portion of the district measles is prevalent, and in another portion whooping-cough has attacked a couple of families.

OLDCASTLE; *Oldcastle, W.*—The district continues in a satisfactory condition.

TRIM; *Athboy.*—Sanitary condition of district is very satisfactory and much improved.

TRIM; *Innfield.*—One of the deaths registered was that of a girl aged 22 years. She was very anæmic and gradually became

comatose. As a result of inquiries I found that she constantly smoked between three and four ounces of twist tobacco per week.

TRIM; *Summerhill.*—Of the 15 deaths in the quarter 53 per cent. were over 60 years, and 50 per cent. of those were 80 years and upwards. Two deaths were due to premature birth (twins). Of the remaining five three were cases of pulmonary tuberculosis. Vaccination had to be postponed in many cases owing to an epidemic of measles.

Queen's County.

ABBEYLEIX; *Ballinakill.*—Two women of 84 years and one man aged 75 years died during quarter.

ABBEYLEIX; *Rathdowney.*—The sanitary arrangements of the district are good.

MOUNTMELICK; *Clonygowan No. 1.*—District healthy.

MOUNTMELICK; *Mountmellick, W.*—Sanitary arrangements in a satisfactory condition.

MOUNTMELICK; *Mountrath.*—District healthy.

ROSCREA; *Borris-in-Ossory.*—The health of this district has been fair during the past quarter.

Westmeath County.

ATHLONE; *Glassan.*—District very healthy.

MULLINGAR; *Ballynacarrigy.*—Births registered are below average, and are at the same mark as the deaths. Tuberculosis accounts for four deaths—two of which were young adults and one over 70 and one $4\frac{1}{2}$ years; all males. This rate is $33\frac{1}{2}$ per cent., or one-third of deaths attributable to all causes together.

MULLINGAR; *Castletown Geoghegan.*—The sanitary condition of the district good. One case of diphtheria occurred in the district, but it was removed to hospital.

MULLINGAR; *Killucan.*—Killucan district is in a healthy state. Whooping-cough was prevalent during the quarter, with some deaths from lung trouble.

MULLINGAR; *Milltown.*—The health of the district suffered severely during the quarter from an epidemic of pertussis, with four

deaths, all children. Cases of bronchitis and pneumonia were numerous, and there were two deaths from the last named disease. As a result, as might be expected, vaccination is very backward, and had to be postponed in three-fourths of the children. The young woman in the twenties who died in a decline contracted the disease in a situation in Dublin; the other members of her family are perfectly healthy. There were no deaths from cancer.

MULLINGAR; *Mullingar, W.*—Health of district fairly good.

Wexford County.

ENNISCORTHY; *Enniscorthy, W.*—Anti-vaccinators rampant. Guardians refuse to put the Act in force.

ENNISCORTHY; *Newtownbarry.*—The Anti-Vaccination League is very active in this district, and people will not get their children vaccinated.

GOREY; *Camolin.*—The district is in a good sanitary condition. Large number of defaulters in the district.

NEW ROSS; *Fethard No. 1.*—Sanitary condition of the district satisfactory. Pneumonia prevalent during the quarter.

NEW ROSS; *Fethard No. 2.*—There was an epidemic of whooping-cough in district.

WEXFORD; *Bannow.*—Measles has been prevalent throughout the district for the past two months.

Wicklow County.

BALTINGLASS; *Baltinglass No. 1, W.*—Whooping-cough prevalent.

BALTINGLASS; *Kiltegan.*—Of the 15 deaths, 11 cases were over 60 years, 8 over 70, and 2 over 90. Of the 4 who died under 60 years, one was a child prematurely born, which lived but a few days, another, 20 years old, from sarcoma of lungs; a third, 31 years, from pulmonary phthisis, and the 4th, 50 years, from kidney disease. There is a case of scarlatina in a mountain hamlet not likely to be fatal. A man in this village was bitten by a dog, which was not suffering from rabies, without any serious effects. Vaccination progressing satisfactorily.

NAAS; *Blessington.*—General health and sanitary state of the district good; the district is free from any infectious disease.

RATHDOWN; *Bray, No. 1.*—Births about the average.

RATHDOWN; *Delgany.*—Health of the district good.

RATHDRUM; *Annamoe.*—District healthy during the quarter.

RATHDRUM; *Newcastle.*—Health good. Urgent necessity for proper housing accommodation for the poor and labouring classes still exists. As regards sanitation, etc., of district the same remarks apply as in reports for last three quarterly returns.

II.—PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—The sanitation of the above district is fairly good. There are 80 vaccination defaulters.

CORROFIN; *Corrofin, W.*—Health of district good.

ENNIS; *Crusheen.*—Health of district good. Two cases of diphtheria sent to hospital, and recovered.

ENNIS; *Newmarket.*—The health of the district during the last quarter is generally satisfactory. During the early months measles of a mild type prevailed.

ENNISTIMON; *Ennistimon, W.*—Sanitary arrangements satisfactory.

ENNISTIMON; *Roadford.*—Sanitary arrangements good. Houses kept much cleaner, and limewashed. District very healthy.

KILLADYSERT; *Ballynacally, W.*—The ventilation of the houses in many cases defective.

KILLADYSERT; *Labasheeda.*—Health of district is good.

KILRUSH; *Carrigaholt.*—The health of district continues very good.

KILRUSH; *Craggaknock.*—The district has been very healthy during quarter.

KILRUSH; *Kilkee.*—Sanitary state of district fairly good.

KILRUSH; *Kilrush, W.*—No malignant diseases.

LIMERICK; *Bridgetown.*—The sanitary condition of district is good.

LIMERICK; Coolacasey.—Two cases of tuberculous disease and two cases of cancer registered during the quarter. The sanitary condition of the district is satisfactory.

SCARRIFF; Annacarriga.—One case of enteric during quarter from drinking the canal water.

SCARRIFF; Feakle.—Health of district good.

SCARRIFF; Mountshannon, W.—District very healthy generally. Vaccination slow.

SCARRIFF; Quin.—The sanitary arrangements are fairly good. None of the diseases mentioned in the abstracts are prevalent.

Cork County and County Borough.

BANDON; Inishannon.—District healthy. There were a few cases of measles in this village of the very mildest form, and so far has not spread.

BANDON; Kilbrittain.—District very healthy.

BANTRY; Bantry, W.—Health of district very good.

BANTRY; Durrus and Kilocrohan.—District healthy. No cases of infectious diseases. Scabies very prevalent. Sanitary arrangements fair. No deaths from tuberculous disease.

BANTRY; Glengariff.—District fairly healthy.

BANTRY; Kealkill.—The sanitary condition of district is fairly good. Two cases of death from cancer certified.

CASTLETOWN; Kilcatherine.—District healthy.

CORK; Blarney.—The patient who died of phthisis only returned from America (U.S.), a short time before. He was then in an advanced stage of the disease. The homicidal death was that of the person on whom the inquest was held.

CORK; Carrigaline, No. 1.—The district is healthy. Vaccination defaulters, of whom there are too many, are bringing their children.

CORK; Cork Urban, No. 3.—No prevalence of disease during the quarter.

CORK; Douglas.—No case of cancer.

CORK; Dripsey.—Whooping-cough prevalent for the last three weeks of quarter.

DUNMANWAY; Coolmountain.—During the past quarter there have been no diseases of an infectious character. The sanitary conditions of the district are satisfactory, and there are scarcely any vaccination defaulters.

DUNMANWAY; Dunmanway, W.—The sanitary condition of the district continues fairly good, and vaccination was satisfactory during the quarter. There was no death reported from tuberculous disease. The one death from malignant disease was certified—carcinoma of the liver.

KANTURK; Milford.—The district is healthy.

KILMALLOCK; Charleville.—The district is healthy. We have had an epidemic of measles with whooping-cough.

KINSALE; Ballyfeard.—Health of district good. Measles complicated with bronchitis occurred as an epidemic during quarter; no deaths.

MALLOW; Ballyclogh.—District healthy.

MALLOW; Buttevant.—Sanitary state of district satisfactory. Measles prevalent during latter part of quarter.

MALLOW; Rahan.—District healthy during past quarter. One death registered from enteric fever, one from tuberculosis, and one from malignant disease.

MIDDLETON; Aghada.—The violent death on which an inquest was held was that of a man found dead on the strand. There was no evidence as to how he got into the water.

MIDDLETON; Cloyne.—The sewerage in part of the district is in an unsanitary condition and in its present state a danger to public health.

MITCHELSTOWN; Mitchelstown, No. 1, W.—Vaccination had to be postponed towards the end of the quarter owing to the prevalence of whooping-cough.

SKIBBEREEN; Dromdaleague.—Some mild cases of gastro-intestinal catarrh treated during the quarter ending 30th June, due to a polluted water supply.

SKIBBEREEN; Skibbereen, W.—District in a good sanitary condition.

SKULL; Goleen.—There is no water supply for one village, consequently no sanitary arrangements. This village badly needs a supply of water. Its population is on the increase, and I am positive that some day a severe epidemic will arrive. Why it has not come before is a mystery to me, as the place simply stinks at times.

SKULL; Skull, W.—The district is very healthy and free from contagious disease. No death from tuberculous disease, which appears to be very much on the decline in the district. Of the 16 deaths registered as being 60 years and upwards, six were over 70, four were over 80, and two were over 90. Vaccination is well attended to. The sanitary condition of the district is good.

Kerry County.

CAHERSIVEEN; Caher, W.—Sanitary condition of district is good. Vaccination this quarter is above the average.

CAHERSIVEEN; Darrynane.—During the quarter just ended I have registered the deaths of five persons from pulmonary tuberculosis—a terrible mortality within a small area from a truly preventable disease. I only hope that our local sanitary authority may be induced to adopt the provisions of the Tuberculosis Prevention Act, and thus materially assist to cope with its ravages.

CAHERSIVEEN; Emulgh.—There were no children vaccinated for the past quarter. Measles was prevalent in district. Sanitary condition of district fair.

CAHERSIVEEN; Glanbehy.—No deaths from cancer. Two deaths from tuberculosis. Sanitary state of district good.

CAHERSIVEEN; Tulencia.—District healthy.

DINGLE; Anascaul.—At present the district is healthy. Water used for drinking purposes in Anascaul village has been found on analysis to be of very inferior quality.

DINGLE; Castlegregory.—The district is in a fairly healthy state.

DINGLE; Dingle, W.—The district has been healthy for the last three months. There were a good many cases of Rôtheln, but it was of a very mild type and required no treatment.

DINGLE; Ventry.—District healthy. A few cases of typhus fever since last quarter, but the disease has not spread. No case of fever since last report of temporary Medical Officer of the District. Vaccination still backward.

KENMARE; Kilgarvan.—It is only this week children have been brought for vaccination, and I cannot as yet certify the number of successful cases.

KENMARE; Tuosist.—District in an exceptionally healthy condition.

KILLARNEY; Coom.—I consider tuberculosis to be making considerable headway. Many conceal it as best they can in order that the family may not suffer from matrimonial connections.

KILLARNEY; Killarney, No. 1, W.—Pneumonia very prevalent during April, May, and part of June.

KILLARNEY; Killarney, No. 2.—There were twelve cases of scarlatina in my district. The disease was confined to a small area. The usual precautions were taken, and an outbreak thus prevented.

KILLARNEY; Killorglin.—District healthy.

KILLARNEY; Milltown.—Public health very good. Vaccination going on well; very few defaulters.

LISTOWEL; Ballyhorgan.—No case of cancer. Sanitary state of district good.

LISTOWEL; Ballylongford.—District fairly healthy for quarter. A few cases of enteric fever, which were promptly removed to hospital. Fair number of vaccinations.

LISTOWEL; Listowel, W.—Vaccination postponed owing to appearance of German measles.

TRALEE; Brosna, No. 1.—District healthy.

TRALEE; Castlemaine.—Vaccination defaulters are complying with the law in a slow manner at present.

TRALEE; Kilgobban.—The district is healthy.

TRALEE; Tralee No. 1, W.—There are several hundreds of vaccination defaulters in this district. A very large number of deaths was certified as due to pulmonary tuberculosis.

Limerick County and County Borough.

CROOM; Castletown.—Though the death rate has not been abnormally great, the quarter has been marked by an unusual amount of bronchitis and influenza in this district.

KILMALLOCK; Bruff.—District healthy. No zymotic disease. Sanitary condition satisfactory.

KILMALLOCK; Bruree.—There were some cases of whooping-cough, otherwise district healthy.

KILMALLOCK; Hospital.—District healthy. Just a few cases of scarlatina and one of diphtheria.

KILMALLOCK; Kilfinane.—District healthy.

KILMALLOCK; Kilmallock, W.—One case of typhoid fever, which originated in another district. Sanitary condition fair.

LIMERICK; Annacotty.—Sanitary arrangements very fair. District healthy.

LIMERICK; Caherconlish.—Sanitary arrangements fairly good, but scarlet fever seems to be on the increase, I have reported seven cases. The houses were disinfected and patients isolated. One case of malignant disease—epithelioma of lip.

LIMERICK; Moroe.—General sanitary condition of district fairly good. Slight outbreak of scarlatina, of a mild type, towards latter end of quarter. Vaccination done before it appeared. Of 14 births entered, 9 were females; while of 13 deaths, only 2 were females. Three deaths from pulmonary tuberculosis, and two from cancer.

LISTOWEL; Glin.—Of the 16 deaths registered during the quarter there were 8 whose ages ranged from 70 years to 86 years, and 4 children under one year. There were 3 deaths from pulmonary tuberculosis. There were 2 cases of measles of a very mild form, but there were no deaths amongst them. I am glad to observe as far as the Glin dispensary district is concerned that enteric fever seems a disappearing malady, no case having occurred for nearly 12 months.

MITCHELSTOWN; Galbally.—District exceptionally healthy.

MITCHELSTOWN; Mitchelstown, No. 2.—District healthy.

NEWCASTLE; Abbeyfeale.—I believe the sanitary arrangements of the town to be all right.—(Assistant Registrar.)

NEWCASTLE; Ardagh.—The sanitary state of the district is pretty fair.

NEWCASTLE; Fennagh.—The general health of the district is fairly good.

RATHKEALE; Askeaton.—There was no case of any infectious or contagious disease during quarter.

RATHKEALE; Pallaskenry.—As I have often before this reported, water supply of one village is insufficient. The houses in a lane in that village are not in a sanitary condition—some houses not fit for human habitation. The public pump in another village is out of order. Of 9 deaths reported, 6 were over 70 years, influenza with pulmonary complications being chief cause of mortality.

RATHKEALE; Rathkeale No. 1, W.—The sanitary condition of the district is fairly satisfactory. With the exception of one solitary case of typhoid fever, there was not a single case of infectious or communicable disease (tuberculosis excepted) in the district during the quarter.

RATHKEALE; Rathkeale, No. 2.—My district was free from all contagious diseases.

TIPPERARY; Grean.—Scarlatina of a mild type has been prevalent in the district for some months. As far as I know, there has been no case since the 15th June.

Tipperary County, North Riding.

BORRISOKANE; CloghJordan.—The health of district was pretty good during the quarter.

BORRISOKANE; Terryglass.—District healthy. No epidemic.

NENAGH; Nenagh, W.—About a dozen cases of scarlatina occurred in the district during the quarter; otherwise district healthy.

NENAGH; Newport.—District free from any infectious disease.

NENAGH; Portroe.—Enteritis prevalent during the quarter.

THURLES; Moyne.—Health of this district satisfactory, with the exception of one case of fever. Patient

was removed to hospital, and is recovering. Proper precautions taken to stop spread of the disease.

THURLES; *Templemore*.—One case of diphtheria occurred during quarter, which was reported, and proper precautions taken to stop the spread of disease.

Tipperary County, South Riding.

CALLAN; *Mullinahone*.—District healthy. Three of the six deaths registered were of persons aged from 82 to 84 years at time of death. Sanitation and vaccination fairly attended to. No case of tuberculosis or cancer in district at present.

CARRICK-ON-SUIR; *Garrangibbon*.—The health of the district is satisfactory.

CASHEL; *Killenaule*.—Health of district good.

CASHEL; *Kilpatrick*.—District healthy.

CLOGHEEN; *Caher*.—No cases of an epidemic character occurred during the past quarter.

CLOGHEEN; *Clogheen, W.*—District free from epidemic diseases.

CLONMEL; *Clonmel, No. 2 (Marlfield)*.—Sanitation of district, on the whole, satisfactory. Death rate low.

CLONMEL; *Kilsheelan, No. 1*.—One death from cancer of the tongue. Three deaths from pulmonary tuberculosis.

TIPPERARY; *Cappagh*.—Three cases of scarlatina, one of which died.

TIPPERARY; *Emly*.—District healthy.

TIPPERARY; *Golden*.—The health of the district is good.

URLINGFORD; *Kilcooly*.—The district has been very healthy during past quarter. Sanitary arrangements are good. I notice a great improvement in the health of the poor people (both young and old), who have got new cottages.

Waterford County and County Borough

CARRICK-ON-SUIR; *Rathgormuck*.—We are free from infectious disease, and the sanitary condition of the district is satisfactory.

CLONMEL; *Kilsheelan, No. 2*.—No zymotic disease.

DUNGARVAN; *Dungarvan, W.*—District healthy during past quarter. Vaccination well attended to.

DUNGARVAN; *Whitechurch*.—Whooping-cough prevalent. One case of enteric fever.

LISMORE; *Ballyduff*.—Sanitation, vaccination, and general health of the district very satisfactory.

WATERFORD; *Kilmeadan*.—Sanitary arrangements good. District in a healthy condition.

WATERFORD; *Waterford Urban, No. 1, W.*—The district has been free from infectious disease, with the exception of tuberculosis, which has had a very high mortality rate—38 deaths from tuberculosis out of 109 deaths registered. Vaccination well carried out.

WATERFORD; *Woodstown*.—The health of the district is good, and the sanitary condition excellent.

YOUGHAL; *Ardmore*.—Tuberculosis prevalent in badly ventilated houses in the district.

III.—PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Dough*.—The district has been practically free from infectious disease during the quarter.

ANTRIM; *Randalstown*.—District free from any epidemic.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district are fairly good. Influenza was prevalent in the beginning of the quarter, but there are few cases now.

BALLYCASTLE; *Cushendall*.—The new sewerage and water system has been completed, and so the sanitary arrangements in the village are vastly improved. The death from tuberculous disease was that of a person belonging to another district.

BALLYMENA; *Ballymena, W.*—Measles, which prevailed some time ago, has disappeared. Public health at present satisfactory.

BALLYMENA; *Broughshane*.—Pneumonia was very prevalent in the first and second months of quarter.

BALLYMENA; Clogh.—District fairly healthy.

BALLYMENA; Galgorm.—There was an epidemic of measles of a mild type; no fatal cases. Otherwise the district has been very healthy, and free from any other zymotic disease.

BALLYMENA; Portglenone.—Health of the district is good.

BALLYMENA; Toome.—General health of the district good.

BALLYMONEY; Dervock.—Measles of a mild type has been epidemic during the past quarter, affecting the vaccinations considerably.

BALLYMONEY; Dirraw.—Sanitary arrangements well looked after. Inhabitants improving ventilation in dwellings. Some of the poorer people still require improvements in matters of cleansing houses and proper cooking of food, more especially for growing children.

LARNE; Ballycarry.—Sanitary condition of district fairly good. No epidemic diseases now.

LARNE; Waterfoot.—The health of the district has been exceptionally good.

LISBURN; Dunmurry.—The sanitary condition of this district very good; no epidemic of any kind.

LISBURN; Glenavy.—District free of all zymotic influence.

LISBURN; Knocknadona.—The sanitary condition of this district fairly good. One death from tumour of lung, and one death from phthisis pulmonary.

Armagh County.

ARMAGH; Blackwatertown.—Out of 35 deaths registered, 4 were certified due to cancer, and 4 to some form of tuberculous disease. Whooping-cough has been prevalent.

ARMAGH; Markethill.—The district has been very healthy for the past quarter. Whooping-cough was prevalent during the quarter. Pneumonia (acute croupous) was very prevalent during May and June.

ARMAGH; Rich Hill.—Whooping-cough very prevalent among the children during this quarter.

ARMAGH; Tynan.—The district is in a particularly healthy state.

CASTLEBLAYNEY; Newtownhamilton, No. 1.—No infectious disease of any kind.

LURGAN; Lurgan, No. 1, W.—A fierce outbreak of scarlatina occurred during the 2nd, 3rd, and 4th weeks of April in one quarter of the urban district, 21 cases being notified in each of the first two weeks, and 9 in the last. Eleven cases were met with during the first seventeen days of May—since which time it has entirely disappeared.

NEWRY; Forkill.—District healthy and free from infectious disease.

NEWRY; Mullaghglass.—District healthy.

NEWRY; Poyntz Pass.—The two deaths from tuberculosis include one case of lupus; no medical attendant.

Belfast County Borough.

BELFAST; Belfast Urban, No. 3.—One death was registered as "cerebro-spinal fever," of which particulars were given in the weekly return.

BELFAST; Belfast Urban, No. 4, W.—No deaths from cerebro-spinal fever.

BELFAST; Belfast Urban, No. 5.—No outbreak of any infectious disease occurred in the district during present quarter.

BELFAST; Belfast Urban, No. 9.—No cases of cerebro-spinal fever occurred during this quarter.

BELFAST; Belfast Urban, No. 11.—There has been one death from epidemic cerebro-spinal meningitis registered in the district during the quarter; during the first month of quarter the mortality was high from chest affections, but it is now normal.

BELFAST; Belfast Urban, No. 13.—No deaths from cerebro-spinal meningitis.

Cavan County.

BAILIEBOROUGH; Bailieborough, W.—District in a healthy condition.

CAVAN; Killashandra.—The local branch of the Women's National Health Association has applied by deputation to the Rural District Council for a shelter for tuberculosis patients, which it will consider the desirability of granting or not. The

sanitary state of the district is very slowly improving. No epidemic during the last quarter. Pneumonia of a very virulent type prevailed here and there through the district.

COOTEHILL; *Tullyvin*.—District healthy.

ENNISKILLEN; *Holywell, No. 2*.—Sanitary condition of the district fairly good. Measles prevalent in portion of the district. Of the 8 deaths registered, 6 were those of persons over 60, and one death of a child under one.

GRANARD; *Scrabby, No. 1*.—Health of the district generally good. No cases of infectious disease occurred during the quarter.

OLDCASTLE; *Ballyjamesduff*.—District healthy, except for measles, which has left vaccination backward.

OLDCASTLE; *Virginia*.—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra*.—The water supply still continues very bad, but sanitary arrangements otherwise fairly good.

DONEGAL; *Donegal, W*.—District healthy.

DONEGAL; *Dunkineely*.—District healthy; free from zymotic diseases.

DONEGAL; *Laghy*.—District healthy. There is no water supply in the village of Laghy, and that in the village of Ballintra is not sufficient.

DONEGAL; *Pettigoe*.—Three deaths from tuberculosis, one from cancer, and one from enteric fever were registered during the quarter.

DUNFANAGHY; *Crossroads*.—District free from infectious diseases.

DUNFANAGHY; *Dunfanaghy, W*.—District healthy.

DUNFANAGHY; *Gweedore*.—District healthy.

DUNFANAGHY; *Tory Island*.—No vaccination during last quarter.

GLENTIES; *Ardara*.—District healthy.

GLENTIES; *Carriek*.—The health of the district is fairly good. Pulmonary tuberculosis is still fairly prevalent, and the people do not as yet seem to recognise the importance of ventilation.

GLENTIES; *Doocharry*.—District healthy.

GLENTIES; *Killybegs*.—District healthy during quarter.

INISHOWEN; *Buncrana*.—District healthy.

INISHOWEN; *Clonmany*.—District healthy.

INISHOWEN; *Malin*.—District healthy.

INISHOWEN; *Moville*.—District healthy.

LETTERKENNY; *Church Hill*.—District healthy.

LONDONDERRY; *Killea*.—A mild form of influenza was prevalent during the quarter.

MILLFORD; *Fanad*.—Health of district good.

MILLFORD; *Rathmullan*.—Whooping-cough has been prevalent during quarter.

MILLFORD; *Rosguill*.—District during quarter just ended healthy. One case of diphtheria occurred, and recovered under serum treatment. Sanitation of district improving.

STRABANE; *Raphoe*.—Sanitary arrangements satisfactory; no zymotic cases in this district during past quarter.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory.

Down County.

BANBRIDGE; *Ballyward*.—The sanitary state of the district is much improved. Many very old people died during the quarter owing, I think, to the prevalence of cold winds leading to chest diseases.

BANBRIDGE; *Banbridge, W*.—One death registered at 103 years.

BANBRIDGE; *Loughbrickland*.—The sanitary arrangements in the district are fairly good. Whooping-cough and influenza were prevalent during the quarter.

BELFAST; *Castlereagh, No. 1*.—No deaths from cerebro-spinal meningitis.

DOWNPATRICK; *Ballynahinch*.—With the exception of a few cases of German measles, and whooping-cough, there has not been any epidemic disease during the quarter.

DOWNPATRICK; *Downpatrick, W*.—Five deaths, attributed to influenza.

DOWNPATRICK; Killyleagh.—There has been no outbreak of any infectious disease during the quarter just ended. Labourer's cottages are being quickly built all over the district, which, it is hoped, will cause the present wretched hovels that do duty for cottages to be demolished. The water supply is not of the best quality, but it is the best that can be procured. Of the 35 deaths registered, 25 were 60 and upwards—ranging from 60 to 91.

DOWNPATRICK; Portaferry.—Influenza was very prevalent during last quarter, and 12 deaths were registered as primarily due to it. Sanitary state of district very good.

KILKEEL; Kilkeel, No. 2, W.—Health of district good.

KILKEEL; Rosstrevor.—Sanitary arrangements in district are satisfactory.

LISBURN; Annahilt.—There has been no case of infectious disease notified during the quarter.

LISBURN; Ballylesson.—One death occurred from cerebro-spinal fever in Purdysburn fever hospital during past quarter.

LISBURN; Saintfield.—The health of district very good.

LURGAN; Moira.—No death from any form of tuberculosis, but three from carcinoma. Two from pneumonia (which has been very prevalent), and several are referred definitely to some form of heart disease. Vaccination well attended to this quarter.

LURGAN; Waringstown.—There were three isolated cases of scarlatina, and one of diphtheria during the quarter. Two were removed to hospital and two were isolated. There were three cases of enteric fever in one townland. They were removed to hospital, and the water supply was looked after. No spreading of the disease has occurred.

NEWRY; Donaghmore.—District very healthy. Sanitary arrangements fairly good. No infectious diseases.

NEWRY; Rathfryland.—Health of the district good. Water supply of the town of Rathfryland antiquated.

NEWTOWNARDS; Comber.—Health of district good; no epidemic, except influenza, which has been rather severe. The quarter has been remarkable for the proportion

of deaths of old people; two were registered in the quarter over 90, one between 80 and 90, and seven between 70 and 80, and four between 60 and 70 years. Sanitation fairly good and steadily improving.

NEWTOWNARDS; Greyabbey.—Births and deaths about average. Whooping-cough and influenza very bad in one division. Two deaths reported from whooping-cough and two from influenza. Influenza very common throughout the district, and some cases very bad; high temperature continued two weeks, and in a few cases, three weeks. High death rate amongst aged. One death registered at 99 years, one at 91 years, two at 90 years, one at 84 years, one at 82 years, and two at 80 years.

NEWTOWNARDS; Newtownards, W.—The general health of the district has been good. Chief sanitary defect is the want of a system of proper water-tight sewers.

Fermanagh County.

ENNISKILLEN; Enniskillen, W.—Sanitation fairly good.

ENNISKILLEN; Florencecourt.—Sanitary condition of district fairly satisfactory. Measles prevalent during last two months of quarter; no deaths from same. Bronchial affections were also prevalent amongst young and old.

ENNISKILLEN; Holywell, No. 1.—Sanitary condition of the district fairly good, and is at present free from all epidemics.

IRVINESTOWN; Clonelly.—The water supply in the Fermanagh portion of Pettigo requires attention, and the drainage is bad.

IRVINESTOWN; Ederney.—Influenza prevalent in district at present.

IRVINESTOWN; Irvinestown, W.—Pulmonary disease prevalent during quarter.

LISNASKEA; Lisnaskea, W.—Sanitary state of district fair. No epidemic disease prevalent during quarter.

Londonderry County and County Borough.

COLERAINE; Aghadowey.—District healthy.

COLERAINE; Garvagh.—Except for influenza in the beginning of the quarter, the district has been very healthy.

COLERAINE; Kilrea.—District healthy, but in the last month of the quarter two cases of enteric fever occurred in the dwelling-house of a farmer—one proving fatal, the other having been sent to union hospital—and the source of infection was probably the use of water from a polluted surface well. Sanitary precautions were taken, and there are no other cases of the disease.

LIMAVADY; Bellarena.—District healthy.

LIMAVADY; Dungiven.—Health of the district good during the quarter. No outbreak of infectious disease. Two deaths from cancer—one a case of cancer of the breast, and the other a case of cancer of the stomach—were registered during the quarter. There were three deaths from phthisis.

LIMAVADY; Limavady, W.—There was one death from diphtheria during the quarter and one from typhoid fever.

LONDONDERY; Lower Liberties.—Two cases of diphtheria in the district during quarter; one death.

MAGHERAFELT; Moneymore.—District healthy during quarter. No epidemic or zymotic disease, except a few cases of influenza and some cases of whooping-cough, but no deaths.

Monaghan County.

CARRICKMACROSS; Carrickmacross, W.—The death from typhus occurred in Fever Hospital, patient being admitted from another district. The death from diphtheria was an isolated case. District in fair sanitary condition. Vaccination, considering number of defaulters, fairly satisfactory.

CARRICKMACROSS; Raferagh.—There have been a few cases of whooping-cough and one of scarlatina. Due precautions were taken.

CASTLEBLAYNEY; Ballybay.—The district was not in good sanitary condition, and many dangerous nuisances were reported to the Local Sanitary Authorities. Sore throat was epidemic during June, but there were no fatal cases.

CASTLEBLAYNEY; Castleblayney, W.—The health of the district is

fairly good, and the new sewerage scheme in the town is nearing completion.

CASTLEBLAYNEY; Newtownhamilton, No. 2.—No infectious disease reported for last twelve months.

COOTEHILL; Dawsonsgrove.—Sanitary condition of the district is good.

MONAGHAN; Castleshane.—District sanitary. No epidemic of any disease.

MONAGHAN; Emyvale.—Vaccination very punctually seen to this quarter. No epidemic of any kind. Sanitary arrangements fairly satisfactory.

MONAGHAN; Kilmore.—District healthy.

MONAGHAN; Monaghan, W.—The sanitary arrangements of this district continue satisfactory. There has been no epidemic during the quarter, and there has been nothing in diseases, sanitary arrangements, or vaccination calling for special notice.

MONAGHAN; Scotstown.—There has been no epidemic of any sort in the district during the quarter. The sanitary arrangements and health of the district are satisfactory.

Tyrone County.

CASTLEBERG; Castlederg, W.—Sanitary state of district satisfactory. No epidemic of any kind. Two cases of diphtheria occurred during the quarter; both got well under anti-toxin serum.

CASTLEBERG; Drumquin.—The sanitary arrangements in the district are satisfactory; without any infectious disease.

CASTLEBERG; Killeter.—State of district healthy.

CLOGHER; Aghnacroty.—Health of district generally satisfactory.

CLOGHER; Ballygawley.—Influenza prevailed for two months. District in fair sanitary condition.

CLOGHER; Fivemiletown.—The health of the district was very good during the quarter.

COOKSTOWN; Coagh.—One death from puerperal septicaemia registered during the quarter.

COOKSTOWN; Pomeroy.—District healthy, with exception of mild epidemic of scarlatina in a couple of townlands.

COOKSTOWN; Stewartstown.—There are a great number of influenza cases. One case of diphtheria recovered. One of typhoid still ill. One case of puerperal fever died. Otherwise the district is healthy.

DUNGANNON; Benburb.—Sanitary condition of district good.

DUNGANNON; Clonavaddy.—Sanitary arrangements fairly good. District in a healthy condition.

DUNGANNON; Coal Island.—No infectious case during quarter. Pneumonia and other chest affections prevalent.

IRVINESTOWN; Trillick.—Water supply required.

OMAGH; Drumquin.—The sanitary arrangements in the district are satisfactory. None of the diseases mentioned in the abstracts or other diseases are at present prevalent.

OMAGH; Fintona.—The health of the district has been good during the past quarter and almost free from epidemic disease. The majority of the deaths registered were those of old people from 70 to 90. The sanitary arrangements are satisfactory.

OMAGH; Omagh, No. 1, W.—Health of district satisfactory. Influenza prevalent. Sanitary condition of urban district fairly satisfactory. In the rural district the old order continues.

OMAGH; Omagh, No. 2.—District healthy. No epidemic of any kind. Nearly all deaths registered during the quarter are old people, which accounts for so many being uncertified.

OMAGH; Sixmilecross.—One case of scarlatina. The houses in the district are much better ventilated and kept cleaner during the past quarter, due to sanitary lectures which have been given in the district; still there is great room for improvement as regards cleanliness, fresh air, etc,

STRABANE; Newtownstewart.—Of the 3 uncertified deaths, 2 were of people in a position to pay for medical attendance, and one that of a labourer aged 86 years. Out of the 12 deaths, in the case of 8 the average age at death was 80½ years.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

BALLINASLOE; Laurencetown.—The deaths of persons aged respectively 74, 81, 83, 86, and 87 years were registered.

CLIFDEN; Inishbofin.—Sanitary arrangements fairly good.

CLIDEN; Roundstone, No. 1.—District healthy.

GALWAY; Galway No. 3 (Arran).—Health of district very good.

GALWAY; Moycullen.—Sanitary condition is very good.

GALWAY; Oranmore.—District healthy.

GALWAY; Spiddle.—District very healthy.

GALWAY; Turloughmore.—Health of district good. One death aged 102.

GORT; Gort, W.—A case certified as epidemic cerebro-spinal meningitis occurred during the quarter, and proved fatal. There was no spread of the disease. A mild case of typhoid fever also occurred. With these exceptions, the health of district was very good.

GORT; Kinvarra.—It is remarkable that the 12 persons whose deaths were registered during the quarter were all males.

LOUGHREA; Athenry.—The sewerage and water supply of Athenry are defective, and are at present engaging the attention of the Sanitary Authority.

LOUGHREA; Bullaun.—I have registered two male deaths and one female death during past quarter at the remarkable ages of 89 and two 95 years.

DOUGHTERARD; Cloonbur, No. 1.—Enteric fever, which was present in two villages, has now disappeared, as also has whooping-cough. Health of district good.

OUCHTERARD; *Oughterard, W.*—No deaths from cancer.

PORTUMNA; *Portumna, No. 1, W.*—The district is free from infectious disease and in a fairly good sanitary condition, yet a better course of drainage in the towns and villages is much needed.

TUAM; *Tuam, No. 2.*—The epidemic of measles which commenced here last January still continues, but it is subsiding.

Leitrim County.

BAWNBOY; *Ballinamore.*—Sanitary state of district good.

CARRICK-ON-SHANNON; *Drumshanbo.*—District healthy and in good sanitary condition.

MOHILL; *Carrigallen.*—The sanitary condition and health of the people have been fairly good during the quarter. Influenza and measles have been prevalent, the latter more especially during the past months.

MOHILL; *Mohill, W.*—There was an outbreak of measles in the district during the quarter, but only one child died from the epidemic.

MOHILL; *Rinn.*—The district is quite healthy and, now that measles has subsided, free from epidemic.

MOHILL; *Rowan.*—Of the fourteen deaths registered during the quarter all were above fifty years, and eight had passed their seventieth year. The sanitary condition of district is fair.

Mayo County.

BALLINA; *Ballina, W.*—Health of the district fairly good. Whooping-cough prevalent during the quarter—6 deaths recorded. Sixteen deaths are registered from all forms of tuberculosis. A branch of the Women's National Health Association has been formed in town, which will, no doubt, have good results. A large proportion of deaths uncertified. Sanitary state of the district fair. The postponed vaccinations now coming in.

BALLINA; *Crossmolina.*—Sanitary condition fair. Vaccination backward.

BALLINROBE; *Ballinrobe, W.*—Sanitary arrangements fair. Vaccination is always performed in fairly good time.

BALLINROBE; *Cappaghduff.*—Sanitary arrangements fair. Epidemic of measles now on the decline.

BALLINROBE; *Cong.*—Whooping-cough was prevalent during the quarter.

BALLINROBE; *Hollymount.*—Births and deaths about the average. Measles very prevalent during the quarter. There were many cases of pneumonia and bronchitis; otherwise the health of the people of this district was good.

BELMULLET; *Binghamstown, W.*—District in a satisfactory state.

BELMULLET; *Knocknalower.*—During the month of April and early in May cases of typhus and whooping-cough were prevalent, but now both are happily extinct.

CASTLEBAR; *Balla.*—District healthy. Vaccination up to average.

CASTLEBAR; *Castlebar, No. 1, W.*—Health of district good. The death of a lady aged 103 years was registered. The number of uncertified deaths is occasioned by almost all being persons of advanced age suffering from senile decay and infirmity.

CASTLEBAR; *Castlebar, No. 2.*—The district is in a healthy condition and free from all infectious diseases. Sanitary arrangements fairly satisfactory.

CLAREMORRIS; *Ballyhaunis.*—Health of district good. No zymotics. There was one death from epithelioma of lip, face, and neck. Of the deaths registered, 10 had reached the ages of 80 years or upwards, one 98 years. Sanitation progressive. Excessive humidity of the atmosphere, to a great extent attributable to neglect of arterial drainage, is exercising a malign influence on the health of the district.

KILLALA; *Killala, W.*—The health of the district has been very good during the quarter. The sanitary arrangements are not satisfactory. Most of the dwellings of the labourers and small farmers are badly lighted and badly ventilated,

without any sanitary accommodation, and in many of them pigs are kept in the same apartment with the family.

WESTPORT; *Achill*.—Sanitary state good. General health of district very good. No epidemic prevalent. Vaccination attendance fair, but there still remain a good many defaulters.

WESTPORT; *Ballycroy*.—District healthy and free from all infectious disease.

WESTPORT; *Islandeady*.—The sanitary arrangements of the district are satisfactory. No case of infectious disease occurred in district during quarter.

WESTPORT; *Louisburgh*.—Sanitary arrangements in district are good. Complete absence of all fevers. Vaccination backward, due to no attention being paid to notices sent out by the Medical Officer.

WESTPORT; *Newport*.—Sanitary arrangements fair. One case of scarlatina; otherwise this district is remarkably free from infectious diseases.

Roscommon County.

ATHLONE; *Athlone, No. 2*.—Deaths registered of old people—82, 80, 74, 73, 73, and 73 years respectively.

ATHLONE; *Kiltoom*.—Sanitary arrangements of district good. Some cases of German measles in district during quarter.

BOYLE; *Boyle, No. 1, W*.—Measles has been prevalent during the past quarter. Very little vaccination was done on account of the measles epidemic.

CARRICK-ON-SHANNON; *Aughrim*.—The health and sanitation of the district during the quarter have been satisfactory.

ROSCOMMON; *Roscommon, W*.—Measles of a very mild type prevalent in a portion of district.

STROKESTOWN; *Roosky*.—During the past quarter measles was present in the whole district, but only two deaths are recorded from its effects. There are two deaths from diarrhoea, one from tuberculosis, and one from cancer also recorded. Vaccination delayed owing to the prevalence of measles in the district during the quarter.

STROKESTOWN; *Strokestown, W*.—One death registered at the age of 105 years.

Sligo County.

BOYLE; *Boyle, No. 2*.—Owing to severe epidemic of measles vaccinations had to be postponed.

BOYLE; *Gurteen*.—Measles was prevalent during the past quarter. Sanitary condition of district improving.

DROMORE WEST; *Castleconor*.—The amount of vaccination not up to what it should be. I would recommend that more stringent measures be taken as regards defaulters.

DROMORE WEST; *Easky, W*.—Health of district good. No case of infectious disease during quarter.

SLIGO; *Carney, No. 1*.—The sanitary condition of this district is good. One case of diphtheria occurred; origin not traced. District free from other zymotic diseases.

SLIGO; *Carney, No. 2*.—Sanitary condition of district fairly good. Influenza prevalent during quarter.

SLIGO; *Riverstown*.—No diphtheria. All deaths registered this quarter were over 60 years of age.

TOBERCUNRY; *Aclare*.—The health of the district continues exceedingly good.

TOBERCUNRY; *Coolaney*.—Sanitary arrangements good.

1909.]
3rd Quarter.

[No. 183.]

QUARTERLY RETURN
OF THE
MARRIAGES, BIRTHS, AND DEATHS
REGISTERED IN THE
PROVINCES, COUNTIES, POOR LAW UNIONS, OR SUPERINTENDENT
REGISTRARS' DISTRICTS, AND REGISTRARS' DISTRICTS
IN IRELAND,
WITH

*Certain Detailed Information Relative to the Deaths in each Registrar's
District; Persons Vaccinated, &c., &c., &c.*

DUBLIN: PRINTED FOR HIS MAJESTY'S STATIONERY OFFICE,
BY ALEX. THOM & CO. (LIMITED).

OLIVER AND BOYD, TWEEDDALE COURT, EDINBURGH.

Price One Shilling.

Marriages:—APR., MAY, JUNE, 1909. **Births & Deaths:**—JULY, AUG., SEPT., 1909.

During the quarter ended 30th September last, there were registered in the 827 Registrars' Districts in Ireland 25,382 births—a number equal to an annual birth-rate of 23·2 in every 1,000 of the estimated population*—and 15,254 deaths, representing an annual rate of 14·0 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 7,260 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 25·6 in every 1,000 of the estimated population, and the death-rate 11·7 per 1,000.

The birth-rate in Ireland for the quarter is 0·3 above the average rate for the corresponding quarter of the ten years 1899–1908, but 0·1 below the rate for the third quarter of 1908. The deaths are 968 under those registered in the corresponding quarter of 1908; the death-rate is 0·8 under the rate for that quarter, and 0·7 under the average for the third quarter of the ten years 1899–1908.

Compared with those for the corresponding quarter of 1908, the returns of pauperism, furnished by the Local Government Board, show a decrease

See page 284.

of 2,302 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 1,058 (a) in the average number of persons on out-door relief.

Compared with the averages for the third quarter of the ten years 1899–1908, the number of Workhouse inmates shows a decrease of 907 and the number of persons on out-door relief shows a decrease of 1,417 (a), the total under both heads being 2·4 per cent. under the average for the third quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 1·1 per cent.

The annual marriage-rate (4·9 per 1,000 of the population) represented by the marriages registered during the second quarter of 1909 is 0·2 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of Marriages registered during the Quarter ended 30th June, 1909, and by the Births and Deaths registered in the Quarter ended 30th September, 1909.

(a) Not taking into account those persons relieved by means of work devised for the relief of distress.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry county and county borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*) page 223.

MARRIAGES.

The marriages (5,311) registered in Ireland during the second quarter of 1909 are equivalent to an annual rate of 4·9 per 1,000 of the estimated population, being 0·4 above the rate for the corresponding quarter of 1908, and 0·2 above the average rate for the second quarter of the ten years 1899–1908. Of the total number of marriages 3,622 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,689 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·5 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·0 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·2 above, but that under the latter is equal to the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by **Quarterly Periods** the **Marriages** registered in Ireland in each of the ten years 1899–1908, and the average number for that period; also the number registered in the first and second quarters of 1909.

BIRTHS.

The number of births registered during the quarter ended 30th September last was 25,382—12,988 boys and 12,394 girls—being equal to an annual ratio of 1 in every 43·1, or 23·2 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1899–1908 was 25,350, equivalent to an annual rate of 22·9 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 24·0 per 1,000 of the population according to the Census of 1901; Munster, 22·1; Ulster, 23·2; and Connaught, 20·5.

The highest county or county borough birth-rate* is 31·8 for Dublin county borough, and the lowest 17·4 for Roscommon county. Of the intermediate rates the highest five are—Belfast county borough, 27·1; Limerick county and county borough, 24·6; Antrim county, 23·9; Mayo county, 23·6; and Kildare county, 23·2. The lowest five are—Cavan, 17·6; Westmeath, 17·9; Tipperary N.R., 18·3; Leitrim, 18·4; and Meath, 18·6.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 30th September last was 15,254—7,725 males and 7,529 females—affording an annual ratio of 1 in every 71·6, or 14·0 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1899–1908 was 14·7 per 1,000.

The death-rate in Leinster was 14·7 per 1,000 of the population according to the Census of 1901; in Munster, 13·3; in Ulster, 14·0; and in Connaught, 11·8.

The county or county borough death-rates* range from 9·7 in Longford county to 19·1 in Dublin county borough. Between these rates the lowest five are—Leitrim, 10·5; Clare, 10·8; Roscommon, 11·4; Tipperary, N.R., 11·4; and King's county, 11·5; and the highest five are—Waterford county and county borough, 17·2; Antrim, 14·8; Londonderry county and county borough, 14·6; Belfast county borough, 14·5; and Wexford, 14·4.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1899–1908, and the average number for that period; also the number registered during the first, second and third quarters of the year 1909:—

* See note (c) on page 202.

Ages.—Of the 15,254 deaths registered last quarter, 2,148, or 14·1 per cent., were of infants under 1 year of age; and 6,373, or 41·8 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 84·6 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 16·5 per cent. of the total deaths registered therein; in Munster, 12·7 per cent.; in Ulster, 14·7 per cent.; and in Connaught, 9·4 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 37·6 per cent.; in Munster, to 43·6 per cent.; in Ulster, to 40·6 per cent.; and in Connaught, to 51·0 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 1,001, or 147 below the number registered in the corresponding quarter of 1908, and is equivalent to an annual rate of 0·9 per 1,000 living, being 0·2 below the rate for the third quarter of 1908, and 0·2 below the average rate for the third quarter of the ten years 1899–1908.

The following tabular statement shows the mortality from each of the principal epidemic diseases, as registered during the September quarter of 1909, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years 1904–1908.

Name of Disease.	Number of Deaths in September quarter, 1909.	Average number of Deaths in September quarter of the 5 years, 1904–1908.
Small-pox,	—	1
Measles,	66	107
Scarlet Fever,	31	28
Typhus,	7	18
Whooping-cough,	234	168
Diphtheria,	98	55
<i>Pyrexia</i> (origin uncertain),	6	10
Enteric Fever,	63	93
Diarrhoeal Diseases,	496	629

Small-pox.—There was no mortality from this disease recorded during the period under notice; neither was the incidence of small-pox reported during the quarter by any of the Registrars.

Measles.—The deaths from measles, in number 66, are considerably below the average for the corresponding quarter of the 5 years, 1904–1908, namely, 107. In the 3 quarterly periods preceding, deaths from measles were 140, 160, and 109 respectively. Of the 66 deaths, there were 9 in the county borough of Dublin. There was not one death from measles registered in Belfast county borough. There were 7 deaths from this malady registered in Frenchpark district, in the union of Castlereagh, and 4 in Skibbereen district (in the union of that name), in which the union hospital is situated.

Scarlet Fever.—The average mortality from scarlatina in the third quarter of the 5 preceding years numbered 28, and the deaths occurring in the 3 preceding quarters were respectively 27, 32, and 40. In the period under notice the deaths numbered 31. From Abstract I., page 222, it appears that 7 deaths were registered in the province of Leinster, 11 in Munster, 13 in Ulster, but not one death from scarlet fever was registered in Connaught.

* See note (f) on page 211.

Typhus.—During the period, for the whole of Ireland, 7 deaths from typhus were registered, being 11 under the average for the September quarter of the 5 years, 1904–1908, and also lower than the number recorded in any of the preceding 8 quarters, with the exception of the December quarter of 1908, when only 6 deaths from typhus were recorded. One death from typhus took place in each of the following unions:—Ballina, Belmullet, Castleblayney, Dingle, Dublin North, Dundalk, and Killarney.

Whooping-cough.—It may be seen on referring to the Abstracts that the mortality from whooping-cough accounts for 234 deaths, a figure representing an annual death-rate of 0·21 per 1,000 of the population; these deaths exceed the average, 168, but are below the number (351) registered in the quarter preceding. In the December quarter of 1908, and the March quarter of 1909 there were respectively 156 and 272 deaths from the disease registered. In the province of Leinster out of 42 deaths there were 22 in Dublin county borough. In Munster, of 66 deaths, 16 were registered in the county borough of Cork, 5 in the Registrar's district of Dripsey, 9 in the city of Limerick, and 10 in the city of Waterford. In Ulster, in which province 94 deaths were registered, 52 were registered in the county borough of Belfast, and 8 in the Registrar's district of Banbridge. In Connaught, in which province 32 deaths were registered, 6 were registered in Westport district, and 4 in each of the districts of Tuam No. 2 and Knocknalower.

Diphtheria.—A reference to Table IV. shows that the deaths from diphtheria, which numbered 62 in the third quarter of 1908, rose to 113 in the December quarter of that year, again rising slightly to 115 in the March quarter of 1909, declining to 71 in the June quarter, and again rising to 98 in the period under notice; the latter figure is above the average (55) in the corresponding period of the 5 years preceding. Of the total deaths from diphtheria, 31 occurred in the province of Leinster, of which 14 were in the county borough of Dublin; 23 in Munster, of which 10 were registered in Cork and the county borough of Cork; 35 in Ulster, of which 7 were in county Antrim, 6 in county Down, and 5 in each of the counties of Armagh and Londonderry (including the county borough of Londonderry), and 9 in the province of Connaught, of which 5 occurred in the county of Galway.

Enteric Fever.—The mortality from enteric fever shows a gradual decline from 103 in the fourth quarter of 1908, to 81 in the first quarter of 1909, to 76 in the second quarter of 1909, and to 63 in the September quarter of 1909, the period now under review, the average being 93 for the corresponding quarterly period in the past 5 years. Of 18 deaths registered in the province of Leinster, 12 occurred in the county borough of Dublin, 2 in the union of Carlow, 2 in the portion of South Dublin union, outside the county borough, and 2 in the union of Kilkenny; of 21 deaths in Munster, 4 were registered in the union of Tralee, 3 in Limerick union, 2 in each of the unions of Cork, Listowel, and Nenagh, and one in each of the following unions:—Fermoy, Mallow, Middleton, Mitchelstown, Killarney, Thurles, Clonmel and Dungarvan. In Ulster, of 15 deaths, 6 were registered in Belfast union and 2 in Lisburn union, and one in each of the following unions:—Ballymoney, Armagh, Millford, Coleraine, Limavady, Londonderry, and Irvinestown; and of 9 deaths in Connaught, 2 were in the union of Mount Bellew, and one in each of the following unions:—Ballinasloe, Manorhamilton, Mohill, Castlebar, Swineford, Roscommon, and Boyle.

Diarrhoeal Diseases.—When compared with the average (629) for corresponding period in the preceding 5 years, and with the deaths from diarrhoeal diseases in the September quarter of 1908—648—the number of deaths (496) registered during the period under notice, shows a substantial reduction. These deaths correspond to an annual mortality rate of 0·45 per 1,000 of the population. The deaths from diarrhoeal diseases registered in the whole of Ireland for the September quarter of the years 1904–1909, together with the mean air temperature, the mean earth temperature at 4 feet, the number of hours of bright sunshine, and the rainfall in inches are shown in the following tabular statement :—

—	September Quarter of Year.	No. of Deaths from Diarrhoeal Diseases.	Mean Air Temperature.	Mean Earth Temperature at 4 feet.	Bright Sunshine No. of hours observed.	Rainfall in inches.
Ireland,	1904	607	57·3°	56·8°	464	11·71
	1905	730	57·3°	57·3°	392	9·39
	1906	835	58·4°	57·4°	486	7·25
	1907	325	57·5°	56·4°	414	7·85
	1908	648	57·2°	57·2°	405	12·09
	1909	496	56·8°	56·4°	399	7·01

On page 210, Table V. gives the deaths from diarrhoeal diseases for the total of the urban districts as compared with that of the rural districts of Ireland, the rate representing the former figure being 1·22 per 1,000 and the rate representing the latter being 0·11 per 1,000. The deaths in the county boroughs were as follows :—In Dublin, 110 ; in Belfast, 141 ; in Cork, 27 ; in Londonderry, 24 ; in Limerick, 3 ; and in Waterford, 28.

Tuberculous Disease.—It appears from Abstract I. that the number of deaths from tuberculous disease in the whole of Ireland, as returned by the Registrars, was 2,294, corresponding to a rate of 2·10 per 1,000 of the estimated population of the country. With their accustomed courtesy many of the Registrars have furnished valuable notes regarding matters of interest which have come before them in the course of their arduous and important occupation. From these (almost all of which are reproduced in the Appendix to this report) I have extracted those which appear to have a special bearing on the prevalence of tuberculous disease, and also those which denote that the community is awakening to a sense of responsibility with regard to the importance of adopting sanitary measures for the protection of the health and the lives of the people. These notes are as follow :—

Edenderry, Rathangan No. 1.—“ The death of a girl 25 years of age registered, pulmonary phthisis, duration, two years. She had been a domestic servant, housemaid, in Manchester, where disease was contracted. Her parents sent her to a sanatorium ; she was discharged as incurable. No phthisis previously in her family.”

New Ross, Dysartmoon.—“ District free from all diseases with the exception of pulmonary tuberculosis, which is more prevalent amongst the small farming class than amongst the poorer classes. This is accounted for by the better housing for the poor.”

Edenderry, Rathangan No. 2.—“ The death of a man, aged 21 years, registered, pulmonary phthisis, duration, three months. His father believed he contracted the disease from lying on the grass after being

excessively heated in the football field. This young man never rallied. He took to his bed and melted away in three months."

Mullingar, Ballynacarrigy.—"Of the deaths registered, which totalled thirteen, eight were over sixty and two under one year, leaving three to be accounted for. Of the latter, two were caused by pulmonary tuberculosis, making a consumption death-rate for adolescents of $66\frac{2}{3}$ per cent. In plain words, two of the three grown-up persons who have died this quarter have met their death through consumption.

Bantry, Durrus and Kilocrohan.—"Three deaths from phthisis; one returned from America; two children in one house, aged six and four years; father always delicate."

Waterford, Waterford Urban No. 1.—"Tuberculosis has been the cause of death in 26 deaths out of 101 registered."

Ballina, Ballina.—"During the quarter 8 deaths were registered as due to consumption and other forms of tuberculosis."

Lisburn, Drumbeg.—"Almost one-third of the number of deaths registered was due to tubercle."

Lisnaskea, Derrylin.—"Tuberculosis always with us."

Dungannon, Caledon and Ballymagran.—"The adoption of the Tuberculosis Prevention Act, Part I., is much needed in a congested area like Caledon."

Omagh, Omagh No. 1.—"Tuberculosis accounts for 16 deaths (asylum, 5; hospital, 2; union hospital, 3)."

Ballycastle, Cushendall.—"One of the two deaths from pulmonary phthisis was imported."

Birr, Birr.—"Tuberculosis is very prevalent but is somewhat less than last year, and practically all the people in my district believe in the infectious nature of the disease."

Ennis, Newmarket — "All sanitary recommendations made by me are being carefully attended to by the District Council."

Ballymoney, Dirraw.—"Ventilation of houses amongst all classes better attended to and more appreciated."

Lisburn, Glenavy.—"People are becoming keenly alive to the necessity of preventive measures against tuberculous disease."

Cavan, Killashandra.—"The Rural District Council have consented to give a shelter to the women's branch of the National Health Association here."

Omagh, Sixmilecross.—"Great improvement in the houses of the working class, as regards cleanliness and fresh air"

Castlereagh, Loughglinn.—"Sanitary condition of district improving. A large number of new houses are being erected throughout the district whereby the health and sanitary condition of the people are much improved."

Malignant Disease —Under the head of malignant disease, deaths from carcinoma, sarcoma, and cancer(undefined) are grouped; in the aggregate, such deaths were returned by the Registrars as amounting to 800, representing an annual death-rate of 0.73 per 1,000 of the estimated

population of Ireland. The rates representing such deaths in each of the 3 preceding quarters were 0·72, 0·78, and 0·69 per 1,000 of the estimated population as then existing, the rate in the corresponding September quarter of 1908 being 0·67 per 1,000.

Cerebro-spinal Fever.—During the period, the deaths of 4 persons from this disease were reported, 2 being registered in Dublin and 2 in Belfast. The Registrar of Killashandra district, in Cavan union, reports as follows:—"One death from pneumonia, with *cerebro-spinal meningitis*, convulsions, 12 hours."

Rabies, Hydrophobia.—No reference to the prevalence of this disease, or report of dog bites was received for the period under notice.

Violence.—All deaths caused by accident, by suicide, and by homicide are included under the heading of this paragraph. These in the aggregate numbered 313, as returned by the Registrars.

The Registrars, in their Notes, report the presence of the following diseases:—Measles in 24 districts, German measles in one, scarlet fever in 23, whooping-cough in 42, diphtheria in 18, fever in 25—typhus in 7, and enteric in 18—influenza in 9, cerebro-spinal fever or *cerebro-spinal meningitis* in 3 districts, chicken pox in one district, mumps in one district, and diarrhoea in 3 districts. [See Appendix to this Report commencing on page 285.]

Inquests.—There were 410 inquests reported to the Registrars during the quarter; this number being equal to 1 in every 37 of the total deaths registered.

In Leinster there was 1 inquest to every 30 deaths registered, in Munster 1 to 48, in Ulster 1 to 31, and in Connaught 1 to 106.

Deaths in Public Institutions.—Of the 15,254 deaths registered, 3,105, or 20·4 per cent., occurred in public institutions. In Leinster the percentage was 27·6, in Munster 24·0, in Ulster 15·0, and in Connaught 12·8.

Uncertified Deaths.—According to the returns, 3,492 of the total 15,254 deaths which were registered during the quarter were uncertified, being nearly 23 per cent. of the total.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 30th September, 1909, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population:—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										Percentage of Total Deaths.	Number in every 100,000 of the Population.
		Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	<i>Pyrexia</i> * (origin uncertain).	Enteric Fever.	Diarrhoeal Diseases.	Total.

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 16·3, and the birth-rate 28·3 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the death-rate was 12·5 and the birth-rate 20·4 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 1·9 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the THIRD QUARTER of the year 1900, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES,† from all forms of TUBERCULOUS DISEASE, and from CANCER. Malignant Disease, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 2nd October, 1900.

VACCINATION.

According to the Returns of Primary Vaccinations received for the third quarter of the year 1909, there were 24,149 persons successfully vaccinated.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 30th September last was 7,260 (3,459 males and 3,801 females), being 1,542 more than in the corresponding quarter of the year 1908, but 2,609 below the average number for the third quarter of the ten years 1899-1908.

TABLE VI.—EMIGRATION from IRELAND during the months of July, August, and September in 1908 and 1909 :—

MONTHS.	NUMBER OF EMIGRANTS.											
	Males.				Females.				Totals.			
	1908.	1909.	In-crease.	De-crease.	1908.	1909.	In-crease.	De-crease.	1908.	1909.	In-crease.	De-crease.
July,	579	888	309	-	655	714	59	-	1,234	1,602	368	-
August,	709	966	257	-	925	949	24	-	1,634	1,915	281	-
September,	1,124	1,605	481	-	1,726	2,138	412	-	2,850	3,743	893	-
Total,	2,412	3,459	1,047	-	3,306	3,801	495	-	5,718	7,260	1,542	-

* Including 5,558 emigrants to the United States of America, viz.:—958 in the month of July, 1,413 in August, and 3,187 in September. Of 5,139 steerage passengers, 1,650 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was 6½d., which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the third quarter of the year 1908 the average price was 6d., and in the corresponding quarter of 1899 it was 5d.

The average price of oatmeal (1st quality) in Dublin for the quarter was 14s. 10d. per cwt. For the corresponding quarter of the year 1908 the average price was 15s., and for the third quarter of 1899 the average price was 14s. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2s. 7d. to 3s. 3d. In the third quarter of 1908 the average prices were 2s. 10d. to 3s. 2d., and the prices for the corresponding quarter of 1899 were 2s. 5d. to 3s. 4d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 56s. to 60s. per cwt. In the corresponding quarter of 1908 the average prices were from 52s. 6d. to 57s. and in the third quarter of 1899 they were from 50s. to 56s. 6d.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter was 20s. per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was £84¹³/₁₆, and the lowest £83.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland during the quarter remained at 3½ per cent., to which it was lowered on the 1st April.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the third quarter of 1909 was 40,328, or 2,302 below the average for the corresponding period in 1908.

The average weekly number of persons receiving out-door relief during the quarter was 54,917* being 1,058 below the average for the third quarter of 1908.

Of the persons receiving in-door relief during the third quarter of 1909, an average number of 1,629 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1908 the average weekly number was 1,526.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the THIRD QUARTER of the year 1909, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was ½d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,† Phœnix Park, Dublin, during the third quarter of the years 1904–1909, respectively,

* See note (*) on page 202.

† Latitude 53° 21' 48"25" north; longitude 6° 20' 59"15" west. Height above the sea 155'3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 218).

The mean height of the barometer during the third quarter of 1909 was 29·827 inches, being 0·126 below the average for the corresponding quarter of the five years 1904–1908; the highest reading (30·234 inches) was on the 14th September, at 9 A.M., air calm, and the lowest (29·154 inches) on the 25th July, at 9 A.M., wind N.N.W.

The mean temperature of the air during the quarter was 55·9°, being 1·2° below the average for the third quarter of the 5 years 1904–1908.

The maximum temperature of the air during the quarter was 77·8° and the minimum 32·6°. The maximum heat in sun was 131·5°.

Rain fell on 47 days during the quarter. The rain-fall measured 6·119 inches, being 0·258 inch above the average for the third quarter of the five years 1904–1908. The greatest monthly rain-fall was in July, when 2·880 inches were registered.

The wind blew on 32 days from W., on 16 days from S.W., on 7 days from N.W., on 4 days from E., on 3 days from N., on 3 days from N.E., on one day from S., and the air was calm on 26 days at 9 A.M.

July.—The mean height of the barometer during this month was 29·749 inches; the highest reading (30·150 inches) was on the 19th at 9 P.M., air calm; and the lowest (29·154 inches) on the 25th, at 9 A.M., wind N.N.W. The mean temperature of the air was 57·9°, the maximum registered was 71·2°, and the minimum 42·0°. The 3rd was the warmest day, and the 28th the coldest night. The mean of the dry bulb was 57·8°, and of the wet bulb 55·3°. The maximum heat in sun was 131·5°, and the minimum on the grass 36·0°. The total amount of sunshine recorded was 151·5 hours, the greatest daily amount being 13·8 hours on the 19th. The maximum ozone was 0·6, the minimum 0·1, and the mean 0·5. Rain fell on 19 days. The rain-fall measured 2·880 inches; the greatest amount in 24 hours was 0·425 inch on the 24th.

August.—The mean height of the barometer during this month was 29·831 inches; the highest reading (30·138 inches) was on the 11th at 9 A.M., wind W.S.W., and the lowest (29·360 inches) on the 23rd, at 9 A.M., wind S.S.W. The mean temperature of the air was 58·4°, the maximum registered was 77·8°, and the minimum 40·0°. The 15th was the warmest day, and the 22nd the coldest night. The mean of the dry bulb was 58·1°, and of the wet bulb 54·9°. The maximum heat in sun was 129·7°, and the minimum on the grass 35·0°. The total amount of sunshine recorded was 163·8 hours, the greatest daily amount being 12·8 hours on the 6th. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·4. Rain fell on 13 days. The rain-fall measured 1·363 inches; the greatest amount in 24 hours was 0·420 inch on the 21st.

September.—The mean height of the barometer during this month was 29·901 inches; the highest reading (30·234 inches) was on the 14th at 9 A.M., air calm, and the lowest (29·492 inches) on the 6th, at 9 P.M., wind W.S.W. The mean temperature of the air was 51·5°; the maximum registered was 65·9°, and the minimum 32·6°. The 23rd was the warmest day, and the 14th the coldest night. The mean of the dry bulb was 51·7°, and of the wet bulb 49·9°. The maximum heat in sun was 116·6°, and the minimum on the grass 28·0°. The minimum on the grass was below 32° on 5 nights. The total amount of sunshine recorded was 111·4 hours, the greatest daily amount being 10·2 hours on the 8th. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·4. Rain fell on 15 days. The rain-fall measured 1·876 inches; the greatest amount in 24 hours was 0·725 inch on the 27th.

* See note (†) on page 216.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of
W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.*

In compiling the following Table (pp. 220 and 221), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

The stations selected, with the names of the Observers, are as follows:—

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	Meteorological Office.
Blacksod Point,	Do.
Markree Castle,	J. R. Armstrong, for Bryan Cooper, Esq.
Donaghadee,	Meteorological Office
Armagh, The Observatory, . . .	J. L. E. Dreyer, Ph.D.
Belfast, Queen's College, . . .	John Wylie, B.A.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Waterford,	J. N. White, Esq.
Birr Castle,	O. Boeddicker, Ph.D., for the Earl of Rosse.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.

NOTES ON THE STATISTICAL TABLES.

Hours of Observation.—The hours of observation are indicated by the type in which the names of the stations are printed. CAPITALS, normal climatological stations, 9 a.m. and 9 p.m.; *ITALIC CAPITALS*, telegraphic reporting normal climatological stations, 7 a.m., 1 p.m., 9 p.m.; Roman, telegraphic reporting stations, 7 a.m., 1 p.m., 6 p.m.; *Italics*, auxiliary climatological stations, 9 a.m. only. At Valencia an additional observation is taken at 3 p.m. The afternoon observations are used in preparing the wind summaries and in computing the number of days of "overcast" or "clear sky." At telegraphic reporting stations (black capitals or Roman type) the results given under "hygrometer" and "cloud" are based on the morning observations only.

Barometer.—The correction for latitude has not been applied. The values are for station level. They are the means of readings at 9 a.m. and 9 p.m., or 7 a.m., 1 p.m., 9 p.m., or 7 a.m., and 6 p.m., as the case may be.

Rainfall.—The amounts are for the 24 hours commencing at the time of morning observation.

Weather Phenomena.—The number of days of Rain, Snow, Hail, Thunderstorm, Fog and Gale, are counted irrespective of the hours at which the phenomena occur. Except in the case of rainfall (see above) the day is the civil day. A day is reckoned as a day of "clear sky," if the average of the estimates of the "amount of cloud" at the hours of observation is less than 2, and as an "overcast" day if the average is greater than 8.

Wind Summaries.—The results given under wind direction, and the number of observations of calms and of fresh or strong wind, are based on the observations at fixed hours. At Valencia and Armagh the wind observations are based on the records of a standard Robinson anemometer (factor 2.2). Velocities of between 13 and 38 miles in the hour have been entered as "fresh or strong winds," velocities of 39 miles in the hour, or above, as gales.

Averages.—The averages used for stations are—Temperature and Rainfall for the 35 years 1871-1905; Bright Sunshine for the 25 years 1881-1905.

District Values.—The district values of temperature, rainfall, and sunshine are computed from the data for the stations included in the Weekly Weather Report of the Meteorological Office. Only a selection of these stations is included in this Report. The average values with which the current district values are compared are for the 25 years, 1881-1905. The district values for "amount of cloud" and for the extremes of temperature and the largest rainfall in a day, are taken from the Monthly Weather Report of the Meteorological Office.

*The boundaries of the Registrar's District of Ballaghaderreen were altered as from the 1st July, 1909, by the transfer thereof from the D. E. D's. of Artagh North, Artagh South, and Loughglinn to form the new Registrar's District of Loughglinn, constituted from that date. The boundaries of the Registrars' Districts of Castleplunket and Castle-
 reagh, were altered as from 1st July, 1909, by the transfer of the D. E. D. of Castlereagh from the latter to the former district. The name of Castleplunket District was changed
 to Ballinlough from the same date, and the name of Castleplunket District subsequently changed to that of Castlereagh.

ABSTRACT IV.—SUPERINTENDENT REGISTRARS' DISTRICTS OR POOR LAW UNIONS ARRANGED ALPHABETICALLY.*

With the Index Number or Numbers showing the position of each in the Provincial and County Grouping in Abstracts II. and III.

Number of Union in Abstracts II. and III.	SUPERINTENDENT REGISTRARS' DISTRICTS OR POOR LAW UNIONS.	Area, in Statute Acres.	Popu-lation in 1901.	Mar-riages.		Births.		Deaths.		The Deaths registered during the Quarter are stated by the Registrars to include														Number of successful Vaccinations in the quarter ending 30th Sept., 1906.
				Registered in the Quarter ending 30th June, 1906.		Registered in the Quarter ending 30th Sept., 1906.		Averages in the Quarters ending 30th Sept., 1906, and 1907.		Registered in the Quarter ending 30th Sept., 1906.		Deaths from												
				Registered in the Quarter ending 30th June, 1906.	Registered in the Quarter ending 30th Sept., 1906.	Registered in the Quarter ending 30th Sept., 1906.	Registered in the Quarter ending 30th Sept., 1907.	Children under 1 year of age.	Persons aged 60 years and up-wards.	Small-pox.	Measles.	Scarlet Fever.	Typhus.	Whooping-cough.	Diphtheria.	Pneumonia (or other uncertain).	Enteric Fever.	Diarrheal Diseases.	All forms of Tuberculous Disease.	Cancer, Malignant Disease.	Violence.	Inquest Cases.	Deaths in Public Institutions.

NOTE.—This table has been constructed for the years 1835 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1909—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—Of the 14 deaths registered during the quarter, 8 had reached the following ages:—98, 86, 85, 83, 79 (3), and 78 years.

CARLOW; *Bagenalstown*.—During the quarter, nine deaths were registered, six of these being over 60 years of age. No epidemic prevailing; the district is healthy.

CARLOW; *Clonegall*.—The number of vaccinations is small for the quarter.

CARLOW; *Fennagh and Myshall*.—There was a slight epidemic of a mild form of scarlet fever during the quarter.

CARLOW; *Leighlinbridge*.—Health of district fairly good. Unusual small rainfall for the months of July, August, and September. Slight epidemic of whooping-cough; no fatal cases, or medical attendance required.

Dublin County.

DUBLIN SOUTH; *Tallaght*.—The district is in a healthy condition.

RATHDOWN; *Blackrock and Stillorgan*, No. 2.—District in a healthy condition.

Dublin County Borough.

DUBLIN SOUTH; *New Kilmainham*.—District healthy.

Kildare County.

ATHY; *Castledermot*.—Four deaths of persons over 80 years during quarter.

BALTINGLASS; *Baltinglass No. 2*.—Whooping-cough very prevalent in the district, and nearly all vaccinations postponed in consequence of this epidemic. One fatal case of measles with hyper-

pyrexia; temp. 108 F. in a young woman aged 27 years. This patient came from another district a few days before she developed the disease.

CELBRIDGE; *Kilcock*.—The health of this district has been very good during the quarter just ended.

CELBRIDGE; *Maynooth*.—District very healthy.

EDENDERRY; *Carbury*.—Six cases of scarlatina in one house. A good many cases of measles of a mild type.

EDENDERRY; *Rathangan No. 1*.—The death of a girl twenty-five years of age registered, pulmonary phthisis, duration—two years. She had been a domestic servant, housemaid, in Manchester, where disease was contracted. Her parents sent her to a sanatorium; she was discharged as incurable. No phthisis previously in her family. Also the death of a man, 64, unmarried; coroner's certificate—"syncope, probably due to disease of heart." His mother died suddenly from heart disease; his brother was discharged from the army owing to heart disease. He died rather suddenly about a year afterwards; another brother died last year from heart disease, but not suddenly. A daughter, aged sixteen, of the last mentioned, died suddenly some years ago, having vomited her heart's blood in a few gushes. No vaccinations, owing to epidemic of measles.

NAAS; *Ballymore Eustace*.—No cases of epidemic diseases in the district.

NAAS; *Kildare*.—District healthy.

NAAS; *Newbridge*.—Of the 24 deaths registered this quarter, 20 were those of males. Of these 7 were inquest cases, which include 5 suicides.

Wicklow County

BALTINGLASS; Baltinglass No. 1, W.—Whooping-cough very prevalent in the district; three fatal cases in very young children. Vaccination postponed in many cases in consequence of this epidemic.

BALTINGLASS; Kiltegan.—Number of births unusually large. Health of district good. Sanitation fair.

NAAS; Blessington.—The health of the district is exceptionally good.

RATHDOWN; Bray, No. 1.—Births and deaths about the average.

RATHDOWN; Delgany.—Whooping-cough was very prevalent in the district during the quarter.

RATHDRUM; Annamoe.—District healthy.

RATHDRUM; Newcastle.—General health of district good. Two of the deaths due to tubercular disease occurred in sanatoria, and the cases came from other districts. The number of vaccinations was small, owing to prevalence of whooping-cough. Same remarks apply as regards sanitary arrangements in district as were made in last three quarterly reports.

SHILLELAGH; Tinahely.—There was one case of scarlet fever; the patient was removed to the fever hospital.

II.—PROVINCE OF MUNSTER.**Clare County.**

BALLYVAGHAN; Ballyvaghan, W.—The sanitary condition of district is good, and the health of district is good.

CORROFIN; Corrofin, W.—Health of district good. One death attributed to influenza, another to German measles.

ENNIS; Crusheen.—Health of district good.

ENNIS; Newmarket.—The health of the district has been satisfactory. There was one case of imported enteric fever, which was immediately removed to hospital. All sanitary recommendations made by me are being carefully attended to by the District Council.

ENNISTIMON; Roadford.—District very healthy. Sanitary arrangements satisfactory. No epidemic of any kind.

KILLADYSERT; Labasheeda.—Health of district good.

KILRUSH; Carrigaholt.—Health of district very good.

KILRUSH; Craggaknock.—The district has been very healthy during quarter, and free from epidemic of any kind.

KILRUSH; Kilmihil.—District healthy. Deaths very few, and all of persons over 60 years, except one; they only number seven for the quarter.

KILRUSH; Kilrush, W.—The district is in a fairly healthy condition.

LIMERICK; Bridgetown.—The sanitary arrangements in the district are satisfactory. There have been three cases of scarlatina, and some cases of whooping-cough during the quarter.

LIMERICK; Coolacasey.—The district was very healthy during the quarter. There was no case of cancer.

SCARRIFF; Annacarriga.—District free from disease.

SCARRIFF; Feakle.—Measles of a mild type in a portion of the district in the month of July, otherwise the health of the district has been good.

SCARRIFF; Mountshannon, W.—District very healthy generally.

SCARRIFF; Quin.—The sanitary arrangements are fairly good. None of the diseases mentioned in the Abstracts are prevalent.

Cork County and County Borough.

BANDON; Inishannon.—District healthy. Of the uncertified deaths, the ages were 85 and 95 years; the age of the infant under one year old whose death was registered was about 15 minutes.

BANTRY; Bantry, W.—District in a very healthy state. No infectious disease in the district during the quarter.

BANTRY; Durrus and Kilocrohan.—Three deaths from phthisis; one returned from America; two children in one house, aged 6 and four years; father always delicate. One case of cancer registered. District very healthy. Great scarcity of water. Otherwise district in good sanitary state.

BANTRY; Glengarriff.—There has been a great scarcity of water for domestic purposes in and about the village of Glengarriff during the summer months; fortunately nothing in the way of any disease arose during the scarcity.

BANTRY; Kealkill.—The sanitary condition of district is good. No case of malignant disease.

CASTLETOWN; Kilkatherine.—District healthy.

CORK; Carrigaline, No. 1.—Although there has been a great scarcity of water, forcing people to use water from suspected sources, diarrhoea has been absent.

CORK; Douglas.—There have been four cases of diphtheria within the past month in this neighbourhood, caused, in my opinion, by want of sanitary accommodation.

CORK; Dripsey.—The sanitary condition of the district is good. There was a very severe epidemic of whooping-cough, with complication of chest, which proved fatal in young children.

CORK; Queenstown, No. 2.—Owing to prevalence of diarrhoea amongst young children, vaccination was not up to the standard.

DUNMANWAY; Dunmanway, W.—The sanitary condition of the district has been satisfactory during the quarter. Owing to the appearance of a few cases of scarlatina and chicken-pox, vaccination was not insisted on, but notices will be served immediately.

FERMOY; Rathcormack.—The health of district was good during the quarter.

KANTURK; Milford.—District healthy.

KINSALE; Ballyfeard.—Health of district fairly good. Whooping-cough complicated with bronchitis occurred, as an epidemic; one death from it, complicated with very severe gastric symptoms.

MALLOW; Ballyclogh.—District healthy.

MALLOW; Buttevant.—Measles prevalent during quarter. Four cases of enteric fever (one fatal) occurred.

MALLOW; Doneraile.—District very healthy.

MALLOW; Rahin.—One case of enteric fever during past quarter. District healthy.

MIDDLETON; Middleton, No. 2.—The health of my district has been very good during the past quarter.

MITCHELSTOWN; Mitchelstown, No. 1, W.—Vaccination postponed owing to epidemic of whooping-cough.

SKIBBEREEN; Tullagh.—An outbreak of epidemic jaundice has occurred in this district during the quarter. From 15 to 20 children were attacked, and there were two cases in adults over 20 years of age. In children the disease began with violent vomiting. One child, aged 7 years, died.

Kerry County.

CAHERSIVEEN; Caher, W.—Sanitary condition of district good. Vaccination this quarter is above the average owing to the fine weather.

CAHERSIVEEN; Darrynane.—During quarter ended I have registered the death of a centenarian whose age was well authenticated. I regret to have to record the deaths of three adults from measles, which was imported by a school-boy, and rapidly assumed an epidemic form of a virulent type. Pulmonary tuberculosis is again accountable for two deaths.

CAHERSIVEEN; Glanbehy.—There are no cases of cancer in my district for the quarter now ended. Sanitary state of district good.

CAHERSIVEEN; Valencia.—Two deaths reported from tuberculosis, and two from whooping-cough, which was prevalent during the quarter.

DINGLE; Castlegregory.—There has been no death from cancer during past quarter. The district at present is healthy.

DINGLE; Dingle, W.—The district has been very healthy for the last three months.

DINGLE; Ventry.—Vaccination backward. Sanitary condition of district fairly good.

KENMARE; Tuosist.—Some vaccinations postponed owing to whooping-cough.

KILLARNEY; Killorglin.—Health of district fairly good.

KILLARNEY; Milltown.—Vaccinations very good.

KILLARNEY; Molahiffe.—Vaccination is backward. The district is generally healthy.

LISTOWEL; Ballyhorgan.—No case of cancer. Sanitary state of district good.

LISTOWEL; Ballylongford.—District fairly healthy for quarter. Good number of vaccinations. Water scarce in village. Village sewers are wanted.

LISTOWEL; Listowel, W.—The district has been healthy and free from infectious diseases.

LISTOWEL; Tarbert.—The water supply is insufficient.

TRALEE; Brosna, No. 1.—District healthy.

TRALEE; Castlemaine.—District free from any infectious disease.

Limerick County and County Borough.

CROOM; Castletown.—A healthy quarter, with a very small death rate in this district. Two cases of scarlatina of a mild type occurred.

CROOM; Croom, W.—The sanitary arrangements of the district are good.

KILMALLOCK; Bruff.—There were some cases of scarlatina during last quarter. Otherwise the district is healthy and the sanitary condition good.

KILMALLOCK; Bruree.—The two deaths from whooping-cough were chiefly due to acute bronchitis and pneumonia. Otherwise district healthy.

KILMALLOCK; Hospital.—District healthy.

KILMALLOCK; *Kilfinnane*.—District healthy.

KILMALLOCK; *Kilmallock, W.*—District healthy. No zymotic disease.

LIMERICK; *Annacotty*.—Sanitary arrangements very fair. District very healthy.

LIMERICK; *Clarina*.—No deaths of children under one year, and the age at death was given in one case as 97 years 3 months.

LIMERICK; *Limerick, No. 3*.—There has been a very bad epidemic of pertussis in the district during the quarter—8 deaths have been registered from it.

LIMERICK; *Moree*.—Sanitary condition of district fairly good, and district fairly healthy. Birth rate abnormally high—28 registered during the quarter—usual number under 20. Only 9 deaths registered. Vaccination up to date.

LISTOWEL; *Glin*.—There were three cases of enteric fever and one of diphtheria in this district during the quarter. Otherwise the public health was satisfactory. The case of diphtheria was of a mild type, and yielded to treatment readily, but I regret to say one of the typhoid cases, a man 63 years of age, succumbed to the malady, on the twenty-first day of his illness. There were 20 deaths during the quarter, 12 of which occurred amongst those whose ages ranged between 63 and 95 years. There were two deaths from pulmonary tuberculosis, and one from tuberculous meningitis. Eight deaths uncertified—no medical attendant.

MITCHELSTOWN; *Galbally*.—District very healthy. One death from cancer, and two from tubercular diseases.

MITCHELSTOWN; *Mitchelstown, No. 2*.—Vaccination postponed owing to epidemic of whooping-cough.

NEWCASTLE; *Abbeyfeale*.—No water supply in Abbeyfeale for three summer months. An extra supply is required during the summer.

NEWCASTLE; *Ardagh*.—The sanitary state of the district is pretty fair. No epidemic in district.

NEWCASTLE; *Feenagh*.—The sanitary arrangements in the district are fairly satisfactory.

RATHKEALE; *Askeaton*.—During the last quarter the district was entirely free from all epidemic or contagious diseases. Of the deaths registered, one was caused by phthisis pulmonalis.

RATHKEALE; *Pallaskerry*.—Water supply and sanitary arrangements could be improved.

RATHKEALE; *Rathkeale, No. 1, W.*—The births and deaths for the quarter were equal—20 each. The number of the deaths for the district proper was 11, and

9 in the Union hospital. There was one imported case of typhoid fever in the district, and this was the solitary instance of any zymotic disease in the district, including the thickly populated town of Rathkeale. The only drawback to the hygienic condition of the town is the want of a proper water supply for drinking, domestic sanitation, and sewer flushing.

RATHKEALE; *Rathkeale, No. 2*.—My district was in a very healthy condition.

RATHKEALE; *Shanagolden*.—Whooping-cough of a mild form prevalent in southern portion of my district.

TIPPERARY; *Grean*.—Two cases of scarlatina of a mild type, and two cases of diphtheria, one of which ended fatally, occurred during the quarter. The death of a woman aged 100 years was registered during the quarter.

Tipperary County, North Riding.

BORRISOKANE; *CloghJordan*.—The health of district has been very good.

BORRISOKANE; *Terryglass*.—District healthy. No epidemic.

NENAGH; *Nenagh, W.*—District healthy.

NENAGH; *Newport*.—One case of enteric fever occurred in district during quarter.

NENAGH; *Portroe*.—District healthy during past quarter.

NENAGH; *Silvermines*.—Two deaths from tubercle—one pulmonary, and one meningial, both certified.

NENAGH; *Toomyvara*.—Eighteen cases of enteric fever occurred in this district during the quarter; the patients were removed to hospital, and thorough disinfection carried out. Two deaths occurred in hospital from this disease.

THURLES; *Borrisoleigh*.—There was a serious outbreak of typhoid fever during the quarter, and three cases of diphtheria.

THURLES; *Moyne*.—Three cases of typhus fever occurred, but no fatal result.

THURLES; *Templemore*.—District healthy.

Tipperary County, South Riding.

CALLAN; *Ballingarry*.—The health of the district has been good.

CALLAN; *Mullinahone*.—Sanitary condition of district fairly good. Health of people in general good. No epidemic or infectious disease in district, except one case of pulmonary tuberculosis. One death from cancer of larynx.

CASHEL; *Kilpatrick*.—District free from zymotic diseases.

CLOGHEEN; *Caher*.—Two cases of enteric fever occurred in the district during the past quarter. Otherwise the district has been free from disease of an epidemic character.

CLOGHEEN; *Clogheen, W.*—Whooping-cough prevalent, but free from all other epidemic diseases.

CLONMEL; *Clonmel, No. 2 (Marlfield)*.—No outbreak of disease, save a few cases of pertussis. Health of district good.

CLONMEL; *Kilsheelan, No. 1*.—No zymotic disease.

TIPPERARY; *Bansha*.—District healthy.

TIPPERARY; *Cappagh*.—The district is healthy.

TIPPERARY; *Emly*.—District healthy.

TIPPERARY; *Tipperary, W.*—The district has been in a healthy condition during the quarter.

URLINGFORD; *Kilcooly*.—The district has been healthy during past quarter. Sanitary arrangements fair.

Waterford County.

CARRICK-ON-SUIR; *Rathgormuck*.—There have been a few cases of diphtheria during the quarter, and one death has occurred from that malady. We have had also a few cases of simple tonsillitis.

CLONMEL; *Ballymacarbry*.—Sanitary condition good. One death at 72; another at 73, and one at 84 years.

CLONMEL; *Kilsheelan, No. 2*.—No zymotic disease.

DUNGARVAN; *Dungarvan, W.*—District healthy during past quarter.

DUNGARVAN; *Whitechurch*.—Whooping cough has been prevalent during the quarter.

WATERFORD; *Kilmeadan*.—District in a healthy condition. Sanitary arrangements good.

WATERFORD; *Waterford, Urban, No. 1, W.*—Zymotic enteritis has been present in epidemic form during the quarter, and a high infant mortality has resulted. Tuberculosis has been the cause of death in 26 deaths out of 101 registered.

WATERFORD; *Woodstown*.—The district is in very good sanitary condition.

YOUGHAL; *Ardmore*.—District very healthy.

YOUGHAL; *Clashmore*.—Measles and whooping-cough prevalent.

III.—PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Doagh*.—The district is at present free from infectious disease, with the exception of whooping-cough, which is pretty rife, and a few cases of measles.

ANTRIM; *Randalstown*.—Influenza and mumps prevalent during the quarter; one death registered caused by cancer.

ANTRIM; *Templepatrick*.—The sanitary arrangements and health of the district are good.

BALLYCASTLE; *Cushendall*.—The health of the district has been exceptionally good. One of the two deaths from pulmonary phthisis was imported. Great improvement in the sanitary condition of the village, owing to new water supply and new sewerage system.

BALLYMENA; *Ballymena, W.*—Public health satisfactory.

BALLYMENA; *Broughshane*.—A severe epidemic of whooping-cough has affected one part of my district; one school had to be closed, and the others were seriously affected from the diminished number of pupils.

BALLYMENA; *Clogh*.—District very healthy.

BALLYMENA; *Glenchirry*.—Public health good. A few cases of diphtheria occurred, with one death. Some cases of whooping-cough, but no fatalities. No other infectious disease.

BALLYMENA; *Portlengone*.—Health of district good.

BALLYMENA; *Toome*.—Health of the district good.

BALLYMONEY; *Dirraw*.—Health of district past quarter good. Ventilation of houses amongst all classes being better attended to and more appreciated.

BELFAST; *Belfast Rural, No. 3*.—No deaths occurred from cerebro-spinal fever this quarter.

BELFAST; *Belfast Rural, No. 4*.—Very little sickness.

LARNE; *Ballycarry*.—Sanitary condition of district fair (considering scarcity of water in part of district, especially in summer months). Three cases of diphtheria in two households, but, fortunately has not spread—one death. Free from any other epidemic disease.

LISBURN; *Dunmurry*.—The sanitary condition of this district very good; no epidemic of any kind.

LISBURN; *Glenavy*.—No particular type of disease prevalent this quarter. People are becoming keenly alive to the necessity of preventive measures against tuberculous disease.

LISBURN; *Knocknadona*.—The sanitary condition of this district is fairly good. Three deaths from cancer; no family record. Two death from pulmonary tuberculosis.

LISBURN; *Lisburn, W.*—Can find no history of cancer in the families in which two deaths occurred.

Armagh County.

ARMAGH; *Markethill*.—Whooping-cough was epidemic during the quarter, and caused three deaths.

ARMAGH; *Rich Hill*.—Whooping-cough was prevalent during early part of quarter, and caused one death. District otherwise healthy.

ARMAGH; *Tynan*.—The district free from epidemic of any kind.

NEWRY; *Forkill*.—Whooping-cough prevalent during the quarter.

NEWRY; *Mullaghglass*.—District healthy.

Belfast County Borough.

BELFAST; *Belfast Urban, No. 3*.—There were no deaths from cerebro-spinal fever or cerebro-spinal meningitis.

BELFAST; *Belfast Urban, No. 4*.—No deaths from cerebro-spinal fever.

BELFAST; *Belfast Urban, No. 5*.—No outbreak of cerebro-spinal fever during quarter.

BELFAST; *Belfast Urban, No. 9*.—One death occurred from cerebro-spinal fever during the quarter.

BELFAST; *Belfast Urban, No. 11*.—During the first week of quarter there was a death from cerebro-spinal meningitis registered. During the quarter the health of the district has been very good. The number of cases of diarrhoea (less than usual), and the mortality in general has been abnormally low.

BELFAST; *Belfast Urban, No. 13*.—No deaths from cerebro-spinal meningitis.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—District in a healthy condition.

CAVAN; *Arvagh*.—An epidemic of morbilli of a mild type prevailed in the town of Arvagh in September, and has not yet subsided; up to the present, no fatal case has been reported.

CAVAN; *Killashandra*.—One death from pulmonary tuberculosis; one from pneumonia, with cerebro-spinal meningitis, convulsions, 12 hours. Three deaths

from whooping-cough. The Rural District Council have consented to give a shelter to the women's branch of the National Health Association here. District healthy and fairly sanitary.

CAVAN; *Kilnaleck*.—Measles and whooping-cough prevalent in the district.

COOTEHILL; *Drum, No. 2*.—Measles of a mild type occurred about the middle of the quarter. I closed one of the schools for a time. There were no fatal cases. The district, on the whole, is in a good sanitary condition.

COOTEHILL; *Tullyrin*.—District healthy.

ENNISKILLEN; *Holywell, No. 2*.—The sanitary condition of the district is fairly good. There has been a large number of cases of influenza during the quarter, but no fevers. Of the 16 deaths registered one was that of an infant under one year, and 14 were of persons 60 years and upwards.

GRANARD; *Scrabby, No. 1*.—Sanitary arrangements of this district fairly good. Two cases of diphtheria occurred during the quarter. These cases were treated with anti-diphtheritic serum, and sent to hospital; patients made a good recovery. One death from lupus of several years standing. Vaccination rather in a backward state.

OLDCASTLE; *Ballyjamesdruff*.—District healthy.

Donegal County.

BALLYSHANNON; *Ballintra*.—The sanitary conditions of district fairly good.

DONEGAL; *Donegal, W.*—District healthy.

DONEGAL; *Dunkineely*.—District healthy.

DONEGAL; *Laghy*.—District healthy.

DONEGAL; *Mountcharles*.—District healthy.

DONEGAL; *Pettigoe*.—State of the district generally healthy.

DUNFANAGHY; *Crossroads*.—District absolutely free from infectious disease during the quarter.

DUNFANAGHY; *Dunfanaghy, W.*—There was one death from scarlet fever (not yet registered).

GLENTIES; *Ardara*.—District healthy.

GLENTIES; *Doocharry*.—District healthy.

INISHOWEN; *Buncrana*.—District healthy.

INISHOWEN; *Clonmany*.—District healthy.

INISHOWEN; *Malin*.—District healthy.

INISHOWEN; *Moville*.—District healthy.

LETTERKENNY; *Church Hill*.—District healthy; no epidemic.

LONDONERRY; *Killea*.—A few cases of scarlatina of a mild type occurred during the quarter; otherwise district very healthy.

MILLFORD; *Fanad*.—Health of district good. One case of enteric fever occurred during quarter, caused by drinking impure water.

MILLFORD; *Rathmullan*.—District extremely healthy during quarter.

MILLFORD; *Rosguill*.—District healthy during the quarter just ended, except for an outbreak of diphtheria affecting three children, all of whom recovered under treatment by antitoxin.

STRABANE; *Raphoe*.—Sanitary arrangements satisfactory; no infectious diseases reported during past quarter.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory.

Down County.

BANBRIDGE; *Ballyward*.—District in a healthy state. Sanitary condition fairly good.

BANBRIDGE; *Loughbrickland*.—Whooping-cough and influenza were prevalent during the quarter.

BELFAST; *Castlereagh, No. 1*.—No deaths from cerebro-spinal meningitis.

DOWNPATRICK; *Ballynahinch*.—There has not been any epidemic disease in the district during the quarter. Number of births above the average, and number of deaths below the average for the quarter.

DOWNPATRICK; *Downpatrick, W.*—The two cases of diphtheria died in Workhouse, and came from another district.

DOWNPATRICK; *Portaferry*.—Influenza was prevalent during quarter. Vaccination well attended to.

LISBURN; *Annahilt*.—There was one death from scarlet fever during the quarter. There were several cases of the disease, but by closing the local school, and strict isolation of the cases, the disease did not spread.

LISBURN; *Ballylesson*.—No cases of cerebro-spinal fever occurred during this quarter.

LISBURN; *Drumbeg*.—Births above the average; deaths under the average. No epidemic disease during the quarter. Almost one-third of the number of deaths registered was due to tubercle.

LISBURN; *Hillsborough*.—District very healthy. Number of deaths very far below the average.

LISBURN. *Saintfield*.—Health of district good.

LURGAN; *Moir*.—For the first time since I became Registrar (34 years) the death-rate has exceeded the birth-rate this quarter, the former being high, and the latter exceptionally low.

LURGAN; *Waringstown*.—District healthy. Two deaths from whooping-cough; a few mild cases of scarlatina.

NEWRY; *Donaghmore*.—District very healthy; no infectious disease. Nine deaths and eighteen births registered during the quarter.

NEWRY; *Rathfriland*.—The sanitary condition of the district is improving rapidly.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements of the district very good. General health good; no epidemic. Only 7 males died during quarter.

NEWTOWNARDS; *Comber*.—A few cases of scarlatina of mild type, all removed to hospital. District free from epidemics, and otherwise healthy. Sanitary state good. Only 13 deaths, smallest number, I believe, yet on record for a quarter; and two of these were of prematurely born infants. The deaths registered included persons aged 94, 84, 81, and 70 years respectively.

NEWTOWNARDS; *Greyabbey*.—Births and deaths about average. No epidemic. Influenza prevalent earlier part of quarter. General health good.

NEWTOWNARDS; *Newtownards, W.*—The health of the district has been good. The chief sanitary defect is the want of a proper system of sewers through the town. The want of this meets me everywhere as Medical Officer of Health. I have great hopes of seeing this condition of affairs rectified in the near future.

Fermanagh County.

ENNISKILLEN; *Enniskillen, W.*—Sanitary arrangements satisfactory.

ENNISKILLEN; *Florencecourt*.—District fairly sanitary and free from infectious disease.

ENNISKILLEN; *Holywell, No. 1*.—The sanitary condition of the district is fairly good. Except for a few cases of influenza, there has been no epidemic during the quarter.

IRVINESTOWN; *Ederney*.—District at present healthy.

IRVINESTOWN; *Irvinestown, W.*—One fatal case of idiopathic tetanus. Health of district during quarter good.

LISNASKEA; *Derrylin*.—Two cases of scarlatina noticed during last days of the quarter. A few cases of influenza have occurred. Tuberculosis always with us.

LISNASKEA; Lisnaskea, W.—Sanitary state of district fair. Majority of deaths were of persons 60 years and upwards. No infectious disease prevalent during quarter.

Londonderry County and County Borough.

COLERAINE; Garvagh.—District very healthy, only nine deaths registered during the quarter.

COLERAINE; Killea.—District healthy.

COLERAINE; Portstewart.—District has been healthy during past quarter.

LIMAVADY; Bellarena.—District healthy. Three sporadic cases of faucial diphtheria during quarter.

LIMAVADY; Dungiven.—Sanitary arrangements satisfactory. Birth statistics slightly above average; death statistics about average, majority due to senility. Two deaths from cancer—one of rectum, other of stomach; in neither case could heredity be traced. One death from Hodgkin's disease, age 28. One death from phthisis. Vaccination under average, owing to harvest operations.

LONDONDERRY; Eglinton.—Vaccination postponed, owing to some cases of diphtheria in district.

LONDONDERRY; Lower Liberties.—Diphtheria—four cases sent to hospital. Scarletina—three cases sent to hospital.

MAGHERAFELT; Moneymore.—Two cases of typhoid fever occurred during quarter, having no connection with each other. Otherwise district healthy, with the exception of a few cases of whooping-cough, but no deaths.

Monaghan County.

CARRICKMACROSS; Carrickmacross, W.—District in fair sanitary order; general health good.

CARRICKMACROSS; Donaghmoyne.—One death recorded as "debility after measles, no medical attendant," seemed to me doubtful, but informant was positive as to the measles.

CASTLEBLAYNEY; Ballybay.—Nine persons, members of one family, were affected by typhus, with one death.

COOTEHILL; Dawsongrove.—The sanitary condition of the district is fairly good. One case of diphtheria occurred during the quarter.

COOTEHILL; Drum, No. 1.—The sanitary condition of the district is good. The pump in the village of Drum, about which I sent in a report some time ago, is in process of repair. The villagers are, in the meantime, procuring drinking water from a spring well in the immediate vicinity.

MONAGHAN; Castleshane.—District sanitary. No epidemic of any disease.

MONAGHAN; Emyvale.—Sanitary arrangements fairly satisfactory. Whooping-cough has been prevalent in the district during the quarter.

MONAGHAN; Kilmore.—District healthy; a few cases of epidemic sore throat (tonsillitis).

MONAGHAN; Monaghan, W.—The sanitary arrangements of this district remain satisfactory. There has been no epidemic during the quarter ending September 30th, and there are no circumstances calling for special notice affecting the public health or vaccination.

MONAGHAN; Scotstown.—Health and sanitary arrangements of district are satisfactory.

Tyrone County.

CASTLEBERG; Castleberg, W.—Sanitary state of district satisfactory. Only 10 deaths registered past quarter, the smallest I ever had. No epidemics of any kind.

CASTLEBERG; Drumquin.—The sanitary condition of district is satisfactory, with no epidemic disease of any sort.

CASTLEBERG; Killeter.—State of district healthy.

CLOGHER; Fivemiletown.—The health of the district was pretty good during the quarter.

COOKSTOWN; Coagh.—Whooping-cough is prevalent in this district at present. Two deaths have been registered; otherwise district very healthy.

COOKSTOWN; Cookstown, W.—The district is very healthy.

COOKSTOWN; Pomeroy.—Small outbreak of scarlatina. District generally healthy.

COOKSTOWN; Stewartstown.—Vaccination was postponed on account of whooping-cough, as a number of infants had it, and others were only recovering. At present district is very healthy.

DUNGANNON; *Caledon and Ballymagran*.—Public health of district good. The adoption of the Tuberculosis Prevention Act, part I., is much needed in a congested area like Caledon.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements good.

DUNGANNON; *Coalisland*.—Two cases of diphtheria; origin undiscovered; removed to hospital, and recovered. On the whole, a healthy quarter, with low death-rate.

OMAGH; *Drumquin*.—The sanitary arrangements in the district are satisfactory. None of the principal epidemic or other diseases are at present prevalent.

OMAGH; *Fintona*.—The health of the district has been good during the past quarter, and with the exception of one case of croupous diphtheria, free from epidemic disease. The sanitary arrangements are satisfactory.

OMAGH; *Omagh, No. 1, W.*—The health of the district has been good. The sanitary condition of the urban district is fairly satisfactory. In the rural district, notwithstanding lectures, circulation of literature, etc., the same indifference prevails, in regard to ventilation, lighting, and general domestic cleanliness. Manure heaps and fetid cesspools too close to dwellings in many instances. They are to be found within a few feet of front doors. Tuberculosis accounts for 16 deaths (asylum, 5; county hospital, 2; union hospital, 3). Two deaths from diphtheria—from rural district.

OMAGH; *Omagh, No. 2*.—This district is in a very healthy condition for the past quarter. Only eleven deaths registered, and principally old people. No epidemic of any kind.

OMAGH; *Sixmilecross*.—Three cases of scarlatina during the quarter. Sanitary condition of the district very good; great improvement in the houses of the working class, as regards cleanliness and fresh air.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

CLIFDEN; *Inishbofin*.—Sanitary arrangements fairly good.

CLIFDEN; *Roundstone, No. 1*.—District healthy.

GALWAY; *Galway, No. 3 (Arran)*.—District free from infectious disease.

GALWAY; *Moycullen*.—The sanitary condition of district is very good.

GALWAY; *Oranmore*.—The district at present very healthy.

GALWAY; *Spiddle*.—District continues healthy.

GALWAY; *Turloughmore*.—Sanitation good. Water supply of district very bad.

GORT; *Ardrahan*.—In month of July in this district a mother gave birth to triplets, one boy and two girls. At date of writing the children are not only thriving, but of the average weight for children of the age.

GORT; *Gort, W.*—A severe epidemic of whooping-cough has prevailed throughout the district during the quarter; otherwise the health was good.

GORT; *Kinvarra*.—The health of the district is very good, with the exception of an epidemic of bronchial catarrh of a mild type amongst children. The death of a woman aged 100 years (authenticated) was registered.

LOUGHREA; *Athenry*.—The water supply and sewerage of the town of Athenry are not satisfactory; the sewerage system, however, has been improved upon recently.

LOUGHREA; *Bullaun*.—Of 10 deaths registered, one was 84, and one 87 years of age.

MOUNT BELLEV; *Mount Bellew, W.*—All vaccinations were postponed owing to scarlatina in district.

OUGHTERARD; *Cloonbur, No. 1*.—Health of district good, except for a few cases of enteric fever, which are convalescent.

OUGHTERARD; *Oughterard, W.*—One death from cancer of stomach registered during the quarter.

PORTUMNA; *Portumna, No. 1, W.*—The district is in a fairly good sanitary condition, and free of infectious disease. Yet there are some dwelling-houses occupied which are unfit for human habitation.

TUAM; *Dunmore*.—The health of the district was particularly good during the quarter.

TUAM; *Tuam, No. 1, W.*—There were a few cases of enteric during the quarter. A large number of children was vaccinated during the quarter.

TUAM; *Tuam, No. 2*.—The epidemic of measles is practically over, but there is still some pertussis, 4 deaths from it registered during the quarter; no other epidemic disease.

Leitrim County.

BAWNBOY; *Ballinamore*.—Sanitary condition of district good.

CARRICK-ON-SHANNON; *Drumshambo*.—District in good sanitary condition.

MOHILL; Carrigallen.—The sanitary condition of the district is fairly good. There was a very general epidemic of Measles, almost every child, and some adults who had not already suffered from the disease, were affected. Fortunately there was no death. Some cases of pertussis have occurred within last month. Two deaths were due to cerebral hæmorrhage, of which there were several cases during the preceding quarters of present year.

MOHILL; Mohill, W.—Sanitary arrangements in the district seem to be good.

MOHILL; Rinn.—The district is healthy, and free from epidemic.

MOHILL; Rowan.—There was one death from enteric fever registered during the quarter, source of infection unknown. Measles and Whooping-cough very prevalent just now, without, as far as I am aware, any death. Sanitation fair.

Mayo County.

BALLINA; Ballina, W.—During the quarter 8 deaths were registered as due to consumption and other forms of tuberculosis. A few cases of typhus fever have been reported in the district during the last month of the quarter—one death. Active steps are being taken to prevent a spread of the disease. The district is in a fairly good sanitary condition, yet the housing accommodation for the labouring class, in many cases, is unsatisfactory, being damp, small, and badly ventilated. Vaccination actively carried out during the quarter; there still remains, however, a large number of defaulters.

BALLINA; Crossmolina.—Except one case of typhoid, district free from infectious disease during quarter. Sanitary condition fair. Vaccinations fairly numerous.

BALLINROBE; Ballinrobe, W.—The district is in a healthy condition, and free from all infectious diseases. Sanitary arrangements satisfactory. The death of a lady aged 103 was registered. Vaccination attendance good.

BALLINROBE; Cappaghduff.—The sanitary conditions are much improved, still there are many houses which require white-washing and their yards cleaned.

BALLINROBE; Cong.—Health of district good.

BALLINROBE; Hollymount.—Vaccinations about the average. Except for some cases of pneumonia, and other troublesome chest affections following influenza, in the first month of this quarter, the general health of the people has been very good. No epidemic, but a few cases of mild whooping-cough came under notice the past few weeks.

BELMULLET; Bangor.—Health of district has been good during the quarter, and free from epidemic disease. Of the deaths registered, 10 were of persons 60 years and upwards. Sanitary condition of district much improved.

BELMULLET; Binghamstown, W.—Five cases of typhus fever of one family successfully treated in fever hospital. District in a satisfactory state.

BELMULLET; Knocknallow.—District healthy at present.

CASTLEBAR; Balla.—District healthy.

CASTLEBAR; Castlebar, No. 1, W.—General health of district particularly good. District free from all contagious and infectious diseases, except three scarlet fever cases in hospital. Vaccination defaulters are satisfactorily complying.

CASTLEBAR; Castlebar, No. 2.—The district is free from all infectious diseases. Cattle are still kept in, and manure heaps in close proximity to, dwelling-houses.

CLAREMORRIS; Ballindine.—District healthy.

CLAREMORRIS; Ballyhaunis.—Health of district good; no zymotics or cancer. Save in regard of arterial drainage, the general and sanitary condition of the district is much improved.

KILLALA; Killala, W.—Vaccination was very backward. During the past fortnight (ended 30th September), however, a good number of defaulters have come in. An outbreak of typhus fever has occurred in an adjoining district, and fourteen patients have been admitted to hospital here.

WESTPORT; Achill.—General health and sanitary state of district good, and no epidemic present. A good many vaccination defaulters have been presented and vaccinated.

WESTPORT; Ballycroy.—Vaccinations postponed in many cases in early part of quarter, owing to an epidemic of scabies. No infectious disease in district.

WESTPORT; Islandeady.—District very healthy, and free from infectious diseases.

WESTPORT; Louisburgh.—Sanitary condition of district good. No infectious disease occurred during quarter. Vaccination backward, due to prevailing changeable weather.

WESTPORT; Newport.—General health of district good; sanitary arrangements fair. Two deaths from pulmonary phthisis.

Roscommon County.

ATHLONE; Brideswell.—Houses somewhat improved.

ATHLONE; Kiltoom.—Health and sanitary condition of district good.

BOYLE; *Boyle, No. 1, W.*—Vaccination very backward, owing to measles in first part of quarter.

CASTLEREAGH; *Loughglinn.*—Sanitary condition of district improving. A large number of new houses are being erected throughout the district, whereby the health of the people and sanitary condition of the district are much improved. Whooping-cough epidemic. No death from cancer during quarter.

ROSCOMMON; *Roscommon, W.*—Measles of a very mild type was prevalent in town of Roscommon during early part of quarter, and a few cases of scarlatina of a remarkably mild nature appeared in a few families in the country.

STROKESTOWN; *Roosky.*—There are three deaths registered from tuberculosis. Of the deaths registered, five had reached the ages of 80 years or upwards. Sanitation progressive.

STROKESTOWN; *Strokestown, W.*—There was an epidemic of measles during the quarter.

Sligo County.

BOYLE; *Gurteen.*—District healthy. Vaccination progressing. Epidemic of measles during past quarter.

DROMORE WEST; *Castleconor.*—The health of the district is fairly good considering the class of houses the people live in. In one village there have been

several cases of sore throat, simulating diphtheria, due, in my opinion, to the want of drainage.

DROMORE WEST; *Easky, W.*—Health of district very good. No case of infectious disease during quarter. Five deaths of 80 years and over were registered during quarter.

DROMORE WEST; *Skreen.*—There has been nothing to complain of save the scarcity of water, particularly in three centres.

SLIGO; *Ballymote.*—There was one case of diphtheria in the district in the beginning of the quarter. The health of district is good at present.

SLIGO; *Carney, No. 1.*—Sanitary condition of district good.

SLIGO; *Carney, No. 2.*—Sanitary condition of district fairly good.

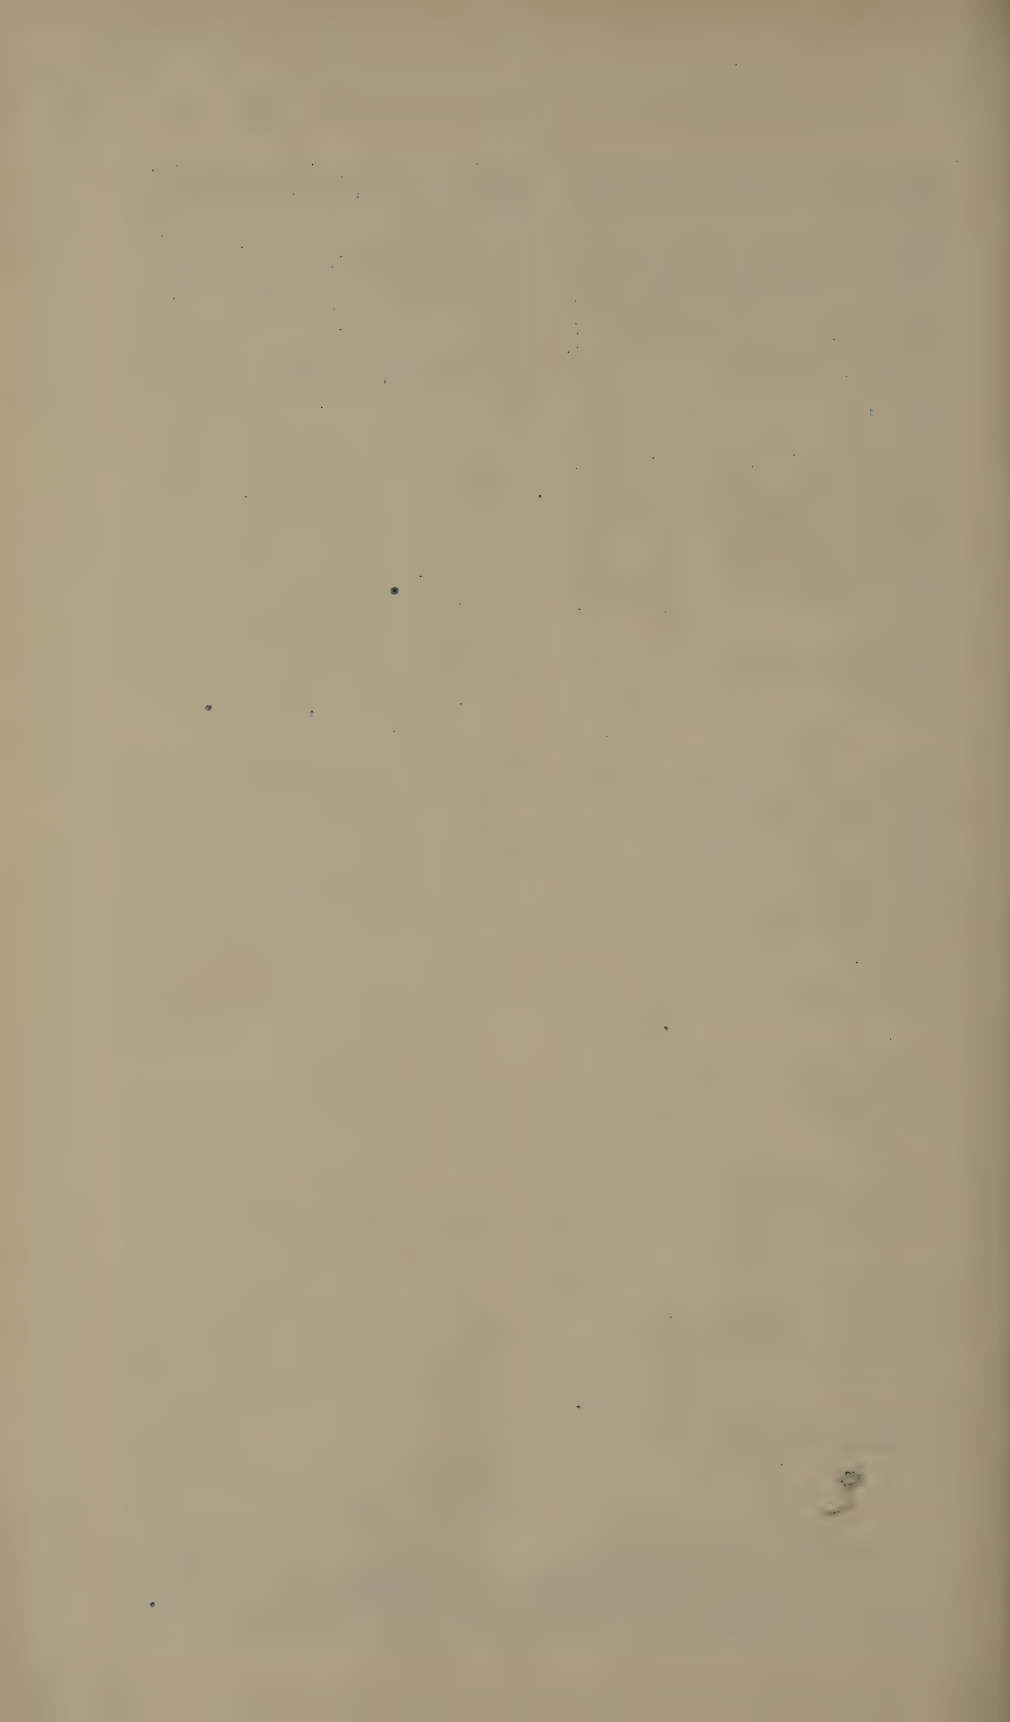

SLIGO; *Collooney.*—Ten cases of measles last month of quarter.

SLIGO; *Riverstown.*—District free from zymotic disease.

TOBERCERRY; *Aclare.*—With the exception of one case of typhus, the district is in a healthy condition.

TOBERCERRY; *Coolaney.*—Sanitation good.

TOBERCERRY; *Tobercurry, W.*—The streets and other parts of the town are in a very insanitary condition.

1909.]

Price One Shilling.

Marriages:—JULY, AUG., SEPT., 1909. **Births & Deaths:**—OCT., NOV., DEC., 1909.

During the quarter ended 31st December last, there were registered in the 827 Registrars' Districts in Ireland 24,736 births—a number equal to an annual birth-rate of 22·6 in every 1,000 of the estimated population*—and 18,063 deaths, representing an annual rate of 16·5 per 1,000. In the same period (according to the returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports), 4,609 persons emigrated.

In England and Wales last quarter, the birth-rate represented was 24·5 in every 1,000 of the estimated population, and the death-rate 14·2 per 1,000.

The birth-rate in Ireland for the quarter is 0·7 above the average rate for the corresponding quarter of the ten years 1899–1908, and 0·8 above the rate for the fourth quarter of 1908. The deaths are 744 above those registered in the corresponding quarter of 1908; the death-rate is 0·7 above the rate for that quarter, but equal to the average for the fourth quarter of the ten years 1899–1908.

Compared with those for the corresponding quarter of 1908, the returns of pauperism, furnished by the Local Government Board, show a decrease

* See page 386.

of 2,163 in the average number of Workhouse inmates on Saturdays during the quarter, and a decrease of 1,078 in the average number of persons on out-door relief.

Compared with the averages for the fourth quarter of the ten years 1899-1908, the number of Workhouse inmates shows a decrease of 1,086 and the number of persons on out-door relief shows a decrease of 1,508, the total under both heads being 2·6 per cent. under the average for the fourth quarter of the ten years. The estimated decrease in the population as compared with the average population for those years is 1·1 per cent.

The annual marriage-rate (5·1 per 1,000 of the population) represented by the marriages registered during the third quarter of 1909 is 0·3 above the average rate for the corresponding quarter of the preceding ten years.

TABLE I.—Showing for each Province and County in Ireland, the Annual Rate per 1,000 of the Population,* represented by the number of Marriages registered during the Quarter ended 30th September, 1909, and by the Births and Deaths registered in the Quarter ended 31st December, 1909.

* The rates for the total of Ireland and for the county boroughs of Dublin and Belfast and Londonderry county and county borough are calculated on the estimated population in the middle of the year; those for the provinces and remaining counties on the population according to the Census of 1901. See note (*) page 325.

MARRIAGES.

The marriages (5,555) registered in Ireland during the third quarter of 1909 are equivalent to an annual rate of 5·1 per 1,000 of the estimated population, being 0·1 above the rate for the corresponding quarter of 1908, and 0·3 above the average rate for the third quarter of the ten years 1899–1908. Of the total number of marriages 3,690 were registered under the provisions of the 26 and 27 Vic., cap. 90, and 1,865 under the 7 and 8 Vic., cap. 81; the former number being equal to an annual rate of 4·5 per 1,000 of the estimated Roman Catholic population, and the latter affording a rate of 6·6 per 1,000 of the members of all other religious persuasions. The rate under the former heading is 0·3 above, but that under the latter 0·1 below the average rate for the corresponding quarter of the previous ten years.

It is to be borne in mind that in many parts of the country the greater portion of the annual number of Roman Catholic marriages is celebrated in the first quarter, while as regards other marriages the number in the first quarter is generally less than that for any of the other quarters of the year.

TABLE II.—Showing by Quarterly Periods the Marriages registered in Ireland in each of the ten years 1899–1908, and the average number for that period; also the number registered in the first second and third quarters of 1909.

BIRTHS.

The number of births registered during the quarter ended 31st December last was 24,736—12,777 boys and 11,959 girls—being equal to an annual ratio of 1 in every 44·2, or 22·6 per 1,000 of the estimated population. The average number of births registered during the corresponding quarter of the ten years 1899–1908 was 24,141, equivalent to an annual rate of 21·9 per 1,000 of the estimated mean population of those years.

The respective birth-rates for the four provinces* last quarter are—Leinster, 22·9 per 1,000 of the population according to the Census of 1901; Munster, 22·0; Ulster, 22·6; and Connaught, 20·4.

The highest county or county borough birth-rate* is 29·7 for Dublin county borough, and the lowest 17·5 for Cavan county. Of the intermediate rates the highest five are—Belfast county borough, 26·8; Limerick county and county borough, 23·9; Kerry county, 23·4; Kildare county, 23·3; and Waterford county and county borough, 22·7. The lowest five are—King's county, 17·7; Monaghan, 18·2; Dublin county, 18·2; Longford, 18·4; and Roscommon, 18·7.

DEATHS.

The number of deaths registered in Ireland during the quarter ended 31st December last was 18,063—8,924 males and 9,139 females—affording an annual ratio of 1 in every 60·5, or 16·5 per 1,000 of the estimated population; the average rate for the corresponding quarter of the ten years 1899–1908 was also 16·5 per 1,000.

The death-rate in Leinster was 17·9 per 1,000 of the population according to the Census of 1901; in Munster, 14·8; in Ulster, 17·2; and in Connaught, 13·1.

The county or county borough death-rates* range from 11·5 in Kerry county to 22·4 in Dublin county borough. Between these rates the lowest five are—Mayo, 11·7; Queen's county, 13·2; Galway, 13·2; King's county, 13·7; and Leitrim, 14·0; and the highest five are—Carlow, 20·1; Belfast, county borough, 19·1; Armagh, 18·2; Antrim, 17·8; and Londonderry county and county borough, 17·2.

TABLE III.—Showing by **Quarterly Periods** the number of **Births** and **Deaths** registered in Ireland in each of the ten years 1899–1908, and the average number for that period; also the number registered during each quarter of the year 1909:—

* See note (*) on page 300.

Ages.—Of the 18,063 deaths registered last quarter, 2,279, or 12·6 per cent., were of infants under 1 year of age; and 8,396, or 46·5 per cent., were of persons aged 60 years and upwards. The deaths of infants under 1 year old are equal to 92·1 per 1,000 of the births registered. In the province of Leinster the number of deaths of children under 1 year old equalled 14·2 per cent. of the total deaths registered therein; in Munster, 12·3 per cent.; in Ulster, 13·2 per cent.; and in Connaught, 7·5 per cent. The deaths of persons 60 years old and upwards registered during the quarter in Leinster are equal to 42·8 per cent.; in Munster, to 47·6 per cent.; in Ulster, to 45·8 per cent.; and in Connaught, to 55·6 per cent. of the total deaths registered in the province.

HEALTH OF THE PEOPLE.

Diseases.—The total number of deaths from the principal epidemic diseases* is 752, or 84 below the number registered in the corresponding quarter of 1908, and is equivalent to an annual rate of 0·7 per 1,000 living, being 0·1 below the rate for the fourth quarter of 1908, and 0·2 below the average rate for the fourth quarter of the ten years 1899–1908.

The following tabular statement shows the mortality from each of the principal epidemic diseases, as registered during the December quarter of 1909, also the average number of deaths registered from each of these diseases, in the corresponding period of the 5 years 1904–1908.

Name of Disease.	Number of Deaths in December quarter, 1909.	Average number of Deaths in December quarter of the 5 years, 1904–1908.
Small-pox,	—	2
Measles,	66	156
Scarlet Fever,	33	41
Typhus,	13	12
Whooping-cough,	247	154
Diphtheria,	85	91
Pyrexia (origin uncertain),	4	11
Enteric Fever,	69	112
Diarrhoeal Diseases,	235	337

Small-pox.—From the returns of the Registrars it appears that there was not one death from small-pox registered in the quarterly period under notice, neither was there any mention of the presence of the disease reported to the Registrar-General.

Measles.—During the year 1909, there were 160 deaths from measles, returned for March quarter, 109 for June quarter, and 66 for September quarter, the number for the period under notice being also 66; this number is below the average number of deaths (156) in the corresponding quarter of the years, 1904–1908. In Abstract IV., pp. 380–385, the

* See note (†) on page 309.

number of deaths from measles is given by unions in alphabetical order ; amongst others there were 7 deaths in Clonakilty union, 11 in Granard union, and 13 in Skibbereen union.

Scarlet Fever.—There were 33 deaths from scarlet fever registered for the whole of Ireland in the December quarter of 1909 ; in the three preceding quarterly periods the deaths from this disease numbered 32, 40, and 31, respectively, the average for the December quarter of the preceding quinquennial period being 41. It may be seen in the Abstract commencing on page 324 that of the total deaths 13 were registered in the province of Leinster, 8 in Munster, 11 in Ulster, and one in Connaught.

Typhus.—The total number of deaths from typhus during the year, as returned by the Registrars, was for March quarter 15, for June quarter 13, for September quarter 7, and for the period under notice 13—in all 48 deaths. The number for the quarter under notice is one over the average for the fourth quarter of the past five years. The 13 deaths were registered in the following Superintendent Registrars' districts :—Ballina, one death ; Ballymena, one death ; North Dublin, one death ; Dunfanaghy, one death ; Ennistimon, one death ; Galway, 2 deaths ; Killala, 2 deaths ; Kilrush, one death ; Sligo, one death ; Swineford, one death, and Tipperary, one death.

Whooping-cough.—An examination of the Abstract shows that the mortality from whooping-cough was general over the country. Of the total deaths, namely 247, 121 were in the province of Ulster, and of this number 83 were registered in Belfast. The total mortality for the quarter exceeds the average for the corresponding quarter of the 5 years, 1904–8, by 93, and is equivalent to an annual rate of 0·23 per 1,000 of the population of Ireland estimated to the middle of the year. In the earlier quarters of the year deaths from this disease numbered 272, 351, and 234, respectively. In Abstract III. the deaths from whooping-cough occurring in the Registrars' districts are shown ; from this it appears that among others there were 13 deaths in Dublin county borough, 5 in the Registrar's district of Clara, 5 in Tullamore, 7 in Kinsale, 5 in Tralee No. 2 district, 10 in the district of Limerick city No. 3, 4 in Rathkeale No. 1, 4 in Cashel, and, as before stated, 83 in Belfast county borough, the latter figure corresponding to an annual death-rate of 0·86 per 1,000 of the estimated population of Belfast county borough.

Diphtheria.—Compared with the average, the deaths from diphtheria, numbering 85, show a decrease of 6. In each of the three preceding quarters, deaths from diphtheria numbered 115, 71, and 98. Of 17 deaths in the province of Leinster, 3 were in North Dublin union, and 6 in South Dublin union ; of 16 deaths in Munster, 3 occurred in the union of Skull ; of 41 deaths in Ulster, 4 were registered in Ballymena union, 6 in Inishowen, 3 in Londonderry, 3 in Newtownards, and 4 in Strabane ; and of the 11 deaths in Connaught, there were 3 in the union of Strokestown, 4 in Tuam, and 3 in Westport.

Enteric Fever.—The mortality from enteric fever which had declined from 81 deaths registered in the March quarter of 1909 to 76 in the June quarter, and again to 63 in the September quarter, rose to 69 deaths in the period under notice ; this figure is far below the average (112) for the corresponding quarter of the preceding 5 years. Of the 20 deaths in Leinster, 10 occurred in Dublin county borough, and 5 in the county of

Louth ; of 21 deaths in Munster, 9 were registered in the county and county borough of Cork, and 7 in the county and county borough of Limerick ; of 18 deaths in Ulster, 5 occurred in the county borough of Belfast ; and of 10 deaths in Connaught, 4 were registered in the county of Galway.

Four deaths were classified to pyrexia (origin uncertain).

Diarrhoeal Diseases.—The annual rate corresponding to the deaths from diarrhoeal diseases, 235 in number, is 0·22 per 1,000 of the population estimated to the middle of the year 1909. In the first three quarters of the year, deaths from diarrhoeal diseases were 167, 138, and 496, respectively. It may be seen in the Abstracts that the mortality from the diseases in this group fall principally upon the urban populations, *e.g.*, out of 64 deaths in Leinster, 33 were in Dublin county borough ; out of 62 deaths in Munster, 18 were in Cork county borough and 5 were in Waterford county borough ; and of 91 deaths in Ulster, 40 were in Belfast county borough. Only 18 deaths from diarrhoeal diseases were reported from the province of Connaught.

Tuberculous Disease.—The quarterly returns of the Registrars of deaths in Ireland contain the collective information that 2,171 persons succumbed to some form of tuberculous disease. The above figure corresponds to an annual death rate from the disease of 1·99 per 1,000 of the population. The details concerning the mortality for each Registrar's district may be found in Abstract III. of this report.

The Registrar-General begs to acknowledge his thanks to those Registrars who have favoured him with notes regarding matters affecting the public health of their districts. These are printed generally in the Appendix to this report, and the following notes are introduced into this paragraph as having reference to the status of tuberculous disease. It is noteworthy that in some instances improvement is stated to be taking place—see the notes of the Registrar of Banbridge and others :—

Roscrea, Roscrea No. 2.—“ District very healthy ; no deaths from consumption, nor are there any cases of this disease, so far as I know, in the district.”

Athlone, Athlone No. 1.—“ No less than eight deaths out of the thirty-eight registered were due to tuberculosis in one form or another.”

Mullingar, Ballynacarrigy.—“ The death rate due to tuberculosis is abnormally high this quarter.”

Mullingar, Milltown.—“ There were two deaths of young people in the twenties from tuberculosis.”

Naas, Blessington.—“ Four deaths occurred from phthisis.”

Listowel, Ballyduff.—“ Six out of the thirteen deaths registered were due to tuberculous diseases, five of them being due to phthisis pulmonalis.”

Ballycastle, Cushendall.—“ One of the three deaths from tuberculosis was imported.”

Lisburn, Glenavy.—“ Damp season has been particularly severe on tubercular cases, causing a heavy proportion of deaths.”

Armagh, Loughgall.—“At present time district appears to have very little tuberculous disease.”

Dunfanaghy, Crossroads.—“Four deaths from tubercular diseases were registered during the quarter.”

Millford, Rossguill.—“During the quarter only one death reported from pulmonary tuberculosis.”

Banbridge, Banbridge.—“A very gratifying decrease in the mortality from all forms of tuberculous disease in the rural part of this dispensary district for the past three years. The number of deaths were :—1907, 32 ; 1908, 19 ; 1909, 16.”

Enniskillen, Holywell No. 1.—“Two deaths were registered, both men ; one died at 27 of pulmonary tuberculosis.”

Malignant Disease.—The summary of the returns furnished by the Registrars shows a total of 841 deaths, in which are included deaths from carcinomia, sarcoma, and from cancer, or malignant disease, not otherwise defined. The total figure corresponds to an annual rate of 0·77 per 1,000 of the population. In the three previous quarters the annual rates for malignant disease were 0·78, 0·69, and 0·73, respectively.

Cerebro-spinal Fever.—There was one death from cerebro-spinal fever reported by the Registrar of Belfast Urban No. 4 district.

Violence.—The deaths by violence numbered 288 ; this figure includes fatalities due to accident, homicide, and suicide.

The Registrars, in their Notes, report the presence of the following diseases :—Measles in 29 districts, scarlet fever in 24, whooping-cough in 45, diphtheria in 24, fever in 20—typhus in 7, and enteric in 13—influenza in 25, cerebro-spinal fever in one district, chicken pox in one district, and mumps in one district. [See Appendix to this Report commencing on page 387.]

Inquests.—There were 452 inquests reported to the Registrars during the quarter ; this number being equal to 1 in every 40 of the total deaths registered.

In Leinster there was 1 inquest to every 38 deaths registered, in Munster 1 to 44, in Ulster 1 to 33, and in Connaught 1 to 96.

Deaths in Public Institutions.—Of the 18,063 deaths registered, 3,640, or 20·2 per cent., occurred in public institutions. In Leinster the percentage was 28·8, in Munster 23·9, in Ulster 13·8, and in Connaught 12·6.

Uncertified Deaths.—According to the returns, 4,355 of the total 18,063 deaths which were registered during the quarter were uncertified, being more than 24 per cent. of the total.

The following table (Table IV.) shows the number of deaths from the principal epidemic diseases returned by the Registrars as having been registered during the quarter ended 31st December, 1909, and in each of the eight quarters immediately preceding; with the ratio of these deaths to the deaths from all causes and to the population :—

PERIOD.	Total Deaths registered.	Deaths from Principal Epidemic Diseases.										Total.	Percentage of Total Deaths.	Number in every 100,000 of the Population.

* Formerly described as "Simple Continued Fever."

URBAN DISTRICTS.

Separate statistics for the Urban Districts are given in Table V.

The death-rate for last quarter in these districts, which contain nearly one-third of the total population of the country, was 19·5, and the birth-rate 27·1 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the death-rate was 14·8 and the birth-rate 20·1 per 1,000.

The annual rate represented by the deaths from the Principal Epidemic Diseases† in the Urban Districts during the quarter was 1·1 per 1,000 of the population, according to the Census of 1901; in the remainder of the country the rate was 0·5 per 1,000.

TABLE V.—BIRTHS and DEATHS registered during the FOURTH QUARTER of the year 1909, in the DUBLIN REGISTRATION AREA, and in each of the PROVINCIAL URBAN DISTRICTS in IRELAND (exclusive of Deaths in Public Institutions of Persons admitted from other localities), with the number of deaths from each of the PRINCIPAL EPIDEMIC DISEASES;† from all forms of TUBERCULOUS DISEASE, and from CANCER, Malignant Disease, with the number of Uncertified Deaths.

NOTE.—“The Dublin Registration Area” consists of the City of Dublin and the Urban Districts of Rathmines and Rathgar, Pembroke, Blackrock, and Kingstown. The details for it and for each of the twenty-one Urban Districts marked thus (*) in the following Table have been compiled from the Weekly Returns furnished by the Registrars, and relate to the thirteen weeks ending Saturday, 1st January, 1910.

VACCINATION.

According to the Returns of Primary Vaccinations received for the fourth quarter of the year 1909, there were 19,369 persons successfully vaccinated.

EMIGRATION.

According to the Returns obtained by the Royal Irish Constabulary and the Metropolitan Police, who acted as enumerators at the several Irish seaports, the number of emigrants who left Ireland during the quarter ended 31st December last was 4,609 (2,336 males and 2,273 females), being 543 more than in the corresponding quarter of the year 1908, but 1,429 below the average number for the fourth quarter of the ten years 1899–1908.

TABLE VI.—EMIGRATION from IRELAND during* the months of October, November, and December in 1908 and 1909 :—

* Including 3,301 emigrants to the United States of America, viz.:—2,209 in the month of October, 763 in November, and 329 in December. Of 2,824 steerage passengers, 787 had their passages paid for in America.

PRICES AND PAUPERISM.

The average price of Messrs. Boland's (Limited) 4-lb. loaf for last quarter was $6\frac{1}{2}d.$, which was also the average price of Messrs. Johnston, Mooney, and O'Brien's (Limited) bread, delivered. In the fourth quarter of the year 1908 the average price was $6d.$, and in the corresponding quarter of 1899 it was $5\frac{1}{2}d.$

The average price of oatmeal (1st quality) in Dublin for the quarter was 13s. 11d. per cwt. For the corresponding quarter of the year 1908 the average price was 15s., and for the fourth quarter of 1899 the average price was 14s. per cwt.

The average prices per cwt. of potatoes at the Dublin Potato Market for the quarter were 2s. 4d. to 2s. 8d. In the fourth quarter of 1908 the average prices were 2s. 3d. to 2s. 6d., and the prices for the corresponding quarter of 1899 were 2s. 3d. to 2s. 11d.

The average prices of beef at the Dublin Cattle Market during the quarter were from 51s. to 57s. 6d. per cwt. In the corresponding quarter of 1908 the average prices were from 51s. to 55s. 6d. and in the fourth quarter of 1899 they were from 49s. to 57s. 6d.

The price (including cartage) of Whitehaven coal in the City of Dublin for the quarter ranged from 20s. to 24s. per ton nett.

The highest price of Consols at the Dublin Stock Exchange for the quarter was $\pounds 85\frac{1}{8}$ and the lowest $\pounds 82\frac{3}{16}$.

The minimum annual rate of discount charged on Irish bills at the Bank of Ireland, which stood at $3\frac{1}{2}$ per cent. from the 1st April, was raised on the 7th October to 4 per cent.; on the 14th October to $4\frac{1}{2}$ per cent., and on the 21st December to 5 per cent.

NOTE.—The prices of Consols at the Dublin Stock Exchange have been kindly furnished by the Secretary.

The average number of persons in Ireland receiving in-door relief on Saturdays during the fourth quarter of 1909 was 42,547, or 2,163 below the average for the corresponding period in 1908.

The average weekly number of persons receiving out-door relief during the quarter was 54,657 being 1,078 below the average for the fourth quarter of 1908.

Of the persons receiving in-door relief during the fourth quarter of 1909, an average number of 1,657 in each week was located in asylums for the blind and the deaf and dumb, and in extern hospitals; in the corresponding quarter of 1908 the average weekly number was 1,536.

TABLE VII.—AVERAGE PRICES in DUBLIN of BREAD, OATMEAL, POTATOES, and BEEF, during each week of the FOURTH QUARTER of the year 1909, and the NUMBER of PERSONS in IRELAND receiving IN-DOOR and OUT-DOOR RELIEF on Saturday in each week; also the AVERAGE PRICES of PROVISIONS and the AVERAGE NUMBER of PERSONS in RECEIPT of RELIEF during the quarter, and in the corresponding quarters of the previous ten years.

(a) Messrs. Bolands, Limited.

(b) Messrs. Johnston, Mooney, and O'Brien's (Limited) 4lb. loaf delivered; the price in Messrs. Johnston, Mooney, and O'Brien's shops, exclusive of delivery, was 4d. per 4lb. loaf lower.

NOTE.—The price of Oatmeal given in the above Table has been derived from tables in the Dublin Gazette; and the average prices of Potatoes and Beef have been compiled from the Dublin Journals. The number of Persons receiving In-door and Out-door Relief has been kindly supplied by the Local Government Board.

THE WEATHER.

The following particulars have been derived from returns of meteorological observations taken at the Ordnance Survey Office,* Phœnix Park, Dublin, during the fourth quarter of the years 1904–1909, respectively,

* Latitude 53° 21' 48" 25" north; longitude 6° 20' 59" 15" west. Height above the sea 155' 3 feet. The barometrical readings have been corrected for altitude and reduced to 32° Fahrenheit.

furnished by direction of the Superintendent of the Ordnance Survey (see Table on page 320).

The mean height of the barometer during the fourth quarter of 1909 was 29·619 inches, being 0·251 below the average for the corresponding quarter of the five years 1904-1908; the highest reading (30·347 inches) was on the 24th November, at 9 A.M., wind W.S.W., and the lowest (28·221 inches) on the 2nd December, at 9 P.M., wind S.W.

The mean temperature of the air during the quarter was 43·4°, being 1·5° below the average for the fourth quarter of the 5 years 1904-1908.

The maximum temperature of the air during the quarter was 66·0° and the minimum 8·8°. The maximum heat in sun was 110·5°.

Rain or snow fell on 64 days during the quarter. The rain-fall measured 8·483 inches, being 2·338 inches above the average for the fourth quarter of the five years 1904-1908. The greatest monthly rain-fall was in December, when 3·735 inches were registered.

The wind blew on 28 days from S.W., on 14 days from W., on 9 days from E., on 8 days from S., on 6 days from N.E., on 2 days from N., on 2 days from N.W., on one day from S.E., and the air was calm on 22 days at 9 A.M.

October.—The mean height of the barometer during this month was 29·528 inches; the highest reading (30·147 inches) was on the 31st at 9 P.M., air calm; and the lowest (28·899 inches) on the 5th, at 9 A.M., wind S.W. The mean temperature of the air was 49·2°, the maximum registered was 66·0°, and the minimum 24·8°. The 3rd was the warmest day, and the 31st the coldest night. The mean of the dry bulb was 49·1°, and of the wet bulb 47·5°. The maximum heat in sun was 110·5°, and the minimum on the grass 18·8°. The minimum on the grass was below 32° on 7 nights. The total amount of sunshine recorded was 120·2 hours, the greatest daily amount being 8·6 hours on the 6th. The maximum ozone was 0·6, the minimum 0·0, and the mean 0·5. Rain or snow fell on 25 days. The rain-fall measured 3·260 inches; the greatest amount in 24 hours was 0·650 inch on the 23rd.

November.—The mean height of the barometer during this month was 29·878 inches; the highest reading (30·347 inches) was on the 24th at 9 A.M., wind W.S.W., and the lowest (28·921 inches) on the 29th, at 9 P.M., wind S.W. The mean temperature of the air was 41·3°, the maximum registered was 58·6°, and the minimum 20·9°. The 3rd was the warmest day, and the 16th the coldest night. The mean of the dry bulb was 40·5°, and of the wet bulb 38·6°. The maximum heat in sun was 90·8°, and the minimum on the grass 16·2°. The minimum on the grass was below 32° on 19 nights. The total amount of sunshine recorded was 89·6 hours, the greatest daily amount being 7·2 hours on the 6th. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·5. Rain or snow fell on 16 days. The rain-fall measured 1·488 inches; the greatest amount in 24 hours was 0·700 inch on the 13th.

December.—The mean height of the barometer during this month was 29·451 inches; the highest reading (30·307 inches) was on the 14th at 9 P.M., wind E.N.E., and the lowest (28·221 inches) on the 2nd, at 9 P.M., wind S.W. The mean temperature of the air was 39·8°, the maximum registered was 55·7°, and the minimum 8·8°. The 10th was the warmest day, and the 21st the coldest night. The mean of the dry bulb was 39·7°, and of the wet bulb 38·2°. The maximum heat in sun was 89·5°, and the minimum on the grass 9·0°. The minimum on the grass was below 32° on 17 nights. The total amount of sunshine recorded was 37·2 hours, the greatest daily amount being 4·7 hours on the 24th. The maximum ozone was 0·7, the minimum 0·0, and the mean 0·5. Rain or snow fell on 23 days. The rain-fall measured 3·735 inches; the greatest amount in 24 hours was 0·600 inch on the 5th.

TABLE OF METEOROLOGICAL DATA FOR IRELAND.

*Prepared in the Meteorological Office under the direction of
W. N. Shaw, Esq., LL.D., Sc.D., F.R.S.*

In compiling the following Table (pp. 322 and 323), the stations have been grouped into two Districts, namely, 1. Ireland, North; 2. Ireland, South. Each District is represented by six stations.

The stations selected, with the names of the Observers, are as follows:—

LIST OF STATIONS AND OBSERVERS.

Station.	Observer.
IRELAND, NORTH:—	
Malin Head,	Meteorological Office.
Blacksod Point,	Do.
Markree Castle,	J. R. Armstrong, for Bryan Cooper, Esq.
Donaghadee,	Meteorological Office
Armagh, The Observatory, . .	J. L. E. Dreyer, Ph.D.
Belfast, Queen's College, . .	John Wylie, B.A.
IRELAND, SOUTH:—	
Dublin (City),	Sir John W. Moore, M.D.
Waterford,	J. N. White, Esq.
Birr Castle,	O. Boeddicker, Ph.D., for the Earl of Rosse.
Killarney,	E. W. Griffin, M.D.
Valencia,	Meteorological Office.
Roche's Point,	Do.

NOTES ON THE STATISTICAL TABLES.

Hours of Observation.—The hours of observation are indicated by the type in which the names of the stations are printed. CAPITALS, normal climatological stations, 9 a.m. and 9 p.m.; *ITALIC CAPITALS*, telegraphic reporting normal climatological stations, 7 a.m., 1 p.m., 9 p.m.; Roman, telegraphic reporting stations, 7 a.m., 1 p.m., 6 p.m.; *Italics*, auxiliary climatological stations, 9 a.m. only. At Valencia an additional observation is taken at 3 p.m. The afternoon observations are used in preparing the wind summaries and in computing the number of days of "overcast" or "clear sky." At telegraphic reporting stations (black capitals or Roman type) the results given under "hygrometer" and "cloud" are based on the morning observations only.

Barometer.—The correction for latitude has not been applied. The values are for station level. They are the means of readings at 9 a.m. and 9 p.m., or 7 a.m., 1 p.m., 9 p.m., or 7 a.m., and 6 p.m., as the case may be.

Rainfall.—The amounts are for the 24 hours commencing at the time of morning observation.

Weather Phenomena.—The number of days of Rain, Snow, Hail, Thunderstorm, Fog and Gale, are counted irrespective of the hours at which the phenomena occur. Except in the case of rainfall (see above) the day is the civil day. A day is reckoned as a day of "clear sky," if the average of the estimates of the "amount of cloud" at the hours of observation is less than 2, and as an "overcast" day if the average is greater than 8.

Wind Summaries.—The results given under wind direction, and the number of observations of calms and of fresh or strong wind, are based on the observations at fixed hours. At Valencia and Armagh the wind observations are based on the records of a standard Robinson anemometer (factor 2.2). Velocities of between 13 and 38 miles in the hour have been entered as "fresh or strong winds," velocities of 39 miles in the hour, or above, as gales.

Averages.—The averages used for stations are—Temperature and Rainfall for the 35 years 1871-1905; Bright Sunshine for the 25 years 1881-1905.

District Values.—The district values of temperature, rainfall, and sunshine are computed from the data for the stations included in the Weekly Weather Report of the Meteorological Office. Only a selection of these stations is included in this Report. The average values with which the current district values are compared are for the 25 years, 1881-1905. The district values for "amount of cloud" and for the extremes of temperature and the largest rainfall in a day, are taken from the Monthly Weather Report of the Meteorological Office.

Station.	Height of Barometer Cistern above M.S.L.	Barometer.	Air Temperature.						Hygrometer.				Earth Temperature.		Bright Sunshine.					
			Mean of		Mean of A and B.	Difference from Normal.	Absolute Maximum and Minimum.			Mean of Observations at 9 a.m. and 9 p.m., or at 7 a.m.				At 1 foot depth.	At 4 feet depth.	Total Observed.	Difference from Normal.	Per cent. of Possible.		
			Maximum.	Minimum.			Maximum.	Day of Month.	Minimum.	Day of Month.	Dry Bulb.	Depression of Wet Bulb.	Vapour Pressure.						Humidity.

NOTE.—This table has been constructed for the years 1835 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1909—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—Three cases of scarlet Fever occurred during the quarter; two of the patients were removed to hospital, and in each case every precaution was taken to prevent the spread of the disease.

CARLOW; *Bagenalstown*.—During the quarter ended, two deaths were registered from pulmonary tuberculosis. Vaccinations a little backward on account of severe weather. The district is healthy.

CARLOW; *Fennagh and Myshall*.—Seven out of the eleven deaths were over 70. Three of them were registered as 81, 86, and 90 years of age.

CARLOW; *Leighlinbridge*.—Health of district fairly good. Sanitary state of district fairly good.

CARLOW; *Tullow*.—One death registered was that of a person aged 95 years.

Dublin County.

BALROTHERY; *Balbriggan*.—Six of the eleven deaths registered are of people over sixty.

DUBLIN, SOUTH; *Crumlin*.—This district is in a fairly healthy state for this time of the year.

DUBLIN, SOUTH; *Tallaght*.—The district is in a healthy condition.

RATHDOWN; *Blackrock and Stillorgan, No. 2*.—District in a healthy state.

Dublin County Borough.

DUBLIN, NORTH; *North City, No. 1 West*.—District in healthy condition.

Kildare County.

BALTINGLASS; *Baltinglass No. 2*.—Nearly all vaccinations postponed in consequence of severe weather.

CELBRIDGE; *Celbridge, W*.—District very healthy.

CELBRIDGE; *Kilcock*.—Considering the severe weather we have had during part of last quarter, the health of this district has been very good.

CELBRIDGE; *Maynooth*.—District very healthy. Two old age pensioners died during the year.

EDENDERRY; *Carbury*.—Some cases of vaccination postponed owing to severity of weather.

EDENDERRY; *Rathangan, No. 1*.—A death registered, cancer of stomach, a woman aged 60 years, duration 9 months. Also the death of a woman, pulmonary phthisis, duration about eight months. She was a farmer's daughter, age 25 years, about a year married.

NAAS; *Ballymore Eustace*.—No case of infectious disease in the district.

NAAS; *Naas and Carragh, W*.—A sewerage system has nearly been completed in Naas urban district, and a sewerage and waterworks are about being contracted for in Sallins.

Kilkenny County.

CALLAN; *Kilmaganny*.—District healthy.

CASTLECOMER; *Ballyragget*.—Sanitary arrangements very fair; all the diseases named in the abstracts absent.

CASTLECOMER; *Castlecomer, W*.—The district at present is in a healthy state.

POPULATION of IRELAND (including Army, Navy, and Merchant Seamen on shore and in port) *estimated* to the middle of each of the Seventy-five Years 1835 to 1909.

NOTE.—This table has been constructed for the years 1835 to 1841—By adopting the rate of increase between the population of 1831 and 1841, according to the Irish Census Report of 1841.

1842 to 1846—By taking the English average birth-rate of 1 in 31, and death-rate of 1 in 45, and deducting the annual emigration from Ireland according to the returns received from the Emigration Commissioners in England.

1847 to 1851—The English birth-rate, as above, was used, deducting the number of deaths and the number of emigrants in each year, as given in the Irish Census Reports of 1851; an allowance, proportioned to the number of recorded deaths and the number of emigrants being made in each year for the excess of the number thus arrived at for 1851 over the actual population according to the Census of that year.

1852 to 1871—The English birth and death-rates, as above, were used, deducting the number of emigrants, according to the returns obtained by the Registrar-General for Ireland, and allowing for excess over Census numbers for 1861 and 1871, as explained for the last period.

1872-1909—By adding the Births registered in each year to the estimated population for the previous year, deducting the deaths and emigration, and adjusting the results for the years 1872-81, 1882-91, and 1892-1901, to allow for the discrepancy between the number thus arrived at for 1881, 1891, and 1901 respectively, and the population as shown by the Census in each of these years.

APPENDIX.

REGISTRARS' NOTES.

On the form supplied to each Registrar for the purpose of furnishing his Quarterly Return he is requested by the Registrar-General to make such observations as he may consider desirable with reference to the Sanitary arrangements in the District, the prevalence or fatality of Epidemic or other diseases, and, in general, any circumstance affecting the Public Health which, in his opinion, deserves attention.

In compliance with this request, remarks have, in many instances, been appended by the Registrars to their Returns, from which the following Notes have been selected.

The Registrars alone must be considered responsible for the opinions which they express.

Superintendent Registrars' Districts are printed in SMALL CAPITALS, and the Registrars' Districts in italics. The letter W denotes that the Union Workhouse is situated in the District.

I.—PROVINCE OF LEINSTER.

Carlow County.

BALTINGLASS; *Rathvilly*.—Three cases of scarlet Fever occurred during the quarter; two of the patients were removed to hospital, and in each case every precaution was taken to prevent the spread of the disease.

CARLOW; *Bagenalstown*.—During the quarter ended, two deaths were registered from pulmonary tuberculosis. Vaccinations a little backward on account of severe weather. The district is healthy.

CARLOW; *Fennagh and Myshall*.—Seven out of the eleven deaths were over 70. Three of them were registered as 81, 86, and 90 years of age.

CARLOW; *Leighlinbridge*.—Health of district fairly good. Sanitary state of district fairly good.

CARLOW; *Tullow*.—One death registered was that of a person aged 95 years.

Dublin County.

BALROTHERY; *Balbriggan*.—Six of the eleven deaths registered are of people over sixty.

DUBLIN, SOUTH; *Crumlin*.—This district is in a fairly healthy state for this time of the year.

DUBLIN, SOUTH; *Tallaght*.—The district is in a healthy condition.

RATHDOWN; *Blackrock and Stillorgan, No. 2*.—District in a healthy state.

Dublin County Borough.

DUBLIN, NORTH; *North City, No. 1 West*.—District in healthy condition.

Kildare County.

BALTINGLASS; *Baltinglass No. 2*.—Nearly all vaccinations postponed in consequence of severe weather.

CELBRIDGE; *Celbridge, W.*—District very healthy.

CELBRIDGE; *Kilcock*.—Considering the severe weather we have had during part of last quarter, the health of this district has been very good.

CELBRIDGE; *Maynooth*.—District very healthy. Two old age pensioners died during the year.

EDENDERRY; *Carbury*.—Some cases of vaccination postponed owing to severity of weather.

EDENDERRY; *Rathangan, No. 1*.—A death registered, cancer of stomach, a woman aged 60 years, duration 9 months. Also the death of a woman, pulmonary phthisis, duration about eight months. She was a farmer's daughter, age 25 years, about a year married.

NAAS; *Ballymore Eustace*.—No case of infectious disease in the district.

NAAS; *Naas and Carragh, W.*—A sewerage system has nearly been completed in Naas urban district, and a sewerage and waterworks are about being contracted for in Sallins.

Kilkenny County.

CALLAN; *Kilmaganny*.—District healthy.

CASTLECOMER; *Ballyragget*.—Sanitary arrangements very fair; all the diseases named in the abstracts absent.

CASTLECOMER; *Castlecomer, W.*—The district at present is in a healthy state.

KILKENNY; *Tiscoffin*.—Health of district very good.

KILKENNY; *Tullaroan*.—Births registered during past quarter were all males; deaths were all females, except one.

NEW ROSS; *Dysartmoon*.—District healthy.

THOMASTOWN; *Inistioge*.—District fairly healthy. District was free from infectious diseases during the quarter. Vaccination satisfactory.

THOMASTOWN; *Knocktopher*.—District in a very healthy condition.

URLINGFORD; *Urlingford, W.*—Vaccinations not up to average. Health of district fairly good. No epidemic cases. Pneumonia rather prevalent.

King's County.

BIRR; *Ferbane*.—Epidemic of measles during quarter.

BIRR; *Frankford*.—The health of this district has been good during the quarter ending 31st December, 1909.

BIRR; *Kinnitty*.—Health of district fair. Sanitary condition fair. Vaccinations very small in number owing to inclement weather.

MOUNTMELICK; *Clonygowan, No. 2*.—District healthy; vaccinations small owing to severe weather.

ROSCREA; *Roscrea, No. 2*.—Vaccination backward owing to severe weather. District very healthy, no deaths from consumption, nor are there any cases of this disease, so far as I know, in the district. Birth rate above the average.

ROSCREA; *Shinrone*.—District healthy. Eight out of the eleven deaths registered were over 60 years.

TULLAMORE; *Killoughy*.—Sanitary arrangements good.

TULLAMORE; *Philipstown*.—Two deaths registered at 81 and 85 years of age. District healthy.

Longford County.

BALLYMAHON; *Abbeyshrule*.—Four deaths registered from 76 to 90 years. One case of triplets registered. District healthy.

BALLYMAHON; *Ballymahon, W.*—The sanitary condition of the district is satisfactory.

GRANARD; *Ballinalee*.—The district is healthy and free from contagious disease.

GRANARD; *Granard, W.*—An epidemic of measles occurred, from which nine deaths resulted.

GRANARD; *Scrabby, No. 2*.—Sanitary arrangements of the district fairly satisfactory. An epidemic of measles prevailed during the quarter in part of this district. No fatality from the disease recorded. Vaccination in a rather backward state.

LONGFORD; *Killashee*.—General health of the district fairly good. The water supply is unsatisfactory.

Louth County.

ARDEE; *Castlebellingham*.—District healthy.

ARDEE; *Collon, No. 1*.—District healthy.

ARDEE; *Dunleer*.—District healthy.

DROGHEDA; *Ternonfeckin*.—There have been a few cases of scarlatina, also a few cases of whooping-cough (pertussis) during the last month of the quarter. One death, that of an infant, from the latter disease, complicated by broncho-pneumonia, has been registered. District otherwise healthy.

DUNDALK; *Barronstown*.—There has been no recurrence of the fever (typhus) that existed last quarter, and the district is now in a healthy state and free from zymotic disease.

DUNDALK; *Dromiskin*.—Death of a centenarian registered. District in a healthy state.

Meath County.

ARDEE; *Collon, No. 2*.—District very healthy.

ARDEE; *Drumcondra*.—Some cases of scarlatina occurred during quarter.

DROGHEDA; *St. Mary's*.—Sanitary state of district is fairly good.

DROGHEDA; *Stamullen*.—District healthy.

DUNSHAUGHLIN; *Killeen*.—Sanitary condition fairly good. Scarlet fever is in district, but at present is limited to one family.

DUNSHAUGHLIN; *Ratoath, W.*—Sanitary condition of the district is good.

EDENDERRY; *Ballyboggan*.—Health of district good. Deaths registered at 92, 95, 89, 75, and 64 years. The remaining two deaths included a child 3 days old, and a sudden death at 56 years of age.

KELLS; *Kilskeer*.—District very healthy.

KELLS; *Moynalty*.—Of the ten deaths registered, three were over 80, three over 70, and four over 60 years.

KELLS; *Nobber*.—District in a very healthy state. Twelve of the fourteen deaths registered range from 65 to 95

years, averaging 80·4 years. An abnormal record, I should think. Most of them were old age pensioners, and a few recipients of outdoor relief, which disqualified them from pensions.

NAVAN; *Painestown*.—No death from cancer or tuberculous disease. The severe epidemic of pertussis has subsided.

OLDCASTLE; *Oldcastle, W.*—The district continues in a satisfactory condition.

Queen's County.

ABBEYLEIX; *Ballinakill*.—Mortality very small for quarter.

ABBEYLEIX; *Rathdowney*.—The sanitary arrangements in the district are good.

MOUNTMELICK; *Clonaslee*.—The sanitary arrangements of my district are good, there being no deaths from the diseases named in the abstracts.

MOUNTMELICK; *Clonygowan, No. 1*.—District healthy. Vaccinations small owing to severe weather.

MOUNTMELICK; *Coolrain*.—Owing to severity of weather, vaccination was in some cases postponed.

MOUNTMELICK; *Mountrath*.—District healthy.

ROSCREA; *Borris-in-Ossory*.—The health of this district has been good during the past quarter.

Westmeath County.

ATHLONE; *Athlone, No. 1, W.*—No less than eight deaths out of the thirty-eight registered were due to tuberculosis in one form or another.

ATHLONE; *Glassan*.—District very healthy.

DELVIN; *Clonmellon*.—Severe weather prevented vaccination.

MULLINGAR; *Ballynacarrigy*.—The death rate due to tuberculosis is abnormally high this quarter, whilst the death rate from malignant disease is nil.

MULLINGAR; *Castletown Geoghegan*.—Sanitary condition good.

MULLINGAR; *Milltown*.—Although the sanitary arrangements are as yet old-fashioned, still modern improvements are slowly being effected, and a complete subsoil drainage will shortly begin in this village. Owing to the severity of the weather before Christmas, vaccination is down to half. There were two deaths of young people in the twenties from tuberculosis. No deaths from cancer registered.

MULLINGAR; *Mullingar, W.*—Health of the district fairly good.

Wexford County.

GOREY; *Camolin*.—Health of district good. Sanitary condition pretty good. There are many vaccination defaulters in this district.

GOREY; *Gorey, W.*—Number of vaccinations small owing to anti-vaccination movement.

NEW ROSS; *Fethard, No. 1*.—Sanitary condition of district fairly satisfactory.

NEW ROSS; *Fethard No. 2*.—District healthy.

WEXFORD; *Bannow*.—Whooping-cough prevalent in portions of the district. Bronchial complications frequent, in consequence of the uncertain weather. Vaccination postponed until the epidemic has subsided.

WEXFORD; *Bridgetown*.—The district is free from infectious diseases.

Wicklow County.

BALTINGLASS; *Baltinglass No. 1, W.*—Nearly all vaccinations postponed in consequence of severe weather. The death of a woman aged 93 years is recorded.

BALTINGLASS; *Kiltegan*.—There were two cases of sudden death. Inquest held in one case, in the other Coroner certified inquest unnecessary. Health of district good considering inclement weather. Vaccination in satisfactory state.

NAAS; *Blessington*.—Influenza is prevalent in the district. Four deaths occurred from phthisis.

RATHDOWN; *Bray, No. 1*.—Deaths and births about the ordinary.

RATHDOWN; *Delgany*.—Health of the district good.

RATHDRUM; *Arklow*.—Vaccination in this district is very backward.

RATHDRUM; *Newcastle*.—General health of district very good.

II.—PROVINCE OF MUNSTER.

Clare County.

BALLYVAGHAN; *Ballyvaghan, W.*—The health of the district continues good. The sanitary arrangements are also good.

CORROFIN; *Corrofin, W.*—Health of district good.

ENNIS; *Crusheen*.—Health of district good.

ENNIS; *Newmarket*.—The district has been generally healthy and practically free from all forms of zymotic diseases.

ENNISTIMON; *Ennistimon, W.*—Vaccination satisfactory.

ENNISTIMON; *Milltown Malbay.*—Mumps very prevalent in district.

ENNISTIMON; *Roadford.*—District very healthy. Sanitation good.

KILLADYSERT; *Ballynacally, W.*—Health of district good.

KILLADYSERT; *Labasheeda.*—Health of district is good.

KILRUSH; *Carrigaholt.*—Health of district very good. One case of enteric fever.

KILRUSH; *Craggaknock.*—The district has been in a healthy state and free from disease of any kind during quarter. Vaccination not half what it should be—over 100 defaulters in district.

KILRUSH; *Kilrush, W.*—The district is healthy and free from infectious diseases.

LIMERICK; *Bridgetown.*—The sanitary condition of the district is satisfactory. Owing to an epidemic of whooping-cough some vaccinations were postponed.

LIMERICK; *Coolacasey.*—The sanitary condition of the district is satisfactory.

SCARRIFF; *Feakle.*—Health of the district good.

SCARRIFF; *Mountshannon, W.*—District very healthy generally.

SCARRIFF; *Quin.*—The sanitary arrangements are poor, particularly one village. None of the diseases mentioned in the abstracts are prevalent. There was only one case of typhoid fever, ending fatally; one of scarlet fever, with recovery; while one death from scarlet fever, which occurred during the previous quarter, was registered. There were five cases of typhus, all in one family, ending in recovery.

Cork County and County Borough.

BANDON; *Inishannon.*—District has been very healthy as regards infectious disease, with the exception of an epidemic of pertussis, which, I am glad to say, has now abated, and from which only one death occurred.

BANDON; *Murragh.*—Whooping-cough and measles were very prevalent during the quarter.

BANTRY; *Bantry, W.*—Health of district good. Measles is very prevalent at present.

BANTRY; *Durrus and Kilcrohane.*—Sanitary arrangements fairly good. One case of general phthisis, in which patient was in bed for 10 years. No case of cancer.

BANTRY; *Glengarriff.*—Of the six deaths registered during the quarter

ended, five were aged 60 years and upwards; one had reached the age of 103 years. The district is free from all forms of infectious disease.

BANTRY; *Kealkill.*—The sanitary condition of district is good. One case of cancer. Of the 12 deaths registered nine were over 60 years.

CASTLETOWN; *Kilcatherine.*—District healthy.

CLONAKILTY; *Clonakilty, W.*—Measles has been very prevalent, and there have been a few cases of whooping-cough.

CLONAKILTY; *Timoleague.*—There has been an epidemic of measles in the district. No deaths occurred from that disease. There were four cases of scarlet fever. There were seven cases of diphtheria, and three deaths from it, one of which was not registered during quarter. The very dry summer followed by exceedingly wet winter have had probably an influence in the outbreak of those epidemic diseases.

CORK; *Carrigaline, No. 1.*—District healthy. Vaccination greatly neglected.

CORK; *Dripsey.*—The sanitary condition of the district is fairly good; only three deaths registered.

DUNMANWAY; *Ballineen.*—I have not asked children to come in for vaccination, as there have been sporadic outbreaks of pertussis and measles. The weather also has been very severe, and the distances very long at this season.

DUNMANWAY; *Dunmanway, W.*—The sanitary condition of the district continues fairly satisfactory. Whooping-cough (which interfered with vaccination) was rather prevalent during a portion of the quarter.

FERMOY; *Ballynoe.*—Pneumonia very common during the month of November.

FERMOY; *Rathcormack.*—Two cases of pertussis during quarter. District otherwise healthy.

KANTURK; *Kanturk, W.*—Whooping-cough very prevalent in some parts of the district.

KANTURK; *Milford.*—Whooping-cough prevalent during October and November. District otherwise very healthy.

KILMALLOCK; *Charleville.*—The district is healthy. There have been two cases of typhus, one of enteric fever, and one of scarlet fever.

KINSALE; *Ballyjeard.*—Health of district good.

KINSALE; *Kinsale, W.*—In all the cases of deaths from whooping-cough, this disease was the primary cause, pneumonia and bronchitis the immediate cause of death. I have attended a very large number of cases during the quarter.

MALLOW; Ballyclogh.—Whooping-cough at present is very prevalent. District otherwise is healthy.

MALLOW; Buttevant.—Vaccination postponed owing to the severe weather prevailing during latter part of quarter.

MIDDLETON; Cloyne.—The health of the inhabitants was exceptionally good in this district during the quarter.

MIDDLETON; Middleton, No. 2.—In one village whooping-cough has been very rife during the two last months of the quarter.

SKIBBEREEN; Tullagh.—The outbreak of epidemic jaundice reported in the last quarter was continued into this, there being eight or ten additional cases. An outbreak of measles occurred during the quarter.

SKIBBEREEN; Unionhall.—Vaccination has been suspended owing to the prevalence of measles.

SKULL; Goleen.—The district is in a good sanitary condition, but Goleen village sadly needs a little pure drinking water.

Kerry County.

CAHERSIVEEN; Caher, W.—Influenza is very prevalent amongst children during the quarter; otherwise the district is healthy. Owing to the inclemency of the weather vaccination was postponed in a large number of cases.

CAHERSIVEEN; Darrynane.—The district is in a good sanitary state and free from zymotic disease.

CAHERSIVEEN; Emagh.—The sanitary condition of the district is fair. The large number of vaccinations is due to the fact of measles being very prevalent in the district for the previous nine months, and very few children were vaccinated.

CAHERSIVEEN; Glanbehy.—No deaths from cancer. Sanitary state of district good.

CAHERSIVEEN; Valencia.—Of the ten deaths registered, six averaged 77 years.

DINGLE; Anascaul.—Two deaths registered during the quarter are uncertified.

DINGLE; Castlegregory.—There has been no case of cancer during past quarter.

DINGLE; Dingle, W.—The last three months have been exceptionally healthy. The number of deaths registered in the quarter is the lowest that has been recorded for many years.

DINGLE; Ventry.—Sanitary condition of the district fair. Vaccination very backward.

KENMARE; Kilgarvan.—Vaccination postponed owing to bad weather.

KENMARE; Tuosist.—Five cases of diphtheria occurred during the past fortnight, with two deaths not registered during the quarter. In three cases I injected the anti-diphtheritic serum, with satisfactory results. Two houses only were infected.

KILLARNEY; Killarney, No. 1, W.—Whooping-cough very prevalent during November and December.

KILLARNEY; Killorglin.—District fairly healthy. One case of typhoid fever occurred during quarter.

KILLARNEY; Molahiffe.—The district has been very healthy during the quarter.

LISTOWEL; Ballyduff.—Six out of the thirteen deaths registered in the district were due to tuberculous diseases, five of them being due to phthisis pulmonalis.

LISTOWEL; Ballyhorgan.—No death from cancer. Sanitary state of district good.

LISTOWEL; Ballylongford.—District very healthy for quarter. Very small number of deaths compared to births. No case of contagious disease. Postponed all vaccinations until summer quarter.

LISTOWEL; Listowel, W.—District healthy. There were no successful primary vaccinations during quarter.

TRALEE; Brosna, No. 1.—District healthy.

TRALEE; Castlemaine.—No deaths from cancer. Vaccinations backward owing to inclement weather.

TRALEE; Kilgobban.—One death from cancer of the uterus and rectum, certified.

TRALEE; Tralee, No. 1, W.—Owing to epidemic of whooping-cough during month of December vaccination was stopped.

Limerick County and County Borough.

CROOM; Castletown.—A healthy quarter. There were a few cases of influenza, but the disease runs a far shorter course now than it did twenty years ago. Three-quarters of the deaths registered were uncertified, and, most of them being of aged persons, this is in accordance with the custom of the country.

KILMALLOCK; Bruff.—District healthy; no zymotic disease.

KILMALLOCK; Bruree.—The district is healthy.

KILMALLOCK; Hospital.—District healthy.

KILMALLOCK; Kilfinnane.—District very healthy.

KILMALLOCK; Kilmallock, W.—Five cases of scarlatina in Kilmallock during past month (December), and one in country; none fatal. All precautions were taken to prevent spread of disease. District otherwise healthy.

LIMERICK; Annacotty.—Sanitary arrangements very fair. District very healthy.

LIMERICK; Caherconlish.—Sanitary arrangements fairly good. No epidemic or infectious disease of any kind. Number of births 32; largest in my time. Death rate very low, only ten deaths. Of these, three were over 80 years, and two over 70.

LIMERICK; Moroe.—General sanitary condition of district fairly good. Outbreak of whooping-cough in one village during past month; great many children affected. No serious complications so far; no death. One death registered from tuberculosis bone disease, and one from tuberculous disease of larynx. None from cancer.

LISTOWEL; Glin.—The public health has been most satisfactory during the quarter just ended. Save and except one case of diphtheria, the district was remarkably free from infectious disease. The deaths were principally among the very old and feeble, and the death of one woman was registered whose age was stated to be 100 years. There were two deaths from pulmonary tuberculosis. Owing to the severity of the weather, I was obliged to postpone the vaccination of the children.

MITCHELSTOWN; Galbally.—District exceptionally healthy.

NEWCASTLE; Ardagh.—The sanitary state of the district is pretty fair. No epidemic of any disease.

NEWCASTLE; Feenagh.—The health of the district is fairly good.

RATHKEALE; Askeaton.—Phthisis pulmonalis caused one death. During the quarter the district was very healthy, except a few cases of pertussis in children.

RATHKEALE; Rathkeale, No. 1, W.—There was a general epidemic of whooping-cough in the district for the quarter, which fortunately contributed only four to the "black list," all under 2 years. The district was free from any other infectious or contagious disease. There were only twelve deaths in the district proper, and eight in the Union Hospital. Half the deaths were of persons over 60 years of age, one being 95, and all, except those who had bronchial affections, died of senile decay. There was one death in hospital from enteric fever; the patient came from an adjoining district.

RATHKEALE; Rathkeale, No. 2.—There was one case of typhus fever; otherwise the district was in a healthy condition.

RATHKEALE; Shanagolden.—Vaccination postponed owing to prevalence of whooping-cough and severity of weather. The combined ages of the seven persons whose deaths were registered during quarter amount to 532 years.

TIPPERARY; Grean.—Five cases of enteric fever occurred during the quarter. Four in one family from drinking polluted water, and the fifth contracted the disease in an adjoining district where cases had occurred.

Tipperary County, North Riding.

BORRISOKANE; CloghJordan.—The district is in a very healthy state.

BORRISOKANE; Terryglass.—District very healthy.

NENAGH; Nenagh, W.—No disease prevalent. District healthy.

NENAGH; Newport.—District free from all infectious diseases.

NENAGH; Silvermines.—Vaccination postponed owing to inclemency of the weather. One case of spinal tubercle and two of cancer registered.

NENAGH; Toomyvara.—The district is free from infectious diseases. There were three deaths registered at 76 years, one at 85 years, and one at 87 years.

Tipperary County, South Riding.

CALLAN; Ballingarry.—Influenzal pneumonia has been very prevalent during the quarter.

CALLAN; Mullinahone.—Sanitary condition of district fairly good. No epidemic or infectious disease in district except an odd case of influenza. Vaccination well attended to. No death from any form of tuberculosis or cancer during quarter.

CARRICK-ON-SUIR; Garrangibbon.—Vaccination, owing to severe weather, was postponed.

CASHEL; Killenale.—District healthy.

CASHEL; Kilpatrick.—Two cases of scarlatina of a very mild type during quarter.

CLOGHEEN; Caher.—Whooping-cough is at present epidemic in the district. No deaths were registered from same, otherwise the district is in a healthy state.

CLOGHEEN; Clogheen, W.—Whooping-cough prevalent; otherwise the district is healthy.

CLONMEL; Kilsheelan, No. 1.—One death from cancer. One case (fatal) of diphtheritic croup.

TIPPERARY; Cappagh.—The district is healthy.

TIPPERARY; *Emly*.—District very healthy.

URLINGFORD; *Kilcooly*.—Sanitary arrangements are good. Pneumonia prevalent during last month of quarter.

Waterford County and County Borough.

CARRICK-ON-SUIR; *Rathgormuck*.—Tonsillitis and bronchitis have been prevalent, largely amongst children. The aged also have not been free, especially amongst the poor.

CLONMEL; *Ballymacarbry*.—Sanitary state good.

CLONMEL; *Kilsheelan, No. 2*.—One death from cancer. No zymotic disease in district.

DUNGARVAN; *Dungarvan, W*.—Measles and pertussis were prevalent in parts of the district during past quarter.

DUNGARVAN; *Ringville*.—There has been an epidemic of whooping-cough in the district.

DUNGARVAN; *Whitechurch*.—Two cases of measles and one of facial erysipelas during the quarter.

LISMORE; *Ballyduff*.—Sanitation, vaccination, and general health of district very satisfactory.

WATERFORD; *Kilmeadan*.—District healthy. Sanitary arrangements good.

WATERFORD; *Waterford, Rural, No. 1*.—Vaccination well carried out.

WATERFORD; *Woodstown*.—The health and the sanitary condition of the district are excellent.

YOUGHAL; *Ardmore*.—An epidemic of whooping-cough; one fatal case. Measles also prevalent.

YOUGHAL; *Clashmore*.—Vaccination postponed owing to prevalence of measles and whooping-cough.

III.—PROVINCE OF ULSTER.

Antrim County.

ANTRIM; *Crumlin*.—The health of the community has been good this quarter; smaller death rate than usual.

ANTRIM; *Doagh*.—Whooping-cough and measles were very rife during the quarter. As a consequence a good number of vaccinations had to be postponed.

ANTRIM; *Randalstown*.—No hereditary history could be traced in the case of death registered caused by cancer. Of the seventeen deaths registered during the quarter, seven were over 70 years, and five were over 80 years.

ANTRIM; *Templepatrick*.—The sanitary arrangements of the district (with few exceptions) are good. Measles was prevalent in the western part of the district during October and November.

BALLYCASTLE; *Cushendall*.—The sanitary condition of the district greatly improved. Dwelling houses and surroundings much cleaner and tidier. No epidemic of any kind in the district. Ages of ten of the sixteen deaths above 60, six of these ten above 70, and one 94. One of the three deaths from tuberculosis was imported.

BALLYMENA; *Ballymena, W*.—Chest affections numerous owing to the severity of the weather; also a good many cases of whooping-cough with the usual complications.

BALLYMENA; *Broughshane*.—A good many children suffering from whooping-cough, but no deaths.

BALLYMENA; *Clogh*.—District very healthy.

BALLYMENA; *Galgorm*.—No zymotic disease in the district during the quarter. Death rate low.

BALLYMENA; *Glenwhirry*.—A peculiar form of infectious sore throat has been prevalent among the children attending one school in the district. The disease was rather doubtful in its nature, some cases, especially two that died, resembling in some respects diphtheria; the others being more in the nature of scarlet fever. The school was closed and isolation as far as possible observed, and the cases have now subsided.

BALLYMENA; *Portglenone*.—Health of the district is good.

BALLYMENA; *Toome*.—The district is in a good state, both from a sanitary and a health point of view.

BALLYMONEY; *Dirraw*.—Sanitary arrangements improving amongst labouring classes.

LARNE; *Ballycarry*.—Sanitary condition of district fairly good, though water is scarce in part. Whooping-cough, measles, and chicken-pox prevalent; three deaths registered from whooping-cough, also three from malignant diseases. One child insusceptible to vaccine disease (vaccinated six times). Father contracted smallpox about two years previous to child's birth, severe case (confluent), but recovered completely without sequelae.

LARNE; *Larne W*.—Whooping-cough prevalent. A good many cases of scarlatina of a mild type.

LARNE; *Waterfoot*.—Sanitary conditions of the district excellent. No epidemic of any kind. No deaths from tubercular disease.

LISBURN; *Dunmurry*.—The sanitary condition of this district good. No epidemic of any kind.

LISBURN; *Glenavy*.—Damp season has been particularly severe on tubercular cases, causing a heavy proportion of deaths. No epidemic of any kind.

LISBURN; *Knocknadona*.—The sanitary condition of this district is fairly good. One death from cancer of the breast; no family record. No death from tuberculosis. I registered one death at the age of 97, two at 81, one at 78, two at 74, and one each at 73, 72, 71, 67, 64, and 61 years.

LISBURN; *Lisburn, W.*—There were two cases of cancer registered. I registered the death of a child to-day aged 6 months; the disease was hydrocephalus, probably tuberculous, and duration 4 months.

Armagh County.

ARMAGH; *Blackwatertown*.—There were six cases of enteric fever in two adjoining townlands.

ARMAGH; *Loughgall*.—At present time district appears to have very little tuberculous disease.

ARMAGH; *Markethill*.—Whooping-cough has been very prevalent all over the district during the quarter. Except for the above the district has been very healthy.

ARMAGH; *Rich Hill*.—Diphtheria of a mild type was prevalent during early part of this quarter. I postponed vaccination in a number of cases owing to this epidemic.

ARMAGH; *Tynan*.—The health of this district during the past quarter was very satisfactory.

NEWRY; *Forkill*.—Vaccination below the average owing to the prevalence of whooping-cough.

NEWRY; *Mullaghglass*.—District healthy except for chest troubles amongst the aged.

Belfast County Borough.

BELFAST; *Belfast Urban, No. 4*.—One death from cerebro-spinal fever.

BELFAST; *Belfast Urban, No. 5*.—No outbreak of cerebro-spinal fever or any other epidemic during quarter.

BELFAST; *Belfast Urban, No. 11*.—The death rate for the quarter has been below the average. There has been a diminution in vaccination, probably due to the prevalence of bronchitis and whooping-cough among children. There have been no deaths registered from cerebro-spinal fever or cerebro-spinal meningitis.

BELFAST; *Belfast Urban, No. 13*.—No deaths from cerebro-spinal meningitis.

Cavan County.

BAILIEBOROUGH; *Bailieborough, W.*—District in a healthy condition.

BAILIEBOROUGH; *Shercock*.—Several cases of pneumonia of an epidemic form occurred during the quarter, also several cases of influenza and bronchitis.

BAWNBOY; *Swanlinbar*.—District healthy.

CAVAN; *Killashandra*.—An epidemic of measles has prevailed during the quarter—no deaths registered from it.

COOTEHILL; *Drum, No. 2*.—The sanitary condition of the district is good.

COOTEHILL; *Tullyvin*.—District healthy and free from contagious disease.

ENNISKILLEN; *Holywell, No. 2*.—The sanitary condition of the district is fairly good. Measles and whooping-cough are prevalent at present. Of the eleven deaths registered seven were those of persons over 70 years of age.

GRANARD; *Scrabby, No. 1*.—Sanitary arrangements of the district fairly satisfactory. A widespread epidemic of measles at present prevails throughout this district. Only one fatality from this disease recorded. Vaccination rather backward.

OLDCASTLE; *Ballyjamesduff*.—District healthy. One death, that of a woman registered as 104 years, but supposed to have been 119 at time of death.

Donegal County.

BALLYSHANNON; *Ballintra*.—Sanitary condition of district fairly good, but bad water supply.

DONEGAL; *Donegal, W.*—District healthy.

DONEGAL; *Dunkineely*.—Health of district good. An inquest was held on portion of the remains of a child found concealed in a ditch.

DONEGAL; *Laghy*.—The district has been exceptionally healthy during the quarter, and is now free from enteric fever, which has been endemic for the last few years.

DONEGAL; *Mountcharles*.—District healthy. No outbreak of any infectious disease.

DONEGAL; *Pettigoe*.—Two cases of scarlet fever occurred in the district during the quarter.

DUNFANAGHY; *Crossroads*.—District free from infectious diseases. Four deaths from tubercular diseases were registered during the quarter.

DUNFANAGHY; *Dunfanaghy, W.*—One death from typhus fever; sent into hospital. No other case in the district.

GLENTIES; *Ardara*.—District free from any zymotic disease.

GLENTIES; *Carrick*.—I have to report that the sanitary state of the district is fairly good. There is no contagious disease that I am aware of except whooping-cough among children.

GLENTIES; *Doocharry*. — District healthy.

GLENTIES; *Dunglow, No. 1*.—The health of the district is exceptionally good. The small number of vaccinations is due to the extreme severity of the weather.

INISHOWEN; *Buncrana*. — District healthy.

INISHOWEN; *Carndonagh, W.*—District fairly healthy. One death from scarlatina during the quarter.

INISHOWEN; *Clonmany*.—No vaccinations during the quarter owing to the severity of the weather.

INISHOWEN; *Malin*.—District healthy.

INISHOWEN; *Moville*.—There was an outbreak of diphtheria in two different parts of my district; five deaths occurred from same. Vaccination has been postponed owing to the very severe weather.

LETTERKENNY; *Church Hill*.—District healthy. No epidemic.

LONDONDERRY; *Killea*. — District healthy considering the severe weather.

MILLFORD; *Fanad*.—District healthy. No cases of infectious disease during past quarter.

MILLFORD; *Rathmullan*.—Vaccination postponed in consequence of severe weather.

MILLFORD; *Rosquill*.—District fairly sanitary and free from infectious disease. During the quarter only one death registered from pulmonary tuberculosis. Of the 25 deaths registered during the quarter thirteen are persons over 60 years, and seven are under one year of age. Vaccinations in backward state owing to severity of the weather.

STRABANE; *Raphoe*.—Sanitary arrangements satisfactory. Seven cases of scarlet fever, and one case of diphtheria reported during quarter. One case of death from diarrhoea complicated with gastritis.

STRANORLAR; *Cloghan*.—Sanitary arrangements satisfactory.

Down County.

BANBRIDGE; *Ballyward*.—Sanitary state of district fairly good. One case of enteric fever recovered, one died—death not yet registered. One case of scarlatina.

BANBRIDGE; *Banbridge, W.*—A very gratifying decrease in the mortality from all forms of tuberculous disease in the rural part of this dispensary district for the past three years. The number of deaths were:—1907, 32; 1908, 19; 1909, 16.

BANBRIDGE; *Loughbrickland*.—There were four cases of scarlatina with no deaths, and four cases of diphtheria with one death. Influenza has been prevalent during the months of November and December. Sanitary arrangements in the district are fairly good.

BELFAST; *Castlereagh, No. 1*.—No deaths from cerebro-spinal meningitis.

DOWNPATRICK; *Ballynahinch*.—There have been numerous cases of influenza of a severe type in the district during the quarter.

DOWNPATRICK; *Clough*.—Influenza prevalent; several deaths occurred from the complication of pneumonia following influenza.

DOWNPATRICK; *Killyleagh*.—The death rate for the quarter is very low. I have seen a few cases of scarlatina, and there has been an epidemic of whooping-cough. The cases have been mild, and no deaths have been reported.

DOWNPATRICK; *Portaferry*.—Influenza was prevalent during quarter, and two cases of diphtheria occurred, one of which died. The district was otherwise healthy.

KILKEEL; *Kilkeel, No. 2, W.*—Health of district good. Only sixteen deaths this quarter.

KILKEEL; *Rosstrevor*.—There is nothing particular to note. The district has been comparatively free from infectious disease during this quarter, there having been only one case of diphtheria, which was sent to hospital and cured. The sanitary condition is quite satisfactory. All children—with two postponed exceptions—vaccinated. No defaulters.

LISBURN; *Annahilt*.—The births and deaths are both below the average. District free from any epidemic disease.

LISBURN; *Ballylesson*.—An epidemic of scarlatina of a mild type present in the district.

LISBURN; *Drumbeg*.—Births and deaths below the average.

LISBURN; *Saintfield*. — Health of district good.

LURGAN; *Moir*.—This quarter sees a reversal of the balance of last quarter, when the deaths exceeded the births. Now there are but twelve deaths to twenty-five births. Of the births, males are in the extraordinary disproportion of twenty to five females. Of the twelve deaths one is under a year old, and eight are aged 60 years and upwards, one being 89. One death from cancer.

LURGAN; *Waringstown*.—District healthy—very little infectious disease.

NEWRY; *Donaghmore*.—No infectious disease.

NEWRY; *Rathfriland*.—Sanitary condition of district much improved.

NEWTOWNARDS; *Bangor*.—Sanitary arrangements very good. No epidemic. Health good. Vaccination well carried out.

NEWTOWNARDS; *Comber*.—Health of district very good; almost free from epidemic disease. Sanitary arrangements very satisfactory.

NEWTOWNARDS; *Greyabbey*.—Births and deaths below average. General health of the district good throughout quarter. One death from scarlatina. Influenza now prevalent throughout district, and a number of cases of sore throat, unusual in appearance—some with, others without fever. Appearance in palate and throat dark measley and lenticular; tongue white and not at all of character of scarlatina, nor apparently infectious.

NEWTOWNARDS; *Newtownards, W.*—The general health of the district has been good. We have had no outbreak of any disease. The chief sanitary defect is the want of sewers. A start is to be made next month to put down a new system of sewers. When we have got that done I feel certain the general health of the people will improve.

Fermanagh County.

BALLYSHANNON; *Church Hill*.—District healthy.

ENNISKILLEN; *Enniskillen, W.*—Sanitary arrangements fairly satisfactory.

ENNISKILLEN; *Florencecourt*.—One death occurred in the last month of quarter from diphtheria. The remainder of the family, four in number, were injected with anti-diphtheritic serum and isolated, all of whom made a good recovery. House disinfected with lime and crude carbolic acid. No further spread of the disease in neighbourhood. An epidemic of measles was prevalent during quarter, but no deaths from same.

ENNISKILLEN; *Holywell, No. 1*.—The sanitary condition of this district is fairly good. Two deaths were registered, both men; one died at 27 of pulmonary tuberculosis, and the other was aged 73 years.

IRVINESTOWN; *Clonelly*.—There have been some mild cases of scarlet fever in the district. The sanitary arrangements in the Fermanagh portion of Pettigoe are very bad.

IRVINESTOWN; *Ederney*.—District at present healthy.

IRVINESTOWN; *Irvinestown, W.*—District healthy. Deaths below average. One death from cancer of throat; this man's mother died from cancer of breast. One case diphtheria. Patient was a visitor in house where there were other children, and although there was free intercourse, timely use of anti-diphtheritic serum prevented any spread of the disease.

LISNASKEA; *Derrylin*.—Sanitary condition primitive and capable of very considerable improvement. There is no means of checking epidemics when they break out. A few cases of scarlatina and a great deal of influenza have been noticed during the quarter.

LISNASKEA; *Lisnaskea, W.*—Sanitary state of district fair. Measles has been epidemic in district during quarter, causing four deaths through complications.

Londonderry County and County Borough.

COLERAINE; *Aghadowey*.—Never remember so few deaths; the number is 6. Combined age of three of these is 244 years. Whooping-cough of mild type prevailed, but on whole district has been very healthy.

COLERAINE; *Garvagh*.—A number of cases of bronchitis and pneumonia have occurred during last three weeks, and whooping-cough has appeared in some parts of the district, otherwise health of district good.

COLERAINE; *Kilrea*.—District healthy. Rather fewer primary vaccinations owing to the severity of the season.

COLERAINE; *Portstewart*.—The health of the district has been good for the first two months of the quarter. For the past month there have been a good number of cases of illness, but these are of the nature of chills and pulmonary inflammations. There have been no infectious diseases.

LIMAVADY; *Ballykelly*.—The sanitary arrangements of the district are satisfactory. Parents have complied with the law as regards vaccination to my satisfaction.

LIMAVADY; *Bellarena*.—District healthy.

LIMAVADY; *Limavady, W.*—One case of scarlet fever and four of diphtheria occurred during quarter. Nearly all sent to Union Hospital. Houses thoroughly disinfected.

LONDONDERRY; *Claudy*.—A death was registered at the age of 102 years—this age was authenticated.

LONDONDERRY; *Eglinton*.—One case of cancer of stomach (uncertified). Three cases of diphtheria were removed to hospital. One death of centenarian fully authenticated.

MAGHERAFELT; *Moneymore*.—An outbreak of scarlatina occurred at the beginning of October, with one death of an infant. Disease had been imported by a visitor. Several cases were removed to hospital. District now free from the disease. One death took place from enteric fever, traceable to impure water. There is a case of enteric in the district at present, but having no communication with the previous one. Traceable also to contaminated water. Otherwise the district is healthy.

Monaghan County.

CARRICKMACROSS; *Carrickmacross, W.*—District in fair sanitary condition.

CARRICKMACROSS; *Donaghmoyne*.—The case of whooping-cough came from America.

CARRICKMACROSS; *Raferagh*.—A number of cases of severe influenza occurred during the quarter many of which I was about to report as typhoid. However, I am glad to say all recovered by usual treatment. Find people most anxious to take due sanitary precautions.

CASTLEBLANEY; *Ballybay*.—One family affected by diphtheria. Half of the deaths registered were aged persons, which accounts for the large number uncertified.

COOTEHILL; *Dawsonsgrove*.—The sanitary condition of the district is fairly good.

COOTEHILL; *Drum, No. 1*.—The sanitary condition of the district is good.

MONAGHAN; *Castleshane*.—District sanitary. No epidemic of any disease.

MONAGHAN; *Emyvale*.—The sanitary arrangements fairly satisfactory. No epidemic during the quarter.

MONAGHAN; *Kilmore*.—One case of diphtheria. Vaccination below average owing to severity of season.

MONAGHAN; *Monaghan, W.*—The sanitary arrangements in this district continue satisfactory. There has been no epidemic, and the general health, as proved by the small number of deaths during the quarter, has been exceptionally good. There are no circumstances affecting the public health or vaccination which in my opinion call for special notice.

MONAGHAN; *Scotstown*.—The health and sanitary arrangements of the district are satisfactory.

Tyrone County.

CASTLEBERG; *Castlederg, W.*—Sanitary state of district now satisfactory. Number of cases of diphtheria during the quarter—only one death, owing to waiting rather long; all others got well.

CASTLEBERG; *Drumquin*.—The sanitary condition of the district is very satisfactory, with no infectious disease of any sort. The death rate in the district is the smallest for any quarter since I came to it, only three having died.

CASTLEBERG; *Killeter*.—State of district healthy. One death registered at 101 years.

CLOGHER; *Clogher, W.*—Sanitary arrangements fairly good. Water supply for Clogher and Augher very bad.

CLOGHER; *Fivemiletown*.—The health of the district was pretty good during the quarter. There were a few mild cases of measles.

COOKSTOWN; *Coagh*.—Whooping-cough still prevalent in district, one death registered as caused by it. Otherwise district free from any zymotic disease.

COOKSTOWN; *Cookstown, W.*—The district is very healthy.

COOKSTOWN; *Pomeroy*.—District generally healthy.

COOKSTOWN; *Stewartstown*.—District at present very healthy. No epidemic—except impetigo.

DUNGANNON; *Caledon and Ballymagran*.—Health of district good.

DUNGANNON; *Clonavaddy*.—Sanitary arrangements good.

DUNGANNON; *Coal Island*.—No case of an infectious nature was notified during the quarter. A great number of cases of pulmonary trouble among the aged and infants towards the latter portion of the quarter.

IRVINESTOWN; *Trillick*.—In this quarter there were no deaths from tubercular disease. Two were registered from diabetes. None from cancer or any form of malignant disease.

OMAGH; *Drumquin*.—The sanitary arrangements of the district are very satisfactory. None of the above-named or other diseases are at present prevalent. Of the deaths registered three were over 80 years of age, and two over 70 years of age.

OMAGH; *Fintona*.—The health of the district, considering the severe weather, has been good during the past quarter. Most of the deaths registered were persons over 60 years, including one of 101. A few cases of scarlatina reported. The sanitary arrangements are satisfactory.

OMAGH; *Omagh, No. 1, W.*—Of uncertified deaths, all in Rural District, ages were 87, 81, 74, and 5 years; 8 days; 4 days; and 10 minutes. Sanitary condition of the urban district is fairly satisfactory. The dairies and cowsheds show an improvement. In the Rural district general apathy exists (manure heaps, cesspools, insanitary outhouses). The Dairy and Cowshed Order seems non-existent. Health seems generally satisfactory. One case of diphtheria from another district; one case typhoid in asylum.

OMAGH; *Omagh, No. 2.*—The district is free from epidemic disease for the past quarter. The death rate is lower for the past two quarters than it has been for years.

OMAGH; *Sixmilecross.*—No epidemic during the quarter. Sanitary arrangements are much more satisfactory owing to the exertions of the sub-sanitary officers and myself. One person registered during the quarter was 100 years. Seven between 80 and 90 years. Four between 70 and 80 years.

STRABANE; *Newtownstewart.*—Of the four uncertified deaths, two were those of farmers, the other two were of people qualified to receive free medical attendance, and were both very sudden and unexpected; the person in one case having been discovered dead on the public road, and in the other the doctor was called in but did not arrive till after death.

IV.—PROVINCE OF CONNAUGHT.

Galway County.

CLIFDEN; *Inishbofin.*—Public health very good, but the wells are not protected from pigs, cattle, fowl, etc., for there are no walls round the wells.

CLIFDEN; *Roundstone, No. 1.*—District healthy.

CLIFDEN; *Roundstone, No. 2.*—Health of the district satisfactory.

GALWAY; *Galway, No. 3 (Arran).*—District very healthy.

GALWAY; *Moycullen.*—Sanitary condition of district is very good.

GALWAY; *Oranmore.*—District healthy
GALWAY; *Spiddle.*—District continues healthy.

GORT; *Gort, W.*—The health of the district has been good.

GORT; *Kinvarra.*—The health of the district is fairly good.

LOUGHREA; *Athenry.*—District free from infectious diseases. The sewerage and water supply of Athenry have formed the subject of an inquiry by the Local Government Board recently.

LOUGHREA; *Bullawn.*—Three of the deaths registered ranged between 80 and 89 years.

OUGHTERARD; *Cloonbur, No. 1.*—Health of district good. No zymotic disease.

OUGHTERARD; *Oughterard, W.*—No deaths from cancer registered.

PORTUMNA; *Portumna, No. 1, W.*—The district is in a fairly good sanitary condition, and free from contagious disease as far as I am aware of.

TUAM; *Tuam, No. 1, W.*—There were a number of cases of influenza during the last month, and a few cases of enteric fever during the quarter.

TUAM; *Tuam, No. 2.*—Three cases of cancer. One case occurred in a village in which I have attended cancer cases in nearly every house from time to time. District free from epidemic disease except influenza, which was prevalent for last month of quarter; it is of a mild type.

Leitrim County.

BAWNBOY; *Ballinamore.*—Sanitary state of district good.

CARRICK-ON-SHANNON; *Drumshanbo.*—District healthy and in good sanitary condition.

MANORHAMILTON; *Lurganboy.*—Influenza of a mild type was prevalent. The sanitary condition of the district is fairly satisfactory when due regard is paid to economic factors and the want of facilities the people suffer from.

MANORHAMILTON; *Manorhamilton, W.*—Measles and whooping-cough have been very prevalent in part of the district.

MOHILL; *Carrigallen.*—The health and sanitation of the district have been fairly good during the quarter. There were two deaths from measles (one not yet registered) owing in one case to broncho-pneumonia, and in the other to peritonitis complicating the disease. The widespread epidemic of measles which has continued for almost the entire half-year has now, I believe, finally ceased.

MOHILL; *Mohill, W.*—The sanitary arrangements in the district seem to be fairly good. There was only one case of death from measles during the quarter.

MOHILL; *Rinn.*—The district generally speaking is in a healthy condition, and free from epidemic disease.

MOHILL; *Rowan.*—There has been an epidemic of influenza during the quarter which attacked almost every house. One death from cancer of stomach, and two from tuberculous disease registered. Sanitation fair.

Mayo County.

BALLINA; Ballina, W.—Ten deaths have been registered during the quarter of persons aged 80 years and upwards, including one at 94 years and one at 100 years, the latter well authenticated. Five deaths from malignant diseases. Sanitation not satisfactory. Domestic scavenging in the urban district should be better carried out. No vaccination returns for the last two months of the quarter.

BALLINA; Crossmolina.—Sanitary condition fair. Vaccinations fairly numerous in early half of quarter, ceased in latter half owing to very severe weather.

BALLINROBE; Ballinrobe, W.—The sanitary condition of the district fairly good. Some cases of influenza occurred during the quarter. General health of district good. Vaccination not satisfactorily complied with owing to the inclement weather. One accidental death, by "choking," was registered during the quarter, in which case no inquest was held.

BALLINROBE; Cappaghduff.—The houses require whitewashing, also removal of manure pits from front of their houses.

BALLINROBE; Cong.—Health of district good.

BALLINROBE; Hollymount.—Births about the average, deaths under the average. Except for some cases of whooping-cough during the first and second months of this quarter, and influenza in the third month, the health of the people has been very good.

BELMULLET; Binghamstown, W.—One death was registered over 106 years. The sanitary condition of the district is bad, as manure heaps are in close proximity to the dwelling houses, and cattle, pigs, and fowl are kept in the majority of the dwelling houses.

CASTLEBAR; Balla.—District healthy. Vaccination something backward owing to severe weather.

CASTLEBAR; Castlebar, No. 1, W.—Health of district good.

CLAREMORRIS; Ballyhaunis.—The excessive humidity and general inclemency of the weather during the quarter has (through bronchial affections) proved very fatal to aged persons. In other respects the health of the district has been fairly good. No zymotics; one death from cancer of stomach. Sanitation progressive. A very great improvement is observable in the dwellings of the poorer classes.

KILLALA; Ballycastle.—We had an epidemic of typhus fever in this district during last quarter and first month of this quarter. There were about 20 cases, including myself. One of the patients died in Killala Fever Hospital.

KILLALA; Killala, W.—Whooping-cough was generally prevalent in the district during the quarter. Two deaths from typhus fever occurred in the Fever Hospital.

SWINEFORD; Lowpark.—A young child in the district died after a few days' illness without having had medical attention. A few days afterwards I was called to see a sister of this child who was suffering from diphtheria. Another sister also developed it, and both recovered.

WESTPORT; Achill.—General health and sanitary state of district good. Influenza of a mild type prevalent for past month. Weather so wild and bad that few children have been presented for vaccination.

WESTPORT; Ballycroy.—Vaccinations practically impossible owing to bad weather during most of quarter. One death from tubercular peritonitis. Influenza of a mild bronchial type prevalent towards end of quarter.

WESTPORT; Islandeady.—The sanitary condition of the district is good. There has been no outbreak of infectious disease. Six deaths above 60 out of a total of eight.

WESTPORT; Louisburgh.—Sanitary condition of district good. Three cases of diphtheria occurred during quarter, one death. Influenza of a severe form very prevalent during last month of quarter. Vaccination backward owing to prevailing severe weather.

WESTPORT; Newport.—With the exception of an epidemic of influenza the general health of the district for the past quarter was exceptionally good. Sanitary arrangements fair. One death from tuberculosis of the lungs.

Roscommon County.

ATHLONE; Athlone, No. 2.—One death of a person 80 years.

ATHLONE; Kiltoom.—No vaccination performed owing to severe weather. The sanitary condition good.

BOYLE; Boyle, No. 1, W.—The district has been healthy, and there has been no epidemic during the past quarter.

CASTLEREAGH; Ballaghaderreen.—The district has been in a very healthy condition for the last quarter.

CASTLEREAGH; Loughglinn.—The sanitary conditions of the district are improving. The health of the people continues to be good. Whooping-cough on the decline. There has been no death from cancer.

ROSCOMMON; *Roscommon, W.*—In one house the father died of cancer and the daughter of tuberculosis of lungs. Influenza, generally in a mild form, prevalent in district.

STROKESTOWN; *Roosky.*—There are two deaths each registered from tuberculosis and diphtheria, and one from cancer. Of the deaths registered, one was 81 years, one 85 years, and one 96 years of age. Sanitation progressive.

Sligo County.

BOYLE; *Gurteen.*—A few cases of influenza.

DROMORE, WEST; *Castleconor.*—The sanitary state of the district is fair, except in one town which has no sewerage of any kind.

DROMORE, WEST; *Easky, W.*—Health of district good. No case of infectious disease during quarter.

DROMORE, WEST; *Skreen.*—All things are very satisfactory, save that the vaccination laws are not complied with.

SLIGO; *Ballymote.*—Health of district very good. No zymotic diseases in district.

SLIGO; *Carney, No. 1.*—Sanitary condition of this district is good.

SLIGO; *Carney, No. 2.*—Sanitary condition of district fairly good.

SLIGO; *Collooney.*—A good many cases measles during quarter; no deaths.

SLIGO; *Riverstown.*—A few mild cases of measles during end of quarter.

TOBERCURRY; *Coolaney.*—Sanitation satisfactory.
